INDEPENDENT AUDITORS' REPORT

To the Board of Trustees
Arizona Operating Engineers Pension Trust Fund

Opinion

We have audited the accompanying financial statements of Arizona Operating Engineers Pension Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2025 and 2024, the related statements of changes in net assets available for benefits for the years then ended, the statement of accumulated plan benefits as of December 31, 2024, the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of Arizona Operating Engineers Pension Plan as of December 31, 2025 and 2024, and the changes in its net assets available for benefits for the years then ended, and the accumulated plan benefits as of December 31, 2024, and the changes in its accumulated plan benefits for the year then ended, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Arizona Operating Engineers Pension Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Arizona Operating Engineers Pension Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments; administering the plan; and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Arizona Operating Engineers Pension Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Arizona Operating Engineers Pension Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedules Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of Schedule of Assets (Held at End of Year) as of December 31, 2025 and Schedule of Reportable Transactions for the year ended December 31, 2025, are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with generally accepted auditing standards.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, is presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

ARIZONA OPERATING ENGINEERS PENSION PLAN
Notes to Financial Statements
For the Years Ended December 31, 2025 and 2024

NOTE A – DESCRIPTION OF PLAN

The following description of the Arizona Operating Engineers Pension Plan (Plan) provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General – The Plan is a multiemployer defined benefit pension plan that was established in 1963, pursuant to a collective bargaining agreement (CBA) between the members of the Arizona Chapter of the Associated General Contractors and the International Union of Operating Engineers, Local Union No. 425 (Union). Effective July 22, 2024, the International Union of Operating Engineers, Local Union No. 428 (Local 428) merged into the International Union of Operating Engineers, Local Union No. 12 (Local 12). On March 13, 2025, the trust and plan agreements were amended to reflect this change as of July 22, 2024. Effective June 12, 2025, the plan was amended to change its name from Defined Benefit Plan for Operating Engineers Local 428 Pension Trust Fund to Arizona Operating Engineers Pension Plan and the trust was amended to change its name from Operating Engineers Local 428 Pension Trust Fund to Arizona Operating Engineers Pension Trust Fund. The trust agreement provides, among other things, for employers of participants to make contributions to the Plan for each hour worked by covered participants. The employee can be a union member, but union membership is not required for participation. The Plan provides benefits for eligible participants and their beneficiaries and is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Effective January 1, 1985, the Board of Trustees of the Plan acted to freeze all accrual of future benefits and subsequently determined that the Plan was terminated by mass withdrawal as of that date. A defined contribution plan (individual account annuity trust fund) was established for all active participants, with all subsequent employer contributions made to the annuity trust fund.

Administration of the Plan is the responsibility of the Board of Trustees (Trustees) and is governed by a joint board consisting of equal representation from the participating employers and the Union.

Pension benefits – The Plan provides retirement benefits for eligible members as specified therein. Vested rights are provided for participants who have accumulated at least ten years of vesting service or five years of vesting service including one hour after January 1, 1999. A member receives one pension credit for any calendar year in which he works 1,200 hours or more. Pension credits are also granted for quarters of a year in proportion to the annual hours worked. After January 1, 1974, a participant can accumulate up to 1.25 pension credits for 1,500 hours or more.

The pension benefit amount is computed at \$18.08 for each pension credit accumulated prior to January 1, 1963, \$22.29 for each pension credit accumulated on and after January 1, 1963 but prior to January 1, 1978, and \$23.50 for each pension credit accumulated after January 1, 1978 but prior to January 1, 1985 for a maximum of 25 years of pension credit. The normal retirement age is sixty-two (62), with early retirement at age fifty-five (55). Early retirement pensions are reduced by 1/4 of 1% for each month that the retiring employee is younger than age sixty-two (62), but not younger than age sixty (60), and 1/2 of 1% for each month the retiring employee is younger than age sixty (60).

ARIZONA OPERATING ENGINEERS PENSION PLAN
Notes to Financial Statements
For the Years Ended December 31, 2025 and 2024

NOTE A – DESCRIPTION OF PLAN – continued

Disability benefits – A participant may receive disability benefits if they become totally disabled prior to attaining age sixty-two (62) and have earned at least ten (10) years of pension credit with at least two (2) quarters earned after January 1, 1963 and have been awarded a social security disability benefit under Title II of the Social Security Act. The pension benefit amount is computed in the same manner as a regular pension, regardless of the age of the Participant, with benefits beginning on the first day of the sixth month following the month of disablement.

