Retirement Plan of Rome Savings Bank

Actuarial Valuation at 10/1/2024 for Plan Year 10/1/2024 to 9/30/2025

2024 Form 5500 Schedule SB, Part V - Statement of Actuarial Assumptions/Methods (EIN: 04-3312097/PN: 008)

Actuarial Cost Method

Liabilities shown in this report are computed in accordance with the Pension Protection Act of 2006 and subsequent guidance issued by the Internal Revenue Service. The target normal cost is the present value of all benefits that have accrued or have been earned (or that are expected to accrue or to be earned) under the plan during the plan year. The funding target of the plan for the plan year is the present value of all benefits that have been accrued or earned under the plan as of the first day of the plan year.

The benefits taken into account in determining the funding target and target normal cost are all benefits earned or accrued under the plan, including retirement-type and ancillary benefits. The determination of the funding target and target normal cost is based on plan provisions that are adopted no later than the valuation date for the plan year and that become effective during that plan year.

Asset Valuation Method

Two-year smoothed value of plan assets determined in accordance with IRS Notice 2009-22.

Actuarial Assumptions

The actuarial assumptions summarized below are either prescribed by law, or when not prescribed by law, selected by the plan's actuary as the best predictor of future experience, based on all available prior experience and future expectations. For any assumption not prescribed by law or selected by the plan's actuary, the individual or organization selecting such assumption is identified separately, and the report will note if the actuary has any disagreement with the appropriateness of the assumption.
