Report of Independent Auditors

To the Administrator of Caterpillar Inc. Non-Contributory Pension Plan

Opinion

We have audited the accompanying financial statements of Caterpillar Inc. Non-Contributory Pension Plan (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2025 and 2024, and the related statement of changes in net assets available for benefits for the year ended December 31, 2025, including the related notes (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2025 and 2024, and the changes in its net assets available for benefits for the year ended December 31, 2025, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not

detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

1. Description of the Plan

The following description of the Caterpillar Inc. Non-Contributory Pension Plan (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions. The Plan is governed by the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

Participation

The Plan is a non-contributory defined benefit pension plan providing retirement benefits to eligible employees of Caterpillar Inc. and its subsidiaries (the "Company") primarily represented by collective bargaining units that have ratified the Plan. Active employees represented by the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America ("UAW") hired after January 10, 2005 are not eligible to participate in the Plan. Labor agreements with other bargaining units also include terms under which employees hired after certain dates are not eligible to participate in the Plan.

Pension benefit accruals for all Plan participants were frozen as of December 31, 2015.

Benefits

Plan participants who meet age and service requirements are eligible for monthly benefits. Benefits are typically payable in the form of an annuity, and are primarily based on years of credited service and/or labor grade. Years of credited service are based upon periods of full-time employment, including authorized leaves of absence and the first 11 months of layoff.

The formula used to calculate normal retirement benefits is based upon a monthly basic benefit rate plus a wage related supplement multiplied by years of credited service. The monthly basic benefit rate for the UAW and the wage related supplement are based upon labor grade and retirement date.

An additional early retirement allowance ("AERA") is available to those retiring prior to age 62 and one month. AERA provides an additional supplemental benefit to retirees to bring their total retirement benefit to a target. The monthly AERA target for UAW participants retiring with 30 or more years of service was $2,800 for all periods reported. For those with less than 30 years of credited service the AERA is reduced based upon age at retirement.

Participants who meet certain age and service criteria may retire prior to age 65 and may be subject to a reduction in their monthly basic benefit rate. The nature of the reduction is dependent upon years of credited service and age at retirement.

In addition, the Plan also provides certain disability retirement benefits, continued benefit payments to surviving spouses, and automatic benefits for surviving spouses of deceased employees eligible for retirement at the time of death.

Vesting

Rights to benefits are fully vested after five years of credited service. Termination of employment prior to vesting results in forfeiture of rights to retirement benefits.

Contributions
The Plan's actuary provides actuarial estimates of the minimum and maximum amount of Company contributions to provide the Plan with sufficient assets to meet the benefits accruing to participants and to meet minimum funding requirements under ERISA and Internal Revenue Code ("IRC") section 412. The Company has the discretion to make a contribution within this range based on factors such as cash flow and strategic goals. Amounts funded are maintained by The Northern Trust Company (the "Trustee") until disbursed. The Plan has met the minimum funding requirements of ERISA in 2025.

Plan Termination
In the event of Plan termination, certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC"), a U.S. government agency. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

If the Plan terminates, all affected covered persons shall have a nonforfeitable right to benefits accrued on the date of termination to the extent the Plan is funded. The net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Expenses attributable to administration and liquidation of the Caterpillar Inc. Master Retirement Trust ("Master Trust" or "Trust").
2. Retirement benefits to the extent guaranteed by the PBGC, to former employees or their beneficiaries who have been receiving benefits for at least three years, or to those employees eligible to retire during that three-year period who would have been receiving benefits if they had retired with benefits in the normal form of payment under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
3. Other vested benefits guaranteed by the PBGC up to the applicable limitations (discussed above).
4. All other vested benefits (that is, vested benefits not insured by the PBGC).
5. All nonvested benefits.

