Part III Accountant's Opinion

3 Complete lines 3a through 3c if the opinion of an independent qualified public accountant is attached to this Form 5500. Complete line 3d if an opinion is not attached.

a The attached opinion of an independent qualified public accountant for this plan is (see instructions):

(1) ☒ Unmodified (2) ☐ Qualified (3) ☐ Disclaimer (4) ☐ Adverse

b Check the appropriate box(es) to indicate whether the IQPA performed an ERISA section 103(a)(3)(C) audit. Check both boxes (1) and (2) if the audit was performed pursuant to both 29 CFR 2520.103-8 and 29 CFR 2520.103-12(d). Check box (3) if pursuant to neither.

(1) ☒ DOL Regulation 2520.103-8 (2) ☐ DOL Regulation 2520.103-12(d) (3) ☐ neither DOL Regulation 2520.103-8 nor DOL Regulation 2520.103-12(d).

c Enter the name and EIN of the accountant (or accounting firm) below:

(1) Name: **BDO USA, P.C.**

(2) EIN: **13-5381590**

d The opinion of an independent qualified public accountant is **not attached** as part of Schedule H because:

(1) ☐ This form is filed for a CCT, PSA, DCG or MTIA. (2) ☐ It will be attached to the next Form 5500 pursuant to 29 CFR 2520.104-50.

Part IV Compliance Questions

4 CCTs and PSAs do not complete Part IV. MTIAs, 103-12 IEs, and GIAs do not complete lines 4a, 4e, 4f, 4g, 4h, 4k, 4m, 4n, or 5. 103-12 IEs also do not complete lines 4j and 4l. MTIAs also do not complete line 4l. DCGs do not complete lines 4e, 4f, 4k, 4l, and 5, and DCGs generally complete the rest of Part IV collectively for all plans in the DCG, except as otherwise provided (see instructions).

During the plan year:

	Yes	No	Amount
a Was there a failure to transmit to the plan any participant contributions within the time period described in 29 CFR 2510.3-102? Continue to answer "Yes" for any prior year failures until fully corrected. (See instructions and DOL's Voluntary Fiduciary Correction Program.)		☒	
b Were any loans by the plan or fixed income obligations due the plan in default as of the close of the plan year or classified during the year as uncollectible? Disregard participant loans secured by participant's account balance. (Attach Schedule G (Form 5500) Part I if "Yes" is checked.)		☒	
c Were any leases to which the plan was a party in default or classified during the year as uncollectible? (Attach Schedule G (Form 5500) Part II if "Yes" is checked.)		☒	
d Were there any nonexempt transactions with any party-in-interest? (Do not include transactions reported on line 4a. Attach Schedule G (Form 5500) Part III if "Yes" is checked.)		☒	
e Was this plan covered by a fidelity bond?	☒		25000000
f Did the plan have a loss, whether or not reimbursed by the plan's fidelity bond, that was caused by fraud or dishonesty?		☒	
g Did the plan hold any assets whose current value was neither readily determinable on an established market nor set by an independent third party appraiser?		☒	
h Did the plan receive any noncash contributions whose value was neither readily determinable on an established market nor set by an independent third party appraiser?		☒	
i Did the plan have assets held for investment? (Attach schedule(s) of assets if "Yes" is checked, and see instructions for format requirements.)		☒	
j Were any plan transactions or series of transactions in excess of 5% of the current value of plan assets? (Attach schedule of transactions if "Yes" is checked and see instructions for format requirements.)		☒	
k Were all the plan assets either distributed to participants or beneficiaries, transferred to another plan, or brought under the control of the PBGC?		☒	
l Has the plan failed to provide any benefit when due under the plan?		☒	
m If this is an individual account plan, was there a blackout period? (See instructions and 29 CFR 2520.101-3.)			
n If 4m was answered "Yes," check the "Yes" box if you either provided the required notice or one of the exceptions to providing the notice applied under 29 CFR 2520.101-3.			

5a Has a resolution to terminate the plan been adopted during the plan year or any prior plan year?..... ☐ Yes ☒ No
If "Yes," enter the amount of any plan assets that reverted to the employer this year _____.

