Independent Auditors' Report

To the Plan Participants and Plan Administrator
General Dynamics Land Systems Pension Agreement:

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of General Dynamics Land Systems Pension Agreement (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits and of accumulated plan benefits as of December 31, 2025 and 2024, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 2025, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2025 and 2024, and for the year ended December 31, 2025, stating that the certified investment information, as described in Note 5 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditors' Responsibilities for the Audit of the Financial Statements section:

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with U.S. generally accepted accounting principles.
- The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical

requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information

to assess whether they are in accordance with the presentation and disclosure requirements of U.S. generally accepted accounting principles.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with U.S. generally accepted accounting principles.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedules Required by ERISA

The supplemental schedules of Schedule G, Part III – Schedule of Nonexempt Transactions for the year ended December 31, 2025, Schedule H, Line 4(i) – Schedule of Assets (Held at End of Year) as of December 31, 2025, and Schedule H, Line 4(j) – Schedule of Reportable Transactions for the year ended December 31, 2025are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion:

- The form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- The information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

GENERAL DYNAMICS
LAND SYSTEMS PENSION AGREEMENT

Notes to Financial Statements

December 31, 2025 and 2024

(1) Plan Description

The following description of the General Dynamics Land Systems Pension Agreement (the Plan) provides only general information. Participants should refer to the Plan Document for a more complete description of the Plan's provisions.

(a) General

The Plan is a noncontributory defined benefit plan covering eligible employees who are employed at General Dynamics Land Systems, Inc. (the Plan Sponsor), a subsidiary of General Dynamics Corporation (the Company or the Plan Administrator), and who are covered by a collective bargaining agreement with the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW), and certain of its Local Unions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Plan participates in the General Dynamics Corporation Group Retirement Trust (the Master Trust) along with certain other plans also sponsored by the Company.

(b) Pension Benefits

Effective January 1, 2011, the Plan was closed to newly hired employees. Eligible active participants as of January 1, 2011 continue to accrue benefits under the Plan. The Plan provides benefits under normal, deferred, or disability retirement as specified in the Plan Document.

(c) Risks and Uncertainties

The Plan invests in the Master Trust which invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, liquidity, and credit risks, as well as the risks associated with global events. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimations and assumptions in the near term would be material to the financial statements.

(2) Summary of Accounting Policies

(a) Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

(b) Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) requires Plan management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, and the actuarial

present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

(c) Investment Valuation and Income Recognition

The Plan's investment is reported at fair value. Fair value is the price that would be received by the Plan to sell an asset or paid by the Plan to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date in the Plan's principal or most advantageous market for the asset or liability. The Plan's sole investment is its interest in the Master Trust.

Purchases and sales of investments are recorded on the trade date. Investment income consists of dividend income, interest income and net appreciation in the fair value of investments. Dividends are recognized on the ex-dividend date. Interest income is recorded on an accrual basis. Net appreciation includes the gains or losses on investments bought and sold as well as held during the year.

(d) Payment of Benefits

Benefits are recorded when paid.

(e) Administrative Expenses

The Company administers the Plan, and administrative costs are paid by the Company or the Plan. Premiums paid to the Pension Benefit Guaranty Corporation (the PBGC), a U.S. government agency, Trustee fees and administrative costs paid by the Plan are reflected in the financial statements as administrative expenses of the Plan. There were certain other administrative costs paid by the Company for the year ended December 31, 2025. These costs were primarily related to professional service fees.

(3) Actuarial Assumptions for Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by the Plan's independent consulting actuary and is the amount resulting from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service Plan participants have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on the benefit structure for which the retiree or active employee is eligible for in accordance with the Plan Document. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The principal assumptions used in the determination of the present value of accumulated plan benefits as of December 31, 2025 and 2024 were as follows:

- Expected long-term rate of return on plan assets – 6.43%, and 6.64%, compounded annually, at December 31, 2025 and 2024, respectively

- Mortality basis – RP-2014 total employee and healthy annuitant mortality tables with generational projection from the base year 2014 using Aon U.S. Adjusted Mortality Improvement Scale (2025) for December 31, 2025 and RP-2014 total employee and healthy annuitant mortality tables with generational projection from the base year 2014 using Aon U.S. Adjusted Mortality Improvement Scale (2024) (formerly known as the "Aon U.S. Endemic Mortality Improvement Scale (2024)") for December 31, 2024
- Retirements – rates from age 55 through age 70, with a rate of 1.0% used for all ages prior to age 55 if the participant is eligible to retire
- Withdrawals – graduated rates based on age

The change in assumptions was mainly due to the Plan Sponsor updating the investment mix under the automatic de-risking asset allocation strategy under the General Dynamics Investment Policy of the Plan. As a result, the investment mix for the Plan was shifted from 50% return-seeking and 50% fixed-income investments to 40% return-seeking and 60% fixed-income investments effective August 1, 2025. Due to the shift in investment mix, the expected long-term rate of return on plan assets used to calculate the present value of accumulated plan benefits decreased resulting in an increase in the present value of accumulated benefits at December 31, 2025.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

(4) Funding Policy

The funding policy of the Plan is to fund the defined benefit retirement plan in a manner that optimizes the tax deductibility and contract recovery of contributions, considered within the Company's capital deployment framework. The Company may make discretionary contributions in addition to the required contributions to the Plan to provide not only for benefits attributed to service to date but also for benefits to be earned in the future. Such contribution amounts must at least meet or exceed the minimum funding requirements under ERISA as determined by the Plan's actuary. The Company met the minimum funding requirements of ERISA for the year ended December 31, 2025.

