Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Description of Funding Method

Under the Pension Protection Act of 2006, minimum required contributions must be determined based on the methodology prescribed in Internal Revenue Code Section 430 and the regulations thereunder. Specifically, the minimum required contribution for a plan year is the sum of

(1) the target normal cost of the plan for the plan year
(2) the shortfall amortization charge (if any)
(3) the waiver amortization charge (if any).

The **target normal cost** is the present value of all benefits expected to accrue during the plan year. This includes benefits attributable to services performed in a preceding plan year which are increased due to increases in compensation during the current plan year.

The **shortfall amortization charge** is the sum of the **shortfall amortization installments** for the most recent 15 plan years (including the current plan year). If plan assets are less than the applicable percentage of the funding target, a **shortfall amortization base** will be established equal to the funding shortfall less the outstanding value of all prior shortfall amortization bases. The shortfall amortization installment is the amount necessary to amortize the shortfall amortization base over 15 years. If the funding shortfall is $0, all shortfall amortization bases in effect will be wiped out.

The **funding target** is the present value of all benefits accrued under the plan as of the beginning of the plan year. Both the funding target and target normal cost are based on three segment interest rates, the first segment rate being for benefit payments to be made in 0 to 5 years, the second segment rate being for benefit payments to be made in 5 to 20 years, and the third segment rate being for benefit payment to be made in 20 years or later.

The **waiver amortization charge** is the aggregate total of **waiver amortization installments** for all **waiver amortization bases** established in the preceding five years. Waiver amortization bases are established when a plan sponsor cannot meet the minimum funding requirements for a plan year and applies for a waiver of minimum funding for that year.

If the actuarial value of plan assets is greater than or equal to the funding target, the minimum required contribution is the target normal cost less any excess of the actuarial value of assets over the funding target. The minimum required contribution is not to be less than $0.

In determining whether the minimum required contribution as of a valuation date has been met, any contributions made after the valuation date are discounted back to the valuation date at the plan's **effective interest rate**. This is the single rate applied to all future contingent benefit payments which produces the same funding target as the three segment interest rates.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods (continued)

Asset Valuation Method

The actuarial value of the assets is fair market value with no averaging.

Valuation Date

The plan's actuarial valuation date is the first day of the plan year.

Valuation Procedures

We used financial data submitted by the trustee without further audit and participant data as supplied by the plan sponsor. This information would customarily not be verified by a plan's actuary. We have reviewed the information for internal consistency, and we have no reason to doubt its substantial accuracy.

The limitations of Internal Revenue Code Sections 401(a)(17) and 415(b) have been incorporated into our calculations. Both limits were indexed in the maximum contribution calculation since the plan is covered by the PBGC.

No liability is held for non-vested, inactive employees who have a break-in-service, or for non-vested employees who have quit, been terminated, or died, even if a break-in-service had not occurred as of the valuation date.

All participants are assumed to work at least 1,000 hours in future years, even if they worked less than 1,000 hours in the preceding year.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods (continued)

Actuarial Assumptions

Interest Rates:	**MAP-21 Funding**	**Non-MAP-21 Funding**	**PBGC**
First segment	5.00%	5.00%	4.65%
Second segment	5.27%	5.27%	5.28%
Third segment	5.50%	5.40%	5.63%
Effective interest rate	5.26%	N/A	N/A

Interest Rate Elections: **Funding:** segmented rates (no yield curve), zero-month lookback

PBGC: spot segment rates (standard premium funding target rates)

PBGC Lookback Election: Lookback Year elected previously but cannot be used in 2025 due to participant count exceeding 100. Thus, the variable-rate premium for 2025 is based on 2025 unfunded vested benefits.

Mortality:

- Non-annuitant — No mortality is assumed for non-annuitants.
- Annuitant — 2025 static combined mortality per IRS Notice 2024-42.

Retirement: 100% at age 62 or one year from the valuation date, if later

Turnover: None

Disability: None

Future Accumulation Interest Rates: 5.00% per year

Salary Scale: None

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods (continued)

Target Normal Cost:	Based on the expected pay credit for the current year discounted one year at 5.00% to reflect the discount from the end of the year when the allocation would be awarded to the beginning-of-year valuation date.
Increases in Section 401(a)(17) and Section 415(b) Limits:	4.00% per year
Expenses Paid from Plan:	None
Marriage:	No assumption is made about marriage probability and age of spouse since it is assumed no pre-retirement death benefits will be paid.