5b If, during this plan year, any assets or liabilities were transferred from this plan to another plan(s), identify the plan(s) to which assets or liabilities were transferred. (See instructions.)

5b(1) Name of plan(s)	5b(2) EIN(s)	5b(3) PN(s)

5c Was the plan a defined benefit plan covered under the PBGC insurance program at any time during this plan year? (See ERISA section 4021 and instructions.) ☒ Yes ☐ No ☐ Not determined

Independent Auditor's Report

To the Plan Administrator
Northwest Airlines Pension Plan for Pilot Employees
Atlanta, Georgia

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of Northwest Airlines Pension Plan for Pilot Employees (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C). The financial statements comprise the statements of net assets available for benefits as of September 30, 2025 and 2024 and accumulated plan benefits as of September 30, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years ended September 30, 2025 and 2024 and changes in accumulated plan benefits for the year ended September 30, 2024, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA (ERISA Section 103(a)(3)(C) audit). As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency (qualified institution), provided that the investment information is prepared and certified to by the qualified institution in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Management has obtained certifications from a qualified institution as of and for the years ended September 30, 2025 and 2024, stating that the certified investment information, as described in Note 10 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and the procedures performed as described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (GAAP); and
- the certified investment information in the accompanying financial statements agrees to, or is derived from, in all material respects, the information prepared and certified by a qualified institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Management is responsible for maintaining a current plan instrument, including all plan amendments. Management is also responsible for administering the Plan and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the *Scope and Nature of the ERISA Section 103(a)(3)(C) Audit* section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certifications, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of GAAP.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with GAAP.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

NORTHWEST AIRLINES PENSION PLAN FOR PILOT EMPLOYEES

NOTES TO FINANCIAL STATEMENTS

1. DESCRIPTION AND ADMINISTRATION OF THE PLAN

The following description of the Northwest Airlines Pension Plan for Pilot Employees (the "Plan") provides general information only. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General - The Plan is a non-contributory defined benefit plan established by Northwest Airlines, Inc. ("Northwest") and is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"), as amended.

On December 31, 2009, Northwest merged with and into Delta Air Lines, Inc. ("Delta", "Plan Sponsor" or the "Company"), ending its existence as a separate entity. Employees of Northwest became employees of Delta on January 1, 2010, and Delta became the Plan Sponsor.

The Plan provides pension and death benefits and covers all pilot employees that were participants in the Plan prior to February 1, 2006. The Plan was amended to freeze participation and all benefit accruals effective January 31, 2006.

Administration - The operation and administration of the Plan (except for investment management and control of assets) are vested in the Administrative Committee of the Company (the "Plan Administrator"). The Benefit Funds Investment Committee ("BFIC") is responsible for investment management and control of the assets of the Plan. The BFIC has appointed outside investment managers to manage the assets of the Plan and JP Morgan Chase Bank, N.A. (the "Trustee") serves as the Trustee. The Plan participates in the Delta Master Trust ("Master Trust").

Employer Contributions - Northwest elected the alternative funding schedule under Section 402(a)(1) of the Pension Protection Act of 2006 ("PPA") for the Plan ("Funding Relief"), effective April 1, 2007. The Funding Relief expired effective for plan years beginning after September 30, 2023. Funding is now governed by the general provisions of Internal Revenue Code Section 430. The Company's funding policy is to contribute to the Plan amounts determined by the Plan's actuary necessary to meet the minimum funding requirements of ERISA. The Company met minimum funding requirements as of September 30, 2025 and 2024.

Benefits - Benefits for retired or terminated employees or their survivors are based on 60% of the employees' highest 60 calendar months of earnings during the last 120 calendar months multiplied by a benefit service fraction.

Vesting - A participant became fully vested in the Plan after completing five years of vesting service.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The accompanying financial statements have been prepared on the accrual basis of accounting.

Use of Estimates - The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Investment Valuation and Income Recognition - Investments are reported at fair value. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation/(depreciation) includes gains and losses on investments bought and sold in addition to held during the year. For further information regarding investments of the Master Trust, see Notes 3, 4 and 5.

Payment of Benefits - Benefits are recorded when paid.

