Assets are valued at market value.

Under the Pension Protection Act of 2006 (PPA), the three different funding rates are the 24 month average segment rates issued by the IRS, based on the applicable corporate bond yield curve for that month containing the valuation date. The Highway and Transportation Funding Act (HATFA) and the American Rescue Plan Act of 2021 (ARPA) modified these rates by applying a corridor around the rates for calculations of the minimum required contribution and the Effective Interest Rate.

ACTUARIAL METHOD

PPA FUNDING METHOD (Active Plans)

Under the PPA Funding method, the current year's Target Normal Cost is calculated as the present value of the benefit that would accrue in that year based on projected salary and expected accruals.

The plan's Funding Target is determined to be the total Present Value of Accrued Benefit based on current service and salary for all participants as of the valuation date. If the value of plan assets exceeds the Funding Target plus Target Normal Cost then no additional funding would be required. If the Funding Target exceeds the value of plan assets less funded balances, the difference will be amortized and funded over fifteen years.
