Independent Auditors' Report

To the Plan Administrator of
Maspeth Federal Savings & Loan Association Pension Trust

Opinion

We have audited the financial statements of Maspeth Federal Savings & Loan Association Pension Trust (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of September 30, 2025 and 2024, and the related statements of changes in net assets available for benefits for the years then ended and the statement of accumulated plan benefits as of September 30, 2024, and the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits as of September 30, 2025 and 2024, and the changes in its net assets available for benefits for the years then ended and the accumulated plan benefits as of September 30, 2024, and the changes in accumulated plan benefits for the year then ended, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for at least one year following the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedule Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of Schedule H, Line 4(i) - Schedule of Assets (Held at End of Year), as of September 30, 2025 is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedule, we evaluated whether the supplemental schedule, including its form and content, is presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying supplemental schedule is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

1. Description of Plan

The following description of the Maspeth Federal Savings & Loan Association Pension Trust (the Plan) provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a noncontributory cash balance defined benefit plan established effective December 1, 1954, as restated October 1, 2024. The Plan covers all employees, excluding those covered by a collective bargaining agreement, nonresident aliens and leased employees, of Maspeth Federal Savings & Loan Association (the Company) who have completed 1,000 hours in a consecutive 12-month period and are age 21 or older. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Pension Committee is responsible for oversight of the Plan. The Plan's Trustee determines the appropriateness of the Plan's investment offerings, monitors investment performance, and reports to the Plan's Pension Committee.

Participant Accounts

Effective December 1, 2006, the Plan was converted to a cash balance plan. Commencing December 1, 2006, each participant's account is equal to the sum of (1) the cash balance account on the last day of the previous Plan year, (2) interest credited on the cash balance account at the applicable interest rate, and (3) the theoretical contribution made on behalf of the participant for the current Plan year. The theoretical contribution as a percentage of compensation for each participant who was a participant prior to December 1, 2006 for each plan year, beginning with the plan year commencing on December 1, 2006, is as follows:

<u>Class of Employees</u>	<u>Rate (%)</u>
Senior Vice President	20.0
Vice President	15.0
Assistant Vice President and Junior Officers	12.5
All other participants	10.0

The theoretical contribution rate for each participant whose eligible date is December 1, 2006 or later is as follows:

<u>Class of Employees</u>	<u>Rate (%)</u>
Senior Vice President	15.0
Vice President	10.0
Assistant Vice President and Junior Officers	7.5
All other participants	5.0

Participants' hypothetical accounts also receive investment credits at the end of a specified time period, as required by the plan document. The interest credit is determined on the last day of each interest credit period and is equal to the 30-year Treasury Bonds minus 1%. As of September 30, 2025 and 2024, the interest rate was 3.37% and 3.94%, respectively.

Notes to Financial Statements

Funding Policy

The Plan's funding policy is for the Company to contribute an amount which will meet or exceed the annual ERISA minimum funding requirement. The minimum funding requirements of ERISA were met in 2025 and 2024.

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. Company contributions for the years ended September 30, 2025 and 2024 were \$1,080,210 and \$1,050,000, respectively.

Pension Benefits

Plan participants are entitled to their plan benefits after terminating employment with vested rights. Participants become vested in the Plan upon completion of at least three years of service or attainment of the normal retirement age (65). If employees terminate before rendering the required years of service, they forfeit the right to receive the portion of their accumulated plan benefits attributable to the Company's contributions. At normal retirement age, participants' benefits automatically become fully vested. Pension benefits are calculated as an amount equal to 75% of monthly compensation, reduced by one-fortieth for each year of credited service, less than 40.

Upon election to receive pension benefits, employees may elect from one of the following options:

Employees may elect to receive their pension benefits as a life annuity payable monthly from retirement, or in the form of a joint and survivor annuity. For purposes of calculating the monthly life annuity under the cash balance plan, the cash balance account is projected to the participant's normal retirement date using interest at the applicable interest rate. The benefit that can be provided at normal retirement date by the cash balance account is determined by converting such projected cash balance account into a life annuity, utilizing the applicable actuarial assumptions and valuations.

Employees may elect to receive the value of their accumulated Plan benefits and their cash balance account as a lump-sum distribution upon retirement or termination. If a participant elects to receive such benefit at any time before the participant's normal retirement date, the amount of benefit is actuarially reduced for benefits accrued prior to December 1, 2006.

Death and Disability Benefits

If an active employee dies at age 55 or older, a death benefit equal to the value of the employee's accumulated pension benefit is paid to the employee's beneficiary. Active employees who become totally disabled receive annual disability benefits that are equal to the equivalent normal retirement benefit they have accumulated as of the time they become disabled. Disability benefits are paid until normal retirement age, at which time disabled participants will receive the normal retirement benefit computed as though they had been employed to normal retirement age, with their annual compensation remaining the same as at the time they became disabled.