Recent Legislative Developments - In December 2019, Congress passed the SECURE Act which included numerous reforms to existing retirement law and allows or requires plan sponsors to make certain immediate plan operational changes without formal amendment of the plan document. Plan documents are required to be formally amended by December 31, 2026.

In March 2020, Congress passed the CARES Act which included optional immediate changes to distribution without formal amendment of the plan document. If adopted, plan documents are required to be formally amended by December 31, 2026.

In December 2022, Congress passed the SECURE 2.0 Act of 2022, which also contained numerous reforms to existing retirement law, including some mandatory and some optional provisions. Plan documents are required to be formally amended for these changes by December 31, 2026.

The Plan Sponsor operationally implemented various changes and will be amending the Plan for these changes.

Subsequent Events - The Company has evaluated all events through June 25, 2026, which is the date these financial statements were available to be issued.

All subsequent events, if any, requiring recognition as of September 30, 2025, have been incorporated into these financial statements.

Plan Expenses - Investment management and Trustee fees are paid directly from the Master Trust to the investment managers and the Trustee. These expenses are allocated to the participating plans based on the prior month's units for each plan and are included in the calculation of net investment income from the Master Trust in the accompanying statements of changes in net assets available for benefits.

Brokerage fees paid by the Master Trust are added to the acquisition costs of the assets purchased and are subtracted from the proceeds of assets sold.

Other administrative fees, including Pension Benefit Guaranty Corporation ("PBGC") premiums, are paid by the Plan to the extent not paid by the Company or through the Master Trust and are separately identified in the accompanying Statement of Changes in Net Assets Available for Benefits.

3. INVESTMENTS

Accounting Standards Codification ("ASC") 820, Fair Value Measurement and Disclosures, provides for a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities ("Level 1") and the lowest priority to unobservable inputs ("Level 3"). The three levels of the fair value hierarchy under FASB ASC No. 820 are:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets.
- Quoted prices for identical or similar assets or liabilities in inactive markets.
- Inputs other than quoted prices that are observable for the asset or liability.
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following tables set forth by level, within the fair value hierarchy, the Master Trust's fair value measurements as of September 30, 2025 and 2024 (in thousands):

* In accordance with Subtopic 820-10, certain investments that were measured at NAV per share (or its equivalent) have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the line items presented in the statements of net assets available for benefits.

The following is a description of the valuation methodologies used for assets and liabilities measured at fair value. There have been no changes in the methodologies used at September 30, 2025 and 2024.

- Equity and Equity-Related Instruments include common stock, equity-related instruments, and over the counter securities including futures and swaps. Common stock, which includes Delta stock, is valued at the closing price reported on the active market on which the individual securities are traded. Equity-related instruments include investments in securities traded on exchanges, including listed futures and options, which are valued at the last reported sale prices on the last business day of the year or, if not available, the last reported bid prices. Over-the-counter securities are valued at the bid prices or the average of the bid and ask prices on the last business day of the year from published sources or, if not available, from other sources considered reliable, generally broker quotes.
- Fixed Income and Fixed Income-Related Instruments include corporate bonds, government bonds, collateralized mortgage obligations and other asset-backed securities, and are generally valued at the bid price or the average of the bid and ask price. Prices are based on pricing models, quoted prices of securities with similar characteristics or broker quotes. Fixed income-related instruments include investments in securities traded on exchanges, including listed futures and options, which are valued at the last reported sale prices on the last business day of the year, or if not available, the last reported bid prices. Over-the-counter securities are valued at the bid prices or the average of the bid and ask prices on the last business day of the year from published sources or, if not available, from other sources considered reliable, generally broker quotes.
- Cash Equivalents primarily consist of high-quality, short-term obligations that are a part of institutional money market mutual funds that are valued using current market quotations or an appropriate substitute that reflects current market conditions.
- Real Assets include commodities such as precious metals and precious metals-related instruments, some of which are valued at the closing price reported on the active market on which the individual instruments are traded, while others are priced based on pricing models, quoted prices of securities with similar characteristics or broker quotes.

(1) The objective of Hedge Funds is to provide risk diversification by generating income and capital appreciation in a generally equity-market-neutral manner.