If the benefits in 2. through 5. above cannot be fully provided, then benefits will be paid in full for each successive level (2. through 5. above) according to its priority until full benefits cannot be paid for a given level, then benefits are paid ratably based on the actuarial present value of accumulated plan benefits to participants or beneficiaries at that level.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

Administration
The Plan is administered by the Company. Pursuant to procedures adopted by the Company, responsibility for the Plan's non-financial matters has been delegated to the Caterpillar Inc. Benefits Administrative Committee and responsibility for the Plan's financial matters has been delegated to the Caterpillar Inc. Benefit Funds Committee. The Company and the Caterpillar Inc. Benefit Funds Committee have entered into trust and investment management agreements with certain banks and investment advisors providing for administration of the Master Trust's assets and distribution of benefits upon their instructions. The Caterpillar Inc. Benefits Administrative Committee has retained Alight Solutions to provide recordkeeping and administrative services as part of the administration of the Plan.

Plan Expenses
Administrative expenses presented on the Statement of Changes in Net Assets Available for Benefits represent expenses that are specifically identifiable to the Plan, but are paid by the Master Trust. These expenses include PBGC fees, audit

fees and fees paid to third party service providers. The third party service providers support the administration of the Plan and provide various services including, but not limited to the following: recordkeeping, preparation of participant communications, managing call centers, processing qualified domestic relations orders, and consulting services.

All other expenses of the Master Trust (primarily consisting of investment management fees), which are not specifically identifiable to a plan, are included in the Plan interest in net investment income (loss) of Caterpillar Inc. Master Retirement Trust on the Statement of Changes in Net Assets Available for Benefits. See Note 4 for additional information.

Plan Qualification

The Plan obtained its latest determination letter on April 5, 2016, in which the Internal Revenue Service ("IRS") stated that the Plan and related trust, as then designed, were in compliance with the applicable requirements of the IRC. Although the Plan has been amended subsequent to the period covered by the determination letter, the Plan Administrator and the Plan's counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC, and therefore, believe that the Plan is qualified and the related trust is tax-exempt. If an operational issue is discovered, the Plan sponsor has indicated that it will take any necessary steps to bring the Plan's operations into compliance with the IRC.

Accounting principles generally accepted in the United States of America require management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Company has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2025 and 2024, there are no material uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Company believes the Plan is no longer subject to income tax examinations for tax years prior to 2017.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Investment Valuation and Income Recognition

The fair value of the Plan's interest in the Master Trust is based on the beginning of the year value of the Plan's interest in the Master Trust plus actual contributions and allocated net investment income (loss) less actual distributions and actual and allocated administrative expenses. The Caterpillar Inc. Benefit Funds Committee determines the Plan's valuation policies utilizing information provided by investment managers and the Trustee. The investments in the Master Trust are valued as described in Note 4. Dividend income is recorded as of the ex-dividend date. Interest is recorded daily as earned. The Master Trust presents, in Note 4, in Net investment income (loss), the net appreciation (depreciation) in the fair value of its investments which consists of the realized gains (losses) and the unrealized appreciation (depreciation) on those investments. Purchases and sales of securities are recorded on a trade-date basis.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimated.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities could occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments including lump-sum distributions, attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to all eligible participants including: (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' years of credited service and/or labor grade. The accumulated plan benefits for active employees are based on years of credited service as of the date their benefit accruals were frozen which is December 31, 2015 for UAW participants (credited service for Plan participants covered by other labor agreements and non-represented employees is based on their respective freeze dates). Benefits payable under all circumstances (retirement, death, disability and termination of employment) are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, separation or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of December 31, 2025 and 2024 were:

- Life expectancy of participants in 2025 and 2024 used the PriH 2012 blue collar mortality table with generational projection from 2012 using MP 2021. A mortality multiplier derived from a credibility analysis was applied in each year: 2025 reflected experience from 2017-2019 and 2023-2024, excluding COVID-related impacts, while 2024 reflected experience from 2015-2019.
- Retirement ages between 46 and 70 (based on actual Company retirement experience).
- Interest rates used to discount the obligation for 2025 and 2024 were 6.05 percent and 6.30 percent, respectively (based on returns considered achievable given the Plan's mix of investments and investment policy).

