INDEPENDENT AUDITORS' REPORT

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of Texas Farm Products Holding Company Defined Benefit Plan (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits and of accumulated plan benefits as of June 30, 2025 and 2024, and the related statements of changes in net assets available for benefits and changes in accumulated plan benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Management has obtained certifications from a qualified institution as of and for the years ended June 30, 2025 and 2024, stating that the certified investment information, as described in Note 6 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Texas Farm Products Holding Company Defined Benefit Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Texas Farm Products Holding Company Defined Benefit Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Texas Farm Products Holding Company Defined Benefit Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Texas Farm Products Holding Company Defined Benefit Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedules Required by ERISA

The supplemental schedules are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion

- the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- the information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

TEXAS FARM PRODUCTS HOLDING COMPANY DEFINED BENEFIT PLAN

NOTES TO THE FINANCIAL STATEMENTS

JUNE 30, 2025 AND 2024

1. Description of Plan

The following description of Texas Farm Products Holding Company Defined Benefit Plan (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

- (a) *General.* The Plan is a defined benefit pension plan covering substantially all employees employed prior to December 31, 2008. The Plan sponsor is Texas Farm Products Company (the "Company") and is subject to the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

The Plan is administered by the Pension Committee, which is a committee comprised of senior management, employees, and a former employee. The Pension Committee has overall responsibility for the operation and administration of the Plan. The Pension Committee determines the appropriateness of the Plan's investments, monitors investment performance, and reports to the Company's Board of Directors.

Effective December 31, 2008, the Plan was amended to freeze accumulated benefits and limit future participation in the Plan. As a result of this amendment, the accrued benefits of any and all participants in the Plan are frozen as of December 31, 2008, and no future benefits will accrue under the Plan thereafter. Additionally, only participants who had satisfied the eligibility requirements and entered the Plan prior to December 31, 2008, in accordance with the provisions of the Plan, may participate in the Plan.

- (b) *Funding Policy.* The Plan's funding policy is for the Company to contribute an amount which will meet or exceed the annual ERISA minimum funding requirement. During the plan year ended June 30, 2025 and 2024, the Company made contributions of \$315,059 and \$212,118, respectively. The Company's contributions for both 2025 and 2024 met the minimum funding requirements for ERISA.
- (c) *Pension Benefits.* Employees with five (5) or more years of service are entitled to monthly pension benefits beginning at normal retirement age (65) equal to 35% of their highest ten (10) year monthly compensation (Average Considered Compensation) reduced 1/30th for each year of service less than 30 at normal retirement date plus 21% of average considered compensation in excess of Social Security covered compensation reduced 1/35th for each year of service less than 35 at normal retirement date. The normal retirement date is the first day of the month coinciding with or next following the date upon which an employee reaches the later of his or her sixty-fifth (65th) birthday or his or her fifth (5th) anniversary of Plan participation. The Plan permits early retirement at ages 55-64, with seven years of completed service. Employees may elect to receive the value of their accumulated plan benefits as a lump-sum distribution upon retirement or termination, or they may elect to receive their benefits as a life annuity payable monthly from retirement.

TEXAS FARM PRODUCTS HOLDING COMPANY DEFINED BENEFIT PLAN

NOTES TO THE FINANCIAL STATEMENTS

JUNE 30, 2025 AND 2024

- (d) *Death and Disability Benefits.* If an active employee dies prior to his or her normal retirement, a death benefit equal to the present value of the employee's vested accrued monthly retirement benefit earned, calculated as of the date of death, is paid to the employee's beneficiary. Active employees who become totally disabled receive annual disability benefits that are equal to the normal retirement benefits they have vested in at the time they become disabled.

2. Significant Accounting Policies

- (a) *Basis of Accounting.* The accompanying financial statements are prepared on the accrual basis of accounting.
- (b) *Use of Estimates.* The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.
- (c) *Investment Valuation and Income Recognition.* Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's Pension Committee determines the Plan's valuation policies utilizing information provided by its investment adviser and trustee. See Note 5 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

- (d) *Payment of Benefits.* Benefits are recorded upon distribution.
- (e) *Administrative Expenses.* The Plan's expenses are paid either by the Plan or the Company, as provided by the Plan document. Expenses that are directly paid by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying statements of changes in net assets available for benefits. In addition, certain investment related expenses are included in net appreciation of fair value of investments presented in the accompanying statement of changes in net assets available for benefits.