(2) The objective of Commingled Funds is to generate excess return over the equity benchmarks while the objective of Private Equity and Private Equity-Related Instruments is to earn higher returns than public equity markets over the long-term by benefiting from the illiquidity premium.

(3) The objective of Fixed Income and Fixed Income-Related Instruments is to earn higher returns than public fixed income markets over the long-term by benefiting from the illiquidity premium.

(4) The objective of Real Assets is to earn higher returns than public real estate and infrastructure markets over the long-term by benefiting from the illiquidity premium.

(5) The objective of Other is to allocate capital across equities, nominal and inflation-linked government bonds, investment grade and high yield corporate bonds, commodities, and/or currencies in such a way that contributions to the total portfolio risk from the asset classes are approximately equivalent.

The following is a description of the valuation methodologies used for assets and liabilities measured at NAV as a practical expedient. There have been no changes in the methodologies used at September 30, 2025 and 2024.

- Hedge Fund and Hedge-Fund Related Strategies are primarily made through shares of limited partnerships or similar structures for which a liquid secondary market does not exist. Hedge Funds are typically valued monthly by third-party administrators that have been appointed by the funds' general partners.

- Commingled Funds, Private Equity and Private Equity-Related Instruments include commingled funds invested in common stock, as well as private equity and private equity-related instruments. Commingled funds are valued based on quoted market prices of the underlying assets owned by the fund. Private equity and private equity-related instruments are typically valued quarterly by the fund managers using valuation models where one or more of the significant inputs into the model cannot be observed and which require the development of assumptions. Certain of these investments are considered illiquid and are meant to be held for the life of the funds. Distributions are received periodically as the underlying illiquid investments reach profitability and are monetized. If necessary, liquidity can be generated earlier through a sale of a fund in a secondary market, usually at a discount to NAV.
- Fixed Income and Fixed Income-Related Instruments include private fixed income instruments that are typically valued monthly or quarterly by the fund managers or third-party valuation agents using valuation models where one or more of significant inputs into the model cannot be observed and which require the development of assumptions. Certain of these investments are considered illiquid and are meant to be held for the life of the funds. Distributions are received periodically as the underlying illiquid investments reach profitability and are monetized. If necessary, liquidity can be generated earlier through a sale of a fund in a secondary market, usually at a discount to NAV.
- Real Assets includes real estate, energy, timberland, agriculture and infrastructure. The valuation of real assets requires significant judgment due to the absence of quoted market prices as well as the inherent lack of liquidity and the long-term nature of these assets. Real assets are typically valued quarterly by the fund managers using valuation models where one or more of the significant inputs into the model cannot be observed and which require the development of assumptions. All of these investments are considered illiquid and are meant to be held for the life of the funds. Distributions are received periodically as the underlying illiquid investments reach profitability and are monetized. If necessary, liquidity can be generated earlier through a sale of a fund in a secondary market, usually at a discount to NAV.
- Other primarily includes globally-diversified, risk-managed commingled funds consisting mainly of equity, fixed income, and commodity exposures.

The preceding methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Management evaluates the significance of transfers between levels based upon the nature of the financial instruments and size of the transfer relative to total net assets available for benefits. For the years ended September 30, 2025 and 2024, there were no significant transfers into or out of Levels 1, 2, or 3.

4. DERIVATIVE INSTRUMENTS

Derivatives in the Master Trust are primarily used to manage risk and gain asset class exposure while still maintaining liquidity. The derivatives consist primarily of futures, total return swaps, repurchase agreements, and options. Changes in the fair value (i.e. gains or losses) of the derivatives are recorded in the Net Investment Income from Delta Master Trust in the accompanying Statement of Changes in Net Assets Available for Benefits.