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The following table presents the actuarial present value of accumulated plan benefits as of December 31, 2025 and 2024:

(in thousands of dollars)	2025	2024
Actuarial present value of accumulated plan benefits		
Vested benefits		
Participants currently receiving payments	$ 1,742,484	$ 1,807,687
Other participants	105,637	110,193
Total vested benefits	1,848,121	1,917,880
Non-vested benefits	16,573	17,040
Total actuarial present value of accumulated plan benefits at end of year	$ 1,864,694	$ 1,934,920

The following table summarizes the changes in the actuarial present value of accumulated plan benefits for the year ended December 31, 2025:

(in thousands of dollars)	2025
Changes in accumulated plan benefits	
Actuarial present value of accumulated plan benefits at beginning of year	$ 1,934,920
Increase (decrease) during the year attributable to:	
Change due to experience	4,924
Increase for interest due to decrease in the discount period	114,913
Benefits paid	(225,234)
Change in actuarial assumptions	35,171
Net increase (decrease) in accumulated plan benefits	(70,226)
Actuarial present value of accumulated plan benefits at end of year	$ 1,864,694

Change in Actuarial Assumptions

In 2025, the Company made the following changes in actuarial assumptions:

- The interest rate assumption used to discount the obligation was decreased from 6.30 percent to 6.05 percent. This resulted in an increase in the actuarial present value of accumulated plan benefits of $30 million.
- An experience study was performed in 2025 and as a result of this study:
  - Mortality was updated to reflect more recent Company-specific experience, resulting in an increase in the actuarial present value of accumulated plan benefits of $6 million.
  - Retirement rates for active participants were decreased, resulting in a decrease in the actuarial present value of accumulated plan benefits of $1 million.

These changes in actuarial assumptions, combined with other insignificant changes, are included in the 2025 changes in the actuarial present value of accumulated plan benefits table above.

4. Master Trust

The Plan's investments are held in the Master Trust, which was established for the investment of assets of the Plan and several other Company sponsored retirement plans. Each participating plan has an undivided interest in the Master Trust. The assets of the Master Trust are held by the Trustee. In general, the investment strategy for the Master Trust focuses on aligning the investments to the liabilities of the participating plans, while reducing risk in the portfolio. The current Master Trust target asset allocations as of December 31, 2025 were 87 percent fixed income and 13 percent

equities. These target allocations will be revisited periodically to ensure that they reflect the Company's overall objectives.

Net investment income (loss) of the Master Trust is allocated monthly to each participating plan based upon each plan's respective dollar ownership, giving consideration to the monthly plan-specific time-weighted activity within the Master Trust.

The following table presents the net assets of the Master Trust and the Plan's interest in the net assets of the Master Trust as of December 31, 2025 and 2024.

Investments are stated at fair value and are valued as described below:

- *Common and preferred stocks:* Primarily valued at quoted market prices.
- *Preferred and other corporate bonds and notes:* Valued based on matrices or models from reputable pricing vendors and may be determined by factors which include, but are not limited to market quotations, yields, maturities, call features, ratings, institutional size trading in similar groups of securities and developments related to specific securities.

- *U.S. government securities:* Valued based on matrices or models from reputable pricing vendors.
- *Common collective trusts and partnership/joint venture interests:* Primarily stated at net asset value ("NAV") of units held. The Plan's management elected the practical expedient to use NAV in measuring the fair value of the underlying investments. Certain investments are valued at quoted market prices.
- *Real estate:* Stated at appraised value.
- *Registered investment companies:* Primarily stated at NAV of units held. For investments in private funds, the Plan's management elected the practical expedient to use NAV in measuring the fair value of the underlying investments. Certain investments are valued at quoted market prices that represent the value of shares held by the Master Trust.
- *Other investments, net:* Primarily includes government debt securities, which are valued at quoted market prices, when available, or valued based on matrices or models from reputable pricing vendors.

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables summarize Master Trust investments measured at fair value based on NAV per share using the practical expedient, the unfunded commitments and redemption restrictions as of December 31, 2025 and 2024.

