Schedule SB, Part V – Summary of Actuarial Methods and Assumptions
Stevens Institute of Technology Non-Academic Staff Employees Pension Plan
EIN: 22-1487354 PN: 002
For Plan Year Ending June 30, 2025

SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

COST METHOD

In accordance with PPA, the annual cost is equal to the target normal cost plus the shortfall amortization charge minus any prefunding and carryover balances.

Unit Credit method. The normal cost is the sum of the individual normal costs for active participants. The normal cost for an individual is the present value, as of the valuation date, of the participant's retirement, death, and withdrawal benefits which he is expected to accrue during the current plan year.

The actuarial accrued liability is the sum of the individual present values, for all participants, of the benefits accrued, based on service to the valuation date.

The actuarial liabilities shown in this report are determined using software purchased from an outside vendor which was developed for this purpose. Certain information is entered into this model in order to generate the liabilities specific to your pension plan. These inputs include economic and non-economic assumptions, plan provisions and census information. We rely on the coding within the software to value the liabilities using the actuarial methods and assumptions selected. Both the input to and the output from the model is checked for accuracy and reviewed for reasonableness.

ACTUARIAL ASSUMPTIONS

Interest Rates

Without Adjusted Interest Rates under Funding Relief:

Liabilities are valued using the three segment rates based on the 24-month average of the corporate bond yield curve published by the Secretary of the Treasury for the applicable month of July 2024.

PBGC Premiums and LDROM:

The Plan Sponsor is using the Alternative Method to determine the Variable Rate Premium.

Schedule SB, Part V – Summary of Actuarial Methods and Assumptions
Stevens Institute of Technology Non-Academic Staff Employees Pension Plan
EIN: 22-1487354 PN: 002
For Plan Year Ending June 30, 2025

SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

COST METHOD

In accordance with PPA, the annual cost is equal to the target normal cost plus the shortfall amortization charge minus any prefunding and carryover balances.

Unit Credit method. The normal cost is the sum of the individual normal costs for active participants. The normal cost for an individual is the present value, as of the valuation date, of the participant's retirement, death, and withdrawal benefits which he is expected to accrue during the current plan year.

The actuarial accrued liability is the sum of the individual present values, for all participants, of the benefits accrued, based on service to the valuation date.

The actuarial liabilities shown in this report are determined using software purchased from an outside vendor which was developed for this purpose. Certain information is entered into this model in order to generate the liabilities specific to your pension plan. These inputs include economic and non-economic assumptions, plan provisions and census information. We rely on the coding within the software to value the liabilities using the actuarial methods and assumptions selected. Both the input to and the output from the model is checked for accuracy and reviewed for reasonableness.

ACTUARIAL ASSUMPTIONS