The following are the estimated fair value of derivative instruments at September 30, 2025 and 2024 shown at the gross amounts (in thousands):

	September 30, 2025		September 30, 2024	
	Gross Assets	Gross Liabilities	Gross Assets	Gross Liabilities
Interest Rate Swaps	\$ 139,212	\$ (27,302)	\$ 118,065	\$ (23,166)
Repurchase Agreements	—	(2,036,796)	122,880	(2,532,156)
Options	49,408	(9)	106,154	(41)
Futures Contracts	3,322	(3,334)	44,765	(11,544)
Total Investments at Fair Value	\$ 191,942	\$ (2,067,441)	\$ 391,864	\$ (2,566,907)

The notional amounts represent a measure of the Master Trust's involvement in such instruments but amounts are not indicative of potential loss. The following table presents the notional amounts of derivative instruments at September 30, 2025 and 2024 (in thousands):

	September 30, 2025	September 30, 2024
Interest Rate Swaps	\$ 6,022,194	\$ 7,152,705
Repurchase Agreements	2,072,653	2,409,276

Futures Contracts	2,129,883	71,657
Total Investments at Notional Value	\$ 10,274,187	\$ 9,739,738

For the years ended September 30, 2025 and 2024, the amount of gain or loss recognized as Master Trust investment income in the Statement of Changes in Net Assets Available for Benefits attributable to derivative instruments as follows (in thousands):

	September 30, 2025	September 30, 2024
Interest Rate Swaps	\$ 36,274	\$ 614,831
Options	(77,656)	(1,970)
Futures Contracts	174,180	(3,420)
Total Gain	\$ 132,798	\$ 609,441

5. INTEREST IN MASTER TRUST

Investment Valuation, Investment Income, and Income Recognition - The Plan's investments are units of participation in the Master Trust and are commingled with the investments of four other defined benefit pension plans sponsored by the Company. At September 30, 2025 and 2024, the Plan's share of the Master Trust's net assets was approximately 27.6% and 28.1%, respectively. Investment gains and expenses are allocated to the Plan based upon its pro rata share in the net assets of the Master Trust.

The BFIC has adopted and implemented investment policies for the plans held in the Master Trust that incorporate strategic asset allocation mixes intended to best meet each Plans' long-term obligations. This asset allocation policy mix utilizes a diversified mix of investments and is reviewed periodically. The overall asset mix of the portfolios is more heavily weighted in equity-like investments. Active management strategies are utilized, where feasible, in an effort to realize investment returns in excess of market indices.

The following table presents the net assets of the Master Trust and the Plan's Interest in the Master Trust as of September 30, 2025 and 2024 (in thousands):

	September 30, 2025		September 30, 2024

6. COMMITMENTS

As discussed in Note 3, the Master Trust invests in certain alternative investments valued at NAV for which no quoted market prices exist. In connection with these investments, the Master Trust had future capital commitments totaling approximately \$2.5 billion and \$2.3 billion related to partnership investments as of September 30, 2025 and 2024, respectively.

7. ACCUMULATED PLAN BENEFITS AND ACTUARIAL MATTERS

Company contributions to the Plan and the present value of accumulated plan benefits are determined by the Plan's actuary, Willis Towers Watson. The actuarial cost method used in determining the Company's contribution is the projected unit credit cost method for airline funding contribution purposes.

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during their years of participation in the Plan through the valuation date. Benefits payable under all circumstances—retirement, death, and termination of employment—are included, to the extent they are deemed attributable to employee service rendered to the valuation date. The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is that amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of September 30, 2024 and 2023 were:

	2024	2023
Discount Rates	7.00%	7.00%
	2024	2023
Retirement Rates:		
Active	0.5% at age 50 to 100% at age 65	0.5% at age 50 to 100% at age 65
Disability Rates:		
Male	0.45% at age 30 to 4.42% at age 60	0.45% at age 30 to 4.42% at age 60
Female	1.88% at age 30 to 5.96% at age 60	1.88% at age 30 to 5.96% at age 60
	Mortality Tables	
2024 & 2023	Healthy & Disabled - Pri-2012 mortality table without collar or quartile adjustments, with separate rates for non-annuitants and annuitants, and contingent survivors are projected generationally from 2012 using MP-2020 projection scale, converging to a long-term mortality improvement of 0.75%. Initial improvement rate of 0.75% declining from age 85 to 0% at age 115.	

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of October 1. Had the valuations been performed as of September 30 there would be no material differences.

8. TAX STATUS

The Plan received a letter of determination from the Internal Revenue Service ("IRS") dated September 29, 2014, which stated that the Plan, as amended and restated is qualified under the appropriate sections of the Internal Revenue Code of 1986, as amended (the "Code"), and therefore the trust established under the Plan is tax-exempt. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Plan Administrator believes the Plan, as amended, is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan is qualified and the related trust is tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

U.S. GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions. however, there are currently no audits for any tax periods in progress.