3. Actuarial Present Value of Accumulated Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

TEXAS FARM PRODUCTS HOLDING COMPANY DEFINED BENEFIT PLAN

NOTES TO THE FINANCIAL STATEMENTS

JUNE 30, 2025 AND 2024

Benefits under the Plan are accumulated based on employees' annual compensation during the highest paid consecutive ten-year period of service prior to the freezing of the Plan, subject to a benefit formula as defined in the Plan document. If an employee has fewer than ten (10) years of service, the employee's annual compensation shall be averaged over the employee's years of service.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The more significant assumptions underlying the actuarial computations are as follows:

Funding method for retirement benefit	Traditional Unit Credit Cost Method
Assumed rate of return on investments	As of July 1, 2025: 5.75%
	As of July 1, 2024: 5.75%
Mortality basis	The sex-distinct Blue Collar Pri-2012 Mortality Table for employees and healthy annuitants, with projected mortality improvements using Scale MP-2021 on a generational basis. The mortality assumption was selected based on a review of published mortality tables and the demographics and industry of the Plan.
Salary increases	Not applicable as plan is frozen
Assumed retirement age	Normal retirement age, or attained age if greater

The interest rates used to discount the obligation for 2025 and 2024 was 5.75%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of July 1, 2025 and 2024. Had the valuations been performed as of June 30, management believes there would be no material differences.

4. Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all. Participants should refer to the Plan document for more complete information.

5. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy are described as follows:

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.
- Level 2 Inputs to the valuation methodology include:
- quoted prices for similar assets or liabilities in active markets;
 - quoted prices for identical or similar assets or liabilities in inactive markets;
 - inputs other than quoted prices that are observable for the asset or liability;
 - inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

- Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at June 30, 2025 and 2024.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the SEC. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Pooled separate accounts: Valued at the net asset value of units held by the Plan at year end. The NAV, as provided by the trustee, is used as a practical expedient to estimate the fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the funds will sell the underlying investments for an amount different from the reported NAV. Participant transactions (purchases and sales) may occur daily.

NOTES TO THE FINANCIAL STATEMENTS

JUNE 30, 2025 AND 2024

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of June 30, 2025 and 2024:

<i>Assets at Fair Value as of June 30, 2025</i>					
	Level 1	Level 2	Level 3	Investments Measured at NAV	Total

Investments at fair value	<u>\$ 231,417</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 8,765,196</u>	<u>\$ 8,996,613</u>

There were no assets or liabilities measured at fair value on a non-recurring basis at June 30, 2025 and 2024. There were no liabilities measured on a recurring basis at June 30, 2025 and 2024.

The following table summarizes investments measured at fair value based on net asset value (NAVs) per share as of June 30, 2025 and 2024, respectively.

NOTES TO THE FINANCIAL STATEMENTS

JUNE 30, 2025 AND 2024

6. Certified Investments

Certain information related to investments disclosed in the accompanying financial statements and supplemental schedules, including investments held at June 30, 2025 and 2024, and net appreciation in fair value of investments, interest and dividends for the years ended June 30, 2025 and 2024, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by Principal Trust Company, the trustee of the plan.

7. Tax Status

The Plan obtained its latest determination letter on August 6, 2020, in which the Internal Revenue Service (IRS) states that the Plan, as designed, is in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan Administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the plan and recognize a tax liability if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

8. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported, based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

9. Related Party and Party in Interest Transactions

As described in Note 2, the Plan paid certain expenses related to plan operations and investment activity to various service providers. These transactions are party in interest transactions under ERISA. Certain Plan investments are managed by Principal Trust Company. Principal Trust Company is the trustee and recordkeeper for the Plan and therefore, these transactions qualify as party in interest transactions.

10. Subsequent Events

Management evaluates events occurring subsequent to the date of the financial statements in determining the accounting for and disclosure of transaction and events that affect the financial statements. Subsequent events have been evaluated through April 13, 2026, which is the date the financial statements were available to be issued.

Actuarial Assumptions and Methods

The valuation of a defined benefit pension plan involves estimates and assumptions about the probability of events occurring far into the future. Examples include assumptions about future employment, mortality, and retirement. Below is a description of the actuarial assumptions and methods used in the valuation.

Funding Target Liability

Valuation Date: July 1, 2024

Demographic Information: The demographic information was provided as of July 1, 2024 by TFP Nutrition. Although we did not audit the data, we did review the data for reasonableness.

Actuarial Cost Method: As required by PPA, the Traditional Unit Credit Cost Method was used.

Asset Valuation Method: The actuarial value of assets is determined by averaging the fair market value of assets as of the valuation date and the adjusted fair market values as of the preceding two valuation dates. This methodology is consistent with that provided in IRS Notice 2009-22.

Anticipated Rate of Return on Plan Assets: 5.75%, based on a review of the Plan's asset allocation, investment policy (as shown in the annual funding notice), and expected returns using recent capital market assumptions published by leading financial organizations.