Fair Value Measurements

The guidance on fair value measurements defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. This guidance also specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques. Observable inputs (highest level) reflect market data obtained from independent sources, while unobservable inputs (lowest level) reflect internally-developed market assumptions. In accordance with this guidance, fair value measurements are classified under the following hierarchy:

- **Level 1** - Quoted prices for identical instruments in active markets.
- **Level 2** - Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs or significant value-drivers are observable in active markets.

- **Level 3** - Model-derived valuations in which one or more significant inputs or significant value-drivers are unobservable.

When available, quoted market prices are used to determine fair value, and such measurements are classified within Level 1. In some cases where market prices are not available, the observable market based inputs are used to calculate fair value, in which case the measurements are classified within Level 2. If quoted or observable market prices are not available, fair value is based upon valuations in which one or more significant inputs are unobservable, including internally developed models that use, where possible, current market-based parameters such as interest rates, yield curves and currency rates. These measurements are classified within Level 3.

Fair value measurements are classified according to the lowest level input or value-driver that is significant to the valuation. A measurement may therefore be classified within Level 3 even though there may be significant inputs that are readily observable.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the end of the reporting period.

The significance of transfers between levels was evaluated based upon the nature of the financial instrument and size of the transfer relative to total net Master Trust assets. For the year ended December 31, 2025, there were no significant transfers into or out of Levels 1, 2 or 3.

Master Trust assets that are measured at fair value as of December 31, 2025 and 2024 are summarized below. Investments measured at net asset value per share using the practical expedient have not been classified in the fair value hierarchy, but are presented in order to permit reconciliation to the table that presents the net assets of the Master Trust.

Derivatives

Within the Master Trust, certain investment managers may use derivative financial instruments to meet fund objectives and manage exposure to foreign currency, interest rate and market fluctuations. The following is a description of the types of derivative contracts the Master Trust may use:

- Credit contracts: Credit default swaps are used to manage exposure to credit risk. A credit default swap is a contract in which, for a fee, a protection seller agrees to pay a protection buyer an amount resulting from a credit event on a reference entity. If there is no credit default event or settlement trigger, as defined by the contract, then the protection seller makes no payment to the protection buyer and receives only the contractually specified fee. However, if a credit event occurs, the protection seller will be required to make a payment to the protection buyer.
- Equity contracts: Equity index futures contracts are used by investment managers to invest excess cash into equity benchmarks, such as the S&P 500 and MSCI EAFE. These contracts are settled in cash daily. Investment managers may also invest in equity rights and warrants which give the holder the right to purchase securities from the issuer at a specific price within a certain time frame.

- Foreign exchange contracts: Foreign currency exchange rate movements create a degree of risk by affecting the U.S. dollar value of instruments denominated in foreign currencies. Forward contracts are used by investment managers to manage foreign exchange rate risks associated with certain investments. These contracts are presented gross (buy side of the contract as a receivable and sell side of the contract as a payable) in the table that presents the net assets of the Master Trust.
- Interest rate contracts: Interest rate movements create a degree of risk by affecting the amount of interest payments and the value of debt instruments. Investment managers use interest rate swaps, total return swaps, futures contracts, options and swaptions to manage interest rate risk. These contracts are settled in cash daily.

The fair value of these derivative contracts are included in Other investments, net, Receivables for securities sold and Payables for securities purchased in the tabular presentation of the Net Master Trust assets. The related appreciation (depreciation) is included in Net appreciation (depreciation) in fair value of investments in the tabular presentation of the Net investment income (loss) of the Master Trust. As of December 31, 2025 and 2024, the fair value of these derivative financial instruments was $3 million. In 2025, the effect of these derivatives on Net investment income (loss) of the Master Trust was a net gain of $50 million, which is primarily related to realized gains from the settlement of interest rate contracts.