On September 21, 2023, the IRS imposed a lien on the assets of the plan's trust in the amount of \$5.3 million with respect to alleged unpaid Unrelated Business Taxable Income owed by the trust for the 2020, 2021, and 2022 fiscal years. The lien was released on March 20, 2024.

9. PLAN TERMINATION

In the event that the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- Annuity benefits that former employees or their beneficiaries have been receiving for at least three years or annuity benefits that employees eligible to retire for that three-year period would have been receiving had they begun to receive benefit payments three years prior to the date of the Plan termination. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding plan termination.
- Other vested benefits insured by the PBGC, a U.S. governmental agency, up to the applicable limitations discussed below.
- All other vested benefits (vested benefits not insured by the PBGC).
- All nonvested benefits.

The PBGC insures certain benefits under the Plan if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination; however, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

10. INFORMATION CERTIFIED BY THE PLAN'S TRUSTEE

The plan administrator has elected the method of annual reporting compliance permitted by ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, JP Morgan Chase Bank N.A, a qualified institution, has certified that the following investment information included in the accompanying financial statements are complete and accurate:

- Interest in the Delta Master Trust as shown in the statements of net assets available for benefits as of September 30, 2025 and 2024, except for approximately \$3.3 billion and \$3.3 billion of alternative investments as of September 30, 2025 and 2024, respectively.
- Net Investment Income from Delta Master Trust as shown in the statements of changes in net assets available for benefits for the years ended September 30, 2025 and 2024, except from income (loss) from alternative investments.

At the request of the Plan Administrator, the Plan's independent auditors did not perform auditing procedures with respect to this certified investment information, except for comparing the certified investment information with the related information presented and disclosed in the financial statements, reading the disclosures relating to the investment information to assess whether they are in accordance with

the presentation and disclosure requirements of U.S. GAAP and Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

11. RELATED PARTY AND PARTY-IN-INTEREST TRANSACTIONS

The Plan invests in a JP Morgan money market fund, managed by JP Morgan Chase Bank, N.A. JP Morgan Chase Bank, N.A. is the Trustee as defined by the Plan and, therefore, these transactions qualify as exempt party-in-interest transactions.

The Master Trust invests in Delta common stock. This investment and transactions in this investment qualify as related party and party-in-interest transactions which are exempt from the prohibited transactions rules of ERISA and related party transactions under U.S. GAAP. The Master Trust's investment in Delta stock is managed by an independent fiduciary. As of September 30, 2025 and 2024, the Master Trust investment in Delta stock was approximately \$523 million and \$530 million, respectively.

As described in Note 2, the Plan and Master Trust paid certain expenses related to plan operations and investment activity to various service providers of the Plan. These transactions are exempt party-in-interest transactions under ERISA.

12. RISKS, CONCENTRATIONS AND UNCERTAINTIES

The Master Trust utilizes various investment securities including hedge funds, cash equivalents, commingled funds, private equities and private equity-related instruments, fixed income and fixed income-related instruments, real assets, and other investments (Notes 3 and 5). Investment securities, in general, are exposed to various risks such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the financial statements.

As of September 30, 2025, the Master Trust held two investment securities with concentrations above 5% of total investments. These investments are PAE Limited (40% of total investments) and DALPP, LP Series A (2) (6% of total investments). As of September 30, 2024, the Master Trust held two investment securities with concentrations above 5% of total investments. These investments are PAE Limited (39% of total investments) and DALPP, LP Series A (2) (7% of total investments).

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

The Plan invests in securities with contractual cash flows, such as futures contracts, forward contracts, credit default swaps, interest rate swaps and options. The value, liquidity, and related income of these securities are sensitive to changes in economic conditions, delinquencies, and/or defaults, and may be adversely affected by a shift in the market's perception of the issuers and changes in interest rates.

• Third segment rate	5.59%	5.26%
• Effective interest rate	5.30%	5.23%

Plan-related expenses

\$5,454,369. This amount was determined as the sum of expected non-PBGC premium plan-related expenses plus the estimated PBGC premiums to be paid during the valuation year.

