Retirement Benefits

A Participant's Accrued Benefit is based on a formula equal to 1.2% times Average Annual Compensation up to the Integration Level, plus 1.8% times Average Annual Compensation in excess of the Integration Level, times each Year of Credited Service, up to a maximum of 25 years.

Prior to Normal Retirement Age, a Participant's Accrued Benefit equals the product of the benefit computed under the formula at Normal Retirement Age, multiplied by a fraction, the numerator of which is the number of Years of Credited Service at such time, and the denominator of which is the number of Years of Credited Service the Participant would have at the later of the year containing the Participant's Normal Retirement Age or the current year. The Accrued Benefit is calculated using the Participant's current Average Annual Compensation.

The Integration Level is the Taxable Wage Base in effect at the beginning of the Plan Year.

A Participant earns a Year of Credited Service for any Plan Year in which they work at least 1,000 hours. Years prior to participation are not included.

Average Annual Compensation is the average of whichever three consecutive years of compensation produces the highest average. Only the most recent 10 years are considered. Years in which the participant does not earn a Year of Credited Service are not considered.