2. Summary of Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's Trustee determines the Plan's valuation policies utilizing information provided by the investment advisers. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefits payments to participants are recorded upon distribution.

Administrative Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the Statements of Changes in Net assets Available for Benefits. In addition, certain investment related expenses are included in net appreciation in fair value of investments in the Statements of Changes in Net Assets Available for Benefits.

Subsequent Events

Subsequent events were evaluated through July 10, 2026, the date the financial statements were available to be issued.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during each year of credited service. The accumulated plan benefits for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances, such as retirement, death, disability and termination of employment, are included, to the extent they are attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability withdrawal or retirement) between the valuation date and the expected date of payment.

The computations of the actuarial present value of accumulated plan benefits were made as of October 1, 2024. Had the valuation been performed as of September 30, there would be no material differences. The significant actuarial assumptions used in the valuation were:

- The accumulated value of Plan benefits is determined by adding the theoretical account balance (cash balance) and the present value of the accrued benefit that was earned as of November 30, 2006 (the day prior to the conversion of the traditional defined benefit plan to a cash balance plan).
- The mortality table used in converting the accrued benefits to present values was the 2024 Mortality Table for lump sum distributions.
- Retirement at normal retirement - age 65.
- Assumed rate of interest 4.5%.
- Salary increases - 4% per annum for cash balance portion.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under authoritative guidance are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observables and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at September 30, 2025 and 2024.

Interest-bearing cash: These investments are stated at cost, which approximates fair value.

Money market funds: Valued at the quoted net asset value (NAV) of shares held by the Plan at year-end.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily NAV and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Common stocks: Valued at the closing price reported on the active market on which the individual securities are traded.

U.S. government securities: Valued using pricing models maximizing the use of observable inputs for similar securities.

5. Related-Party and Party in Interest Transactions

The Plan's investments are administered by the Trustee of the Plan. Contributions are held and managed by Oppenheimer & Co. Inc., JPMorgan Chase Bank, N.A., and Janney Montgomery Scott LLC, who invest cash received, interest and dividend income. The Trustee of the Plan makes distributions to participants. These transactions are party in interest transactions under ERISA.

As described in Note 2, the Plan paid certain expenses related to plan operations and investment activity to various service providers. Additionally, certain administrative functions of the Plan are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan.

Notes to Financial Statements

September 30, 2025 and 2024

6. Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
- Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations.
- All other vested benefits (that is, vested benefits not insured by the PBGC).
- All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

7. Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated February 28, 2023, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is designed, and is currently being operated, in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Notes to Financial Statements

8. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

A. Funding Method

The valuation method is the actuarial cost method prescribed under Section 430 of the Internal Revenue Code.

Under this method, the following terms are used:

The Funding Target is the sum of the present value of all benefits accrued or earned under the plan as of the beginning of the plan year.

The Applicable Funding Target is equal to the Funding Target multiplied by the applicable transition percentage under the Worker, Retiree, and Employer Recovery Act of 2008.

The Target Normal Cost is the sum of the present value of all benefits which are expected to accrue or be earned under the plan during the plan year.

The Carryover Balance maintained by the plan was set equal to the Credit Balance, if any, in the Funding Standard Account as of the final day of the 2007 plan year. It is decreased when used to reduce the minimum required contribution in succeeding plan years. The unused portion is adjusted to reflect the rate of return on plan assets in those succeeding plan years.

The Prefunding Balance is the accumulation of discounted contributions in excess of the minimum funding requirement for 2008 and later plan years. It is decreased when used, and adjusted for return on plan assets, similarly to the Carryover Balance.

The Funding Shortfall is equal to the Funding Target, less the Actuarial Value of Assets, reduced by the Prefunding Balance and the Carryover Balance.

The Adjusted Funding Shortfall is equal to the Applicable Funding Target, less the Actuarial Value of Assets, reduced by the Prefunding Balance and the Carryover Balance.

A Shortfall Amortization Base is established for a plan year equal to the Adjusted Funding Shortfall less the present value of the existing Shortfall Amortization Installments and Waiver Amortization Installments, if any. Under some circumstances, no Shortfall Amortization Base may need to be established and/or prior Shortfall Amortization Bases may be eliminated.

A Shortfall Amortization Installment is the amount necessary to amortize the Shortfall Amortization Base over the 15-plan-year period beginning with the plan year it is established. Before the American Rescue Plan Act (ARPA), plans were generally required to amortize any Shortfall Amortization Base over a 7-plan-year period. Effective with the 2021 plan year, the ARPA allowed the plan sponsor to eliminate all prior amortization installments and reamortize the Funding Shortfall over a period of 15 years. A 15-year period is used for any new Shortfall Amortization Installments established in future plan years. The sponsor may have chosen to reamortize in the 2020 or 2021 plan years but was required to do so by the 2022 plan year.

Statement by Enrolled Actuary
To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