The gross notional value of the Master Trust's derivative activities, primarily related to interest rate contracts, was $1,571 million and $2,135 million, as of December 31, 2025 and 2024, respectively. The notional amounts of the derivatives do not represent amounts exchanged by the parties. The amounts exchanged by the parties are calculated by reference to the notional amounts and by other terms of the derivatives, such as interest rates and equity markets.

5. Related-Parties and Parties in Interest

The Trustee is authorized, under contract provisions and by exemption under 29 CFR 408(b) of ERISA regulations, to invest in securities under its control and in securities of the Company. As of December 31, 2025 and 2024, the Master Trust did not hold any investment in securities of the Company. The Master Trust also invests in certain funds that are sponsored and managed by The Northern Trust Company, the Trustee for the Master Trust. Pursuant to this, the Trustee manages an equitization account which overlays cash with equity futures. These transactions and expenses qualify as exempt party in interest transactions.

6. Subsequent Events

The Plan has evaluated subsequent events through September 21, 2026, the date the financial statements were available to be issued, and concluded there were no events or transactions occurring during this period that required recognition or disclosure in the Plan's financial statements.

Statement of Actuarial Assumptions/Methods

Non-Contributory Pension Plan

Economic Assumptions

Interest rate basis:

- Applicable month: December
- Interest rate basis: Full Yield Curve

Interest rates:

- 10-year rate: 5.13%
- 20-year rate: 5.55%
- 30-year rate: 5.58%
- Effective interest rate: 5.23%

Annual rates of increase:

- Compensation: N/A
- Future Social Security wage bases: N/A
- Statutory limits on compensation: N/A

Administrative and investment expenses: $4,850,000 based on an estimate of PBGC premiums and service providers' fees to be paid by the trust

As permitted by law, a yield curve reflecting returns on high quality corporate bonds (A, AA and AAA) is used to determine the funding target, and thus the minimum require contribution under IRC §430 for the plan. Because these assumptions are prescribed by law and reflect current market conditions (specifically, the average market conditions for the month preceding the valuation date) they may from time to time be inconsistent with other economic assumptions used in the valuation, which may reflect both current economic conditions and assumed future conditions.

Demographic Assumptions

Inclusion Date

The valuation date coincident with or next following the date on which the employee becomes a participant

New or rehired employees

It was assumed there will be no new or rehired employees

Valuation of Employees on Layoff

Any employees on layoff are valued as actives

Mortality

- Healthy

Separate rates for non-annuitants and annuitants based on Pri-2012 “Employees” and “Healthy Annuitants” (participants and beneficiaries combined) tables, respectively, without collar or amount adjustments and then projected forward with a generational projection as specified in the regulations under §1.430(h)(3)-1 using the IRS adjusted Scale MP-2021 (i.e., MP-2021 with no mortality improvement for 2020-2023 and future mortality improvement capped at 0.78% for years after 2024).

- Disabled

IRS prescribed table for post-1994 disablements from Revenue Ruling 96-7

SCHEDULE SB ATTACHMENTS

Form of payment	Married participants are assumed to elect a 55% joint and survivor annuity, and single participants are assumed to elect a single life annuity
Percent married	70% of participants
Spouse age	Wife three years younger than husband
At-risk assumptions, if applicable	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during plan year, if any, plus plan-related expenses expected to be paid from plan assets during plan year
Actuarial value of assets	Average of the fair market value of assets on the valuation date and at the beginning of each of the two twelve-month periods immediately preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2024 plan year)

SCHEDULE SB ATTACHMENTS

Benefits Not Valued

WTW has reviewed the plan provisions with Caterpillar Inc., and based on that review, is not aware of any significant benefits required to be valued that were not

Decrement Timing Model

Rounded Middle of Year – All decrements are assumed to occur at the middle of the year to approximate the pattern of decrements that occur throughout the year

In addition, eligibility for benefits, commencement and cessation of benefits, and other commencement factors will reflect the middle of the year timing

Sources of Data

Caterpillar, through its third-party administrator, furnished participant data as of January 1, 2025. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. The following assumptions for unavailable data were approved by Caterpillar and reflected in the data:

- Missing date of birth

  Participants who are missing their date of birth were assigned an average age based on the participant's status. Beneficiaries who are missing their date of birth were assigned the participant's date of birth plus three years for male participants and minus three years for female participants.