As permitted by law, rates reflecting stabilization are used to determine the funding target, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP and PBGC §4010 FS.

Form of payment 95% of married participants are assumed to elect 50% Joint and Survivor annuity and 5% are assumed to elect a single life annuity; single life annuity assumed for unmarried participants.

Percent married 85% of males; 50% of females

Spouse age Wife three years younger than husband

At-risk assumptions for Schedule SB For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit, which is the same as the current form of payment assumption.

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month

Methods

Valuation date First day of plan year

Funding target Present value of accrued benefits as required by regulations under IRC §430.

SCHEDULE SB ATTACHMENTS

Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Decrement timing	The assumptions used are collectively called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year). The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Funding policy	The Company's funding policy is to contribute an amount equal to the minimum required contribution. The Company considers each year whether to contribute additional amounts.

Benefits not Valued

All benefits described in the Plan Provisions section of this report were valued. WTW has reviewed the plan provisions with Delta Air Lines, Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor furnished participant data as of October 1, 2024. Information on assets, contributions, and plan provisions was supplied by the plan sponsor. Data and other information was reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

The following assumptions were made when data was not available:

- Benefit amounts for deferred participants are carried from prior years.
- Active or deferred participants received with a death date are valued as deferred beneficiaries until Delta/Conduent has confirmed there is no surviving spouse benefit due.
- Participants receiving payment who are missing from data files are carried forward for one year before being removed from the valuation.
- Missing benefit amounts are assumed to be equal to prior years' benefits if available, otherwise they are assumed to equal the average benefit amount of participants with the same status.
- Refer to the Data Process Document reviewed with the plan sponsor on October 30, 2018, Data Process for Deceased Participants Document provided on January 5, 2024, and the Data Assumptions Summary provided on December 12, 2024 for additional assumptions utilized in the valuation.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale – Significant Economic and Demographic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Healthy and Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).

Additionally, a separate memo delivered on January 23, 2025 serves as documentation of the rationale for other significant valuation assumptions and the models utilized in the valuation, in accordance with our understanding of Actuarial Standards of Practice (ASOP) Nos. 4, 6, 27, 35, and 56. All assumptions were selected based on information known at the measurement date and on the premises that the plan will continue and that no events will occur in 2024 or 2025 that would cause a remeasurement that may cause Delta Air Lines, Inc. to select different assumptions.

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A.1 of the 2024 plan year funding valuation report issued in October 2025, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.
-----------------	--

Changes in Methods and Assumptions

Changes in assumptions since prior valuation	- The segment interest rates used to calculate the funding target were updated from an applicable month of June 2023 to June 2024. - The mortality tables used to calculate the funding target and target normal cost were updated to reflect the latest base tables and mortality improvement scales, as required by guidance issued by IRS under IRC §430.
Changes in methods since prior valuation	None

Schedule SB, Part V Summary of Plan Provisions

Plan Provisions

The plan was amended and restated effective January 1, 2014.

Covered Employees	All pilot employees who were hired before January 31, 2006.
Participation Date	One year of eligibility service after becoming a covered employee, with participation frozen at January 31, 2006.

Definitions

Vesting service	One year for each calendar year of employment in which employee has at least six months of service.
Benefit accrual service	Years and months of service in recognized employment (including service before January 1, 1990, with Republic Airlines, Inc.), with service frozen at January 31, 2006.
Month of service	One month of service is credited for each month in which at least one hour of service was credited.
Pensionable pay	W-2 earnings with certain exclusions plus 401(k) and Section 125 deferrals, with pay frozen at January 31, 2006.
Final average earnings	The average of the highest sixty calendar months of pensionable pay during the 120-month period ending on the earlier of the participant's termination date, retirement date or January 31, 2006. This average includes pre-concession earnings for the period August 1, 1993, to July 31, 1996.
Service fraction	Benefit accrual service divided by the larger of 25 years or benefit accrual service projected to NRD. The service fraction may not be greater than one.
Normal retirement date (NRD)	Last day of calendar month in which participant attains age 60.
Eligible family member	Spouse or dependent children until age 19 (age 23, if student).