Actuarial Valuation Software: For purposes of developing the projected future benefit payments as well as determining attributed liabilities and normal costs as of the valuation date, we utilized the ProVal software platform developed by Winklevoss Technologies. We believe this externally developed valuation system is appropriate, was used for its intended purpose, and did not produce unreasonable results.

Interest Rates for Minimum Required Contribution: The March 2024 funding segment rates were utilized as prescribed by IRC Section 430(h) and elected by TFP Nutrition. Below, please find the segment rates after reflection of the segment rate stabilization provisions of IRC Section 430(h)(2)(C)(iv) with regard to provisions provided under Section 9706 of the American Rescue Plan Act of 2021.

Segment	Interest Rate
Segment 1	4.75%
Segment 2	5.12%
Segment 3	5.59%

Effective Interest Rate
5.20%

Segment 1 is applied to benefit payments expected to be made in the first 5 years, segment 2 is applied to benefit payments expected to be made in the next 15 years and segment 3 is applied thereafter.

Interest Rates used to determine Maximum Recommended Contribution: Below, please find the segment rates without reflection of the segment rate stabilization provisions of IRC Section 430(h)(2)(C)(iv). These rates were utilized to determine the low-default risk obligation measurement (“LDRM”) of the accrued benefits as of the Valuation Date.

Segment	Interest Rate
Segment 1	4.64%
Segment 2	5.12%
Segment 3	5.10%

Effective Interest Rate
5.07%

Segment 1 is applied to benefit payments expected to be made in the first 5 years, segment 2 is applied to benefit payments expected to be made in the next 15 years and segment 3 is applied thereafter.

Rate of Compensation Increase: N/A, the Plan is frozen.

Mortality for Healthy Lives: The sex-distinct Amount-Weighted Pri-2012 Mortality Tables for employees and healthy annuitants with mortality improvements projected using IRS 2024 Adjusted Scale MP-2021 on a generational basis.

Retirement Incidence: Employees were assumed to retire at normal retirement age.

Turnover: Rates of turnover are not assumed.

Disability: Rates of disability were not assumed.

Assumptions used to Convert Annuities to Actuarially Equivalent Lump Sum Amounts: In accordance with IRS Regulation 1.430(d)-1(f)(5)(ii)(B), annuities are converted to actuarially equivalent lump sum amounts using the current applicable mortality table under IRC Section 417(e)(3) that would apply to a distribution with an annuity starting date occurring on the valuation date and the underlying valuation interest rates under IRC Section 430(h)(2).

Administrative Expenses: Actual plan expenses, not including investment advisory fees and PBGC premiums paid out of the trust during the previous plan year, plus estimated PBGC premiums expected to be paid during the current plan year rounded to the nearest thousand.

Spouse Assumptions: 100% of participants not currently collecting benefits are assumed to be married, with male spouses assumed to be three years older and female spouses assumed to be three years younger than the participant. This assumption was based on national averages.

Form of Benefit: Upon termination and retirement, all participants are assumed to receive a monthly annuity at their earliest retirement date. Upon death, that participant’s beneficiary is assumed to receive an immediate lump sum.

All assumptions used in determining the low-default risk obligation measurement were consistent with those used in determining the Funding Target Liability, except the interest rates which were disclosed above.

Amortization Methodology: In accordance with ERISA Section 303 (c)(8), TFP Nutrition has reflected the reduction of all shortfall amortization bases and all shortfall amortization charges to \$0 for all periods prior to 2022. In addition, all current and future funding shortfall amortization bases shall be amortized over a period of 15 years.

Actuarial Present Value of Accumulated Plan Benefits (ASC 960)

Interest Rate: 5.75%, based on a review of the Plan's asset allocation, investment policy (as shown in the annual funding notice), and expected returns using recent capital market assumptions published by leading financial organizations.

Mortality: The sex-distinct Amount-Weighted Blue Collar Pri-2012 Mortality Tables for employees, healthy annuitants, and contingent survivors with mortality improvements projected using Scale MP-2021 on a generational basis. This assumption was based on a review of published mortality tables and the demographics and industry of the Plan.

Assumptions used to Convert Annuities to Actuarially Equivalent Lump Sum Amounts: The segment interest rates in the table below. This assumption was selected based on the applicable segment rates under IRC Section 417(e) for the plan year beginning on the valuation date.

Segment	Interest Rate
Segment 1	5.18%
Segment 2	5.41%
Segment 3	5.62%

Segment 1 is applied to benefit payments expected to be made in the first 5 years, segment 2 is applied to benefit payments expected to be made in the next 15 years and segment 3 is applied thereafter.