- Missing sex code

  A male sex code is assigned to a participant and a female sex code is assigned to a beneficiary when their sex code is unavailable

  For those participants missing their beneficiary's sex code and have a joint and survivor form of payment, the beneficiary is assigned a sex code opposite of the participant's sex code

  Participants with an 'N' or 'O' gender were assumed to be female for valuation purposes as an assumption of female mortality will be less likely to understate the PBO for such participants

- Missing benefit

  Participants with missing benefits are assigned an average benefit amount based on the participant's status and/or service where available

Schedule SB, Line 22
Description of Weighted Average Retirement Age
as of January 1, 2025

See Schedule SB, Part V – Statement of Actuarial Assumptions/Methods for retirement rates. The average retirement age for Line 22 was calculated by determining the average age at retirement for those current active participants expected to reach retirement, based on all current decrements assumed. For each active participant, an expected retirement age was calculated weighted in proportion to the probability that the individual would remain an active participant to each age and then retire at that age. The plan's weighted average retirement age of 62 is the arithmetic average of the expected retirement ages of all participants on January 1, 2025.

Non-Contributory Pension Plan

Economic Assumptions

Interest rate basis:

• Applicable month	December
• Interest rate basis	Full Yield Curve

Interest rates:

• 10-year rate	5.13%
• 20-year rate	5.55%
• 30-year rate	5.58%
• Effective interest rate	5.23%

Annual rates of increase:

• Compensation	N/A
• Future Social Security wage bases	N/A
• Statutory limits on compensation	N/A

Administrative and investment expenses	$4,850,000 based on an estimate of PBGC premiums and service providers' fees to be paid by the trust

As permitted by law, a yield curve reflecting returns on high quality corporate bonds (A, AA and AAA) is used to determine the funding target, and thus the minimum require contribution under IRC §430 for the plan. Because these assumptions are prescribed by law and reflect current market conditions (specifically, the average market conditions for the month preceding the valuation date) they may from time to time be inconsistent with other economic assumptions used in the valuation, which may reflect both current economic conditions and assumed future conditions.

Demographic Assumptions

Inclusion Date

The valuation date coincident with or next following the date on which the employee becomes a participant

New or rehired employees

It was assumed there will be no new or rehired employees

Valuation of Employees on Layoff

Any employees on layoff are valued as actives

Mortality

- Healthy

Separate rates for non-annuitants and annuitants based on Pri-2012 “Employees” and “Healthy Annuitants” (participants and beneficiaries combined) tables, respectively, without collar or amount adjustments and then projected forward with a generational projection as specified in the regulations under §1.430(h)(3)-1 using the IRS adjusted Scale MP-2021 (i.e., MP-2021 with no mortality improvement for 2020-2023 and future mortality improvement capped at 0.78% for years after 2024).

SCHEDULE SB ATTACHMENTS

Form of payment	Married participants are assumed to elect a 55% joint and survivor annuity, and single participants are assumed to elect a single life annuity
Percent married	70% of participants
Spouse age	Wife three years younger than husband
At-risk assumptions, if applicable	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during plan year, if any, plus plan-related expenses expected to be paid from plan assets during plan year
Actuarial value of assets	Average of the fair market value of assets on the valuation date and at the beginning of each of the two twelve-month periods immediately preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2024 plan year)

SCHEDULE SB ATTACHMENTS

Benefits Not Valued

WTW has reviewed the plan provisions with Caterpillar Inc., and based on that review, is not aware of any significant benefits required to be valued that were not

Decrement Timing Model

Rounded Middle of Year – All decrements are assumed to occur at the middle of the year to approximate the pattern of decrements that occur throughout the year

In addition, eligibility for benefits, commencement and cessation of benefits, and other commencement factors will reflect the middle of the year timing

Sources of Data

Caterpillar, through its third-party administrator, furnished participant data as of January 1, 2025. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. The following assumptions for unavailable data were approved by Caterpillar and reflected in the data:

- Missing date of birth

  Participants who are missing their date of birth were assigned an average age based on the participant's status. Beneficiaries who are missing their date of birth were assigned the participant's date of birth plus three years for male participants and minus three years for female participants.