Monthly pension benefit	As of any date, the larger of [(a)–(b)–(c)] or the participant's contributions made before August 7, 1975, with interest, where: (a) 60% of final average earnings multiplied by the service fraction. Final average earnings and benefit accrual service were frozen at January 31, 2006. (b) Actuarial equivalent of Republic Airlines monthly benefit, excluding any add-ons and roll-ups. (c) Actuarial equivalent of any other monthly benefit earned as a pilot under other pension plans of the employer.
Monthly preretirement spouse benefit	50% of the monthly pension benefit as of the date of death, reduced for payment before age 60, and reduced, if applicable, for the 50% joint and survivor election.
Disability benefit prior to NRD	If eligible for Social Security disability, monthly disabled retirement benefit equals 50% of final average earnings for highest 12 months out of last 60 multiplied by the fraction of benefit accrual service projected to NRD divided by 25, but not greater than one, minus 50% of workers compensation benefit, minus the actuarial equivalent of any other monthly benefit earned as a pilot under other pension plans of the employer. If not eligible for Social Security disability, the first five years are paid as above for a participant eligible for Social Security disability. For the sixth year to NRD, the preceding amount multiplied by a percentage that varies by age and service from 100 percent to zero. Special provisions apply to certain participants in the Republic DC plan for pilots, such that the percentage is always 100%.
Disability after NRD	60% of final average earnings multiplied by the service fraction (adjusted to include period of disability to age 60), minus the actuarial equivalent of any other monthly benefit earned as a pilot under other pension plans of the employer.

Eligibility for Benefits

Normal retirement	Retirement on NRD.
Early retirement	Retirement before NRD and on or after both attaining age 50 and completing ten years of vesting service.
Postponed retirement	Retirement after NRD.
Disability retirement	Termination due to total and permanent disability after participation date, if on sick leave rolls as of December 15, 2005, without subsequent return to active employment.
Deferred vested	Termination for reasons other than death, disability, or retirement after completing five years of vesting service.
Preretirement spouse benefit	Death while eligible for normal, early, postponed, or deferred vested retirement benefits, with a surviving spouse.

Family member benefit	Death while active after participation date or disabled and prior to age 60, provided at least one qualifying family member is living, if death prior to January 31, 2006.
-----------------------	--

Benefits Paid Upon the Following Events

Normal retirement	Monthly pension benefit determined as of NRD.
Early retirement	Monthly pension benefit determined as of early retirement date, reduced as follows: If vesting service greater than or equal to 25 years, 3.0% per year from age 60. If vesting service less than 25 years, 7.0% per year from age 60 to age 55, and 4.0% per year to age 50. For purposes of calculating the monthly pension benefit as of the early retirement date, the service fraction denominator is always 25 years.
Disability retirement	Monthly disability benefit determined at disability. Otherwise, benefits are the same as termination with deferred vested benefit.
Termination with deferred vested benefit	Monthly pension benefit determined as of termination date, reduced 7.0% for each year of payment before the participant's NRD to age 55, then 4.0% for each year to age 50.
Death with preretirement spouse benefit	Monthly preretirement spouse benefit is payable. In-service death is company-paid; death after termination is paid by employee's beneficiary through actuarial reduction of benefit.
Death with family member benefit	If death before age 50 and there is only one eligible dependent, monthly dependent family benefit is equal to 25% of final average earnings; otherwise, the monthly benefit is equal to 30% of final average earnings. The monthly family member benefit is reduced by any benefits payable as a preretirement spouse benefit (ignoring any offsets for predecessor plans). This benefit applies to deaths prior to January 31, 2006.

Other Plan Provisions

Forms of payment	Preretirement spouse and family member benefits are payable only as described above. Monthly pension benefits are paid as described above, if the participant has no spouse as of the date payments begin, or if the participant so elects. Otherwise, benefits are paid in the form of 50% qualified joint and survivor annuity option or, if the participant elects and the spouse consents, another actuarially equivalent optional form offered by the plan. Optional forms are a 50%, 75% or 100% joint and survivor annuity, a 50% or 67% joint and contingent annuity, a certain and life annuity (up to a ten-year certain period), or (for married participants) a life annuity.