Mortality Table used to Convert Annuities to Actuarially Equivalent Lump Sum Amounts: The applicable mortality table for the determination of present values under IRC Section 417(e)(3)(B). This table is currently a 50/50 blend of male and female rates from the 2024 sex distinct optional combined mortality tables, as prescribed under IRC Section 430.

Unless specifically mentioned, all remaining assumptions for the Actuarial Present Value of Accumulated Plan Benefits remain the same as described for the Funding Target Liability above.

Plan Provisions

This summary is intended as an outline of plan provisions and does not alter the intent or meaning of the provisions contained in the plan document.

Plan Sponsor: TFP Nutrition
EIN/PN: 75-0604330/001

Employees who are employed on a basis to work 1,000 hours or more per year become eligible to participate in the Plan on the April 1st or October 1st coincident with or next following the attainment of age 20 and six months and have been employed for 1 year or longer.

Effective December 31, 2008, no new employees will become eligible to enter the Plan.

EMPLOYEE CONTRIBUTIONS

Participants are not required to contribute as of October 1, 1981. Contributions will be credited with interest at 120% of the Federal Midterm rate in effect as of the first day of the plan year.

RETIREMENT

- i. Normal Retirement.* Participant's Normal Retirement Date is the first day of the month coinciding with or next following the date a Participant attains the later of age 65 or completes 5 years of plan participation.
- ii. Early Retirement.* A participant who has attained age 55 and has completed 7 years of service may retire and receive an immediate monthly retirement benefit equal to his accrued benefit reduced 1/15th for each of the first 5 years and 1/30th for each of the next 5 years by which early retirement precedes normal retirement.
- ii. Late Retirement.* After Normal Retirement Date.
- iii. Disability Retirement.* Total and permanent disability as determined by Social Security Administration rules.

BENEFIT AT RETIREMENT

- i. *Normal Retirement Benefit.* An annual pension, payable as a 120 months certain and life annuity, equal to:

35% of Average Monthly Compensation, reduced 1/30th for each year of service less than 30 at normal retirement date, plus 21% of average monthly compensation in excess of Social Security covered compensation, reduced 1/35th for each year of service less than 35 at normal retirement age.

Average Monthly Compensation means the highest average of ten consecutive years of Compensation. *Compensation* refers to W-2 compensation including salary reduction amounts not included in the Employee's gross income under Sections 125, 402(a)(8), 402(h), or 403(b).

- ii. *Accrued Benefit.* Normal retirement benefit formula based on compensation and Social Security Covered Compensation at date of determination and years of service projected to normal retirement date, Multiplied by: A ratio equal to years of service at date of determination divided by years of service projected to normal retirement date. The benefit is payable as of the participant's normal retirement date.
- iii. *Late Retirement Benefit.* The greater of the benefit determined in the same manner as the Normal Retirement Benefit including years of service and compensation after Normal Retirement or the actuarial equivalent of the Normal Retirement Benefit.
- iv. *Maximum Benefits.* The maximum retirement benefit is determined in accordance with Section 415 of the Internal Revenue Code and Regulations.

Benefit accruals cease as of December 31, 2008.

NORMAL AND OPTIONAL FORMS OF BENEFIT

A monthly income payable for life with 120 monthly payments guaranteed is the normal form of benefit. A joint and survivor annuity with 50% continued to the Participant's Spouse would be automatically payable to each Participant who is married at retirement, unless the Participant and spouse elect otherwise.

The Qualified Joint and Survivor Annuity (QJS) and other available optional forms are "actuarially equivalent" to the normal form, meaning that the amount of benefit is determined so as to have the same value when computed using the following actuarial assumptions:

Interest – 8.50% per annum

Mortality – 1983 Group Annuity Blended Mortality Table

In the event a lump sum payment is made to a terminated or retired participant in lieu of the accrued benefits, the amount shall be calculated using the Prevailing Commissioner's Mortality Table and the applicable interest rate in effect for the May prior to the plan year in which the distribution occurs. If the determined value of the Participant's accrued benefit is not more than \$5,000, the Trustee will be authorized to pay a lump sum in lieu of a monthly benefit.

If the value of the participant's accrued benefit is more than \$5,000 and less than \$15,000, the participant, with spousal consent if applicable, may elect a lump sum payment. Lump sum payments above \$15,000 may be made upon death or disability.

VESTING

Years of service for vesting are all years of service with the Employer in which the employee was given credit for 1,000 or more hours of service.

<u>Years of Service</u>	<u>Vested %</u>
0-5	0%
5 thereafter	100%

DEATH BENEFITS

The Death Benefit under the Plan payable to a participant's spouse or other designated beneficiary is the actuarial present value of the participant's accrued benefit.