- Missing sex code

  A male sex code is assigned to a participant and a female sex code is assigned to a beneficiary when their sex code is unavailable

  For those participants missing their beneficiary's sex code and have a joint and survivor form of payment, the beneficiary is assigned a sex code opposite of the participant's sex code

  Participants with an 'N' or 'O' gender were assumed to be female for valuation purposes as an assumption of female mortality will be less likely to understate the PBO for such participants

- Missing benefit

  Participants with missing benefits are assigned an average benefit amount based on the participant's status and/or service where available

2. Early Retirement Benefit	Age 60 and 10 years or age 55 and age plus service over 85 or any age with 30 years of service.	Amount calculated in (1) reduced by one-half of 1% for each month retirement precedes age 62. If the participant meets the age 55 eligibility, has 30 years of service, or retires after age 62, no reduction shall apply.
3. Additional Early Retirement Allowance	Meets early retirement eligibility.	Amount payable until age 62 that will bring the participant's monthly retirement income up to the AERA target. The current AERA targets are shown below. For participants who retire with less than 30 years of service, this amount is prorated and reduced for payment before age 60. — Joliet: $2,900 — UAW: $2,800 — Non-Bargained Hourly: $2,800
4. Vested Benefit	Termination after 5 years of service.	Amount calculated in (1) reduced 6% for each year that benefits are received prior to age 65.
5. Disability Benefit	N/A	None for disability occurring after effective date of applicable agreement.
6. Preretirement Surviving Spouse's Benefit	Eligibility for a vested or early retirement benefit.	For married participants or participants with a legally recognized same sex domestic partner who elect this option, 55% of the amount calculated in (1) or (2) will be continued to the participant's surviving spouse or partner after the participant's death, reduced for spouses or partners more than 10 years younger.

Description of Weighted Average Retirement Age
as of January 1, 2025

See Schedule SB, Part V – Statement of Actuarial Assumptions/Methods for retirement rates. The average retirement age for Line 22 was calculated by determining the average age at retirement for those current active participants expected to reach retirement, based on all current decrements assumed. For each active participant, an expected retirement age was calculated weighted in proportion to the probability that the individual would remain an active participant to each age and then retire at that age. The plan's weighted average retirement age of 62 is the arithmetic average of the expected retirement ages of all participants on January 1, 2025.

	Eligibility	Monthly Benefit
2. Early Retirement Benefit	Age 60 and 10 years or age 55 and age plus service over 85 or any age with 30 years of service.	Amount calculated in (1) reduced by one-half of 1% for each month retirement precedes age 62. If the participant meets the age 55 eligibility, has 30 years of service, or retires after age 62, no reduction shall apply.
3. Additional Early Retirement Allowance	Meets early retirement eligibility.	Amount payable until age 62 that will bring the participant's monthly retirement income up to the AERA target. The current AERA targets are shown below. For participants who retire with less than 30 years of service, this amount is prorated and reduced for payment before age 60. — Joliet: $2,900 — UAW: $2,800 — Non-Bargained Hourly: $2,800
4. Vested Benefit	Termination after 5 years of service.	Amount calculated in (1) reduced 6% for each year that benefits are received prior to age 65.
5. Disability Benefit	N/A	None for disability occurring after effective date of applicable agreement.
6. Preretirement Surviving Spouse's Benefit	Eligibility for a vested or early retirement benefit.	For married participants or participants with a legally recognized same sex domestic partner who elect this option, 55% of the amount calculated in (1) or (2) will be continued to the participant's surviving spouse or partner after the participant's death, reduced for spouses or partners more than 10 years younger.