Retirement death benefits – If a retired pensioner dies before receiving a total of 36 monthly pension payments from the Plan, his/her monthly pension payments will continue until a total of 36 payments have been paid to the pensioner and his beneficiary. This benefit is not provided if the husband-and-wife or joint and survivor optional forms of pensions have been selected.

Pre-retirement death benefits – If a married participant dies while eligible for a regular or early retirement pension, the surviving spouse has the election to receive either (a) a life-time benefit equal to 50% of the amount the participant would have received if he had retired on the day of his death, with a husband-and-wife option in effect, or (b) a lump-sum payment equal to the actuarial present value of the husband-and-wife pension.

Pro-rata pension benefits – A participant may be eligible for a pro-rata pension by combining credits earned under more than one pension plan. Eligibility for a pro-rata pension is based upon the Pension Reciprocal Agreement sponsored by the International Union of Operating Engineers' and individual agreements with various other pensions' plans.

Husband-and-wife pension – For married participants, retirement benefits are paid in the form of a 50% joint-and-survivor annuity, unless this form is rejected by both the participant and his spouse.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following are the significant accounting policies followed by the Plan.

Basis of accounting – The accompanying financial statements are prepared on the accrual basis of accounting.

The Plan maintains its financial records using the modified cash basis of accounting, under which additions and deductions to net assets available for benefits are recognized when measurable and available to financial expenditures of the current period. Expenditures are generally recorded when the liability is paid. Adjustments are prepared at each year end to adjust the financial records to the accrual method of accounting.

Use of estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (US GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

ARIZONA OPERATING ENGINEERS PENSION PLAN
Notes to Financial Statements
For the Years Ended December 31, 2025 and 2024

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

Investment valuation and income recognition – Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note E for discussion of fair value measurements. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) in fair value of investments includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of benefits – Benefit payments to participants are recorded upon distribution.

Administrative expenses – Expenses incurred in connection with the general administration of the Plan are recorded as deductions in the accompany statements of changes in net assets available for benefits. The Plan shares certain administrative expenses with a related health and welfare plan, vacation plan, apprenticeship plan, and a defined contribution retirement plan. In computing these allocated costs, various factors were considered, including the net assets of each plan in relation to the other plan (See Note H).

Subsequent events – Plan management has evaluated subsequent events through June 11, 2026, the date the financial statements were available to be issued.

NOTE C – ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to service participants have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or inactive participants or their beneficiaries, (b) beneficiaries of participants who have died and (c) present participants or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability and inactive participants – are included, to the extent they are deemed attributable to participant service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary from the Segal Company, Inc. and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation as of December 31, 2024 were (a) life expectancy of participants (Rates published by the PBGC for December 31, 2024 under ERISA Section 4044 for healthy and disabled lives), (b) retirement age assumption (age 55, which is the earliest age per ERISA Section 4281.12(b)), and (c) investment return (PBGC interest rates as of December 31, 2024). During the year ended December 31, 2024 the actuary changed the discount rate methodology and updated the mortality rates. The effect of these changes decreased the actuarial present value of accumulated plan benefits by \$1,766,508 and they are included in the statements of accumulated plan benefits and changes in accumulated plan benefits.

ARIZONA OPERATING ENGINEERS PENSION PLAN
Notes to Financial Statements
For the Years Ended December 31, 2025 and 2024

NOTE D – DISCONTINUANCE OF CONTRIBUTIONS / PLAN TERMINATION

The Board of Trustees amended the Plan effective January 1, 1985, freezing benefit accruals under the Plan and directing future contributions into the defined contribution plan. The Board of Trustees subsequently determined that the Plan terminated by mass withdrawal as of January 1, 1985 (Note A).

The net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former participants or their beneficiaries have been receiving for at least three years, or those participants eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of an annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under the plan provisions in effect at any time during the five years preceding plan termination.
2. Other vested benefits guaranteed by the Pension Benefit Guarantee Corporation (PBGC) (A U.S. government agency) up to the applicable limitations.
3. All other vested benefits.
4. All other benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the level of benefits guaranteed by the PBGC. For multiemployer plans, the PBGC provides financial assistance to plans that are unable to pay basic PBGC guaranteed benefits when due.

NOTE E – FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy are described as follows:

ARIZONA OPERATING ENGINEERS PENSION PLAN
Notes to Financial Statements
For the Years Ended December 31, 2025 and 2024

NOTE E – FAIR VALUE MEASUREMENTS – continued

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2 Inputs to the valuation methodology include
- Quoted prices for similar assets or liabilities in active markets
 - Quoted prices for identical or similar assets or liabilities in inactive markets
 - Inputs other than quoted prices that are observable for the asset or liability
 - Inputs that are derived principally from or corroborated by observable market data by correlation or other means
- If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2025 and 2024.

- *Cash and equivalents and corporate stocks* – Valued at the closing price reported on the active market on which the individual securities are traded.
- *Common collective trusts, 103-12 investment entities* – Valued at net asset value (NAV) of units held. The NAV is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the Plan less its share of liabilities. This practical expedient is not used when it is determined to be probable that the Plan will sell the investment for an amount different than the reported NAV.
- *Corporate debt instruments* – Valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments but includes adjustments for certain risks that may not be observable, such as credit and liquidity risk or a broker quote if available.
- *Mutual funds* – Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the SEC. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

NOTE E – FAIR VALUE MEASUREMENTS – continued

The following table sets forth by level, within the fair value hierarchy, the Plan’s assets at fair value as of December 31, 2025 and 2024:

Assets at Fair Value as of December 31, 2025

Total investments, at fair value	\$ 13,503,776	\$ -	\$ -	\$ 16,081,399

Transfers between levels – The availability or observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another.

The Plan evaluates the significance of transfers between levels based on the nature of the financial instrument and size of transfer relative to total net assets available for benefits.

NOTE E – FAIR VALUE MEASUREMENTS – continued

Fair value of investments that calculate net asset value – The following table summarizes investments measured at fair value based on NAVs per share as of December 31, 2025 and 2024:

<u>December 31, 2025</u>	<u>Fair Value</u>	<u>Unfunded Commitments</u>	<u>Redemption Frequency (if currently eligible)</u>	<u>Redemption Notice Period</u>
Common, collective trusts:				
JP Morgan Strategic Property Fund (a)	\$ 784,201	\$ -	Quarterly	45 Days
<u>December 31, 2024</u>	<u>Fair Value</u>	<u>Unfunded Commitments</u>	<u>Redemption Frequency (if currently eligible)</u>	<u>Redemption Notice Period</u>
Common, collective trusts:

103-12 Investment entities:				
PanAgora Risk Parity Multi-Asset Fund (c)	\$1,638,142	\$ -	Bi-monthly	6 Days

- (a) *JP Morgan Strategic Property Fund* is a common collective fund that owns and seeks improved real estate projects with stabilized occupancies that produce a relatively high level of current income combined with moderate appreciation potential. Fund participants may withdraw from the Fund once per quarter, subject to available cash. A withdrawal request is required 45 days prior to quarter end.
- (b) *PanAgora Risk Parity Multi-Asset Fund* is considered a 103-12 Investment Entity. The fund's objective is to balance risk exposures in a given portfolio in an optimal fashion, so as to avoid risk concentration, be it across classes, or within asset class using hedging instruments. Redemption is permitted bi-monthly with a notice period of 6 days.

NOTE F – RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and, that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

The actuarial present value of accumulated plan benefits are reported based on certain assumptions that pertain to interest rates, inflation rates and participant data, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

ARIZONA OPERATING ENGINEERS PENSION PLAN
Notes to Financial Statements
For the Years Ended December 31, 2025 and 2024

NOTE G – TAX STATUS

The Plan obtained its latest determination letter on March 8, 2016, in which the Internal Revenue Service (IRS) states that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the plan administrator and the Plan's counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

NOTE H – PARTY IN INTEREST TRANSACTIONS

The Plan pays fees for several arrangements with service providers, including a third-party administrator, attorneys, actuaries, consultants, and auditors. These transactions are considered exempt party in interest transactions under ERISA.

The Plan shares common governance, certain operating expenses, and transacts with related organizations, including the Union, the Arizona Operating Engineers Health and Welfare Trust Fund, the Arizona Operating Engineers Annuity Plan, the Arizona Operating Engineers Vacation Trust Fund, and the Arizona Operating Engineers' Joint Apprenticeship Fund, all of which are tax-exempt.