(5) Trustee Certified Information

The Plan Administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Investment in the Master Trust at fair value as of December 31, 2025 and 2024, and the participation in net income of the Master Trust for the year ended December 31, 2025 that are disclosed in the accompanying financial statements and ERISA-required supplemental schedule and related Notes 5 and 6 were obtained or derived from information supplied to the Plan Administrator and certified as complete and accurate by The Northern Trust Company (the Trustee).

The assets of the Plan are combined with the assets of other retirement plans of the Company into the Master Trust for investment purposes. Each participating retirement plan has a divided interest in the Master Trust. BlackRock Financial Management, Inc. serves as the investment advisor of the Master Trust. The assets of

the Master Trust are managed by independent investment management firms. The Trustee holds the assets of the Master Trust. The value shown in the accompanying financial statements represents the Plan's interest in the reported assets of the Master Trust. Investment income is allocated daily to each plan based on its interest in the market value of the underlying investments in the Master Trust.

The following table presents the net assets of the Master Trust and the Plan's interest in the Master Trust as of December 31, 2025:

(6) Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described as follows:

- Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

- Level 2 – Inputs to the valuation methodology include:

  - Quoted prices for similar assets or liabilities in active markets;

  - Quoted prices for identical or similar assets or liabilities in inactive markets;

  - Inputs other than quoted prices that are observable for the assets or liabilities;

  - Inputs that are derived principally from, or corroborated by, observable market data by correlation or other means.

    If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

- Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value:

Registered investment companies: Valued at the closing price reported on the active market in which the individual securities are traded (Level 1).

Interest bearing cash: The fair value of interest bearing cash balances and overnight deposit accounts have been determined based upon the deposit account balance, with no discounts for credit quality or liquidity restrictions or at the net asset value as provided by the fund managers (Level 2).

Units of collective trusts: The fair values of these private investment securities are determined using the net asset value as provided by the fund managers (Level 2). Investments are redeemable daily at net asset value, and there are no significant restrictions on redemptions.

Hedge funds, real estate investment trust and limited partnership: The fair values of these private investment securities are determined using the net asset value as provided by the fund managers, which is a practical expedient for fair value.

The following tables set forth by level, within the fair value hierarchy, the Master Trust's assets at fair value as of December 31, 2025 and 2024:

	December 31, 2025			
	Fair value	Quoted price in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)

Total investments, at fair value	$ 9,614,978,531			

*Investments measured at fair value using net asset value per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table for such investments are intended to permit reconciliation of the fair value hierarchy presented for the Master Trust investments to the investments at fair value presented in Note 5.

The following table details relevant investment data for investments measured at fair value based on net asset value per share held within the Master Trust as of December 31, 2025 and 2024:

Investment Type	Investment Strategy	2025 Fair Value Determined Using NAV	2024 Fair Value Determined Using NAV	Unfunded Commitments	Redemption Restrictions
Multi-strategy hedge fund of funds	To target attractive long-term risk adjusted absolute returns with lower volatility than the broad equity markets by investing in the equity long/short, event driven, relative value and tactical trading sectors through a portfolio of investment vehicles managed by trading advisors.	$ -	$ 1,215,272	None	Monthly redemptions with a 45-day notice requirement (a)(b)
Macro-strategy hedge fund	To invest in a broadly diversified portfolio of global securities.	383,105	1,102,128	None	Weekly to monthly with four business days to two calendar months notice (b)
Real estate limited partnership	To invest directly or indirectly through partnership interest in real estate investments, mortgages and other loans.	141,547,663	188,254,934	None	Quarterly redemptions with a 90-day notice requirement (b)
Real estate investment trust	To invest in diversified U.S. real estate assets, including retail, multi-family, office and industrial, that will produce core real estate returns.	68,058,465	143,518,166	None	Quarterly redemptions with a 45-day notice requirement (b)
		$ 209,989,233	$ 334,090,500		

(a) As the sole investor in the BlackRock Multi-Strategy Fund of Funds, Plan management requested to liquidate its investment in the fund during 2019. Due to redemption restrictions of the underlying investments of the fund, limitations were put into effect causing the fund to be liquidated over time providing for payments of such request as cash became available. Final liquidation of the fund occurred during 2025.

(b) During 2022, Plan management requested to liquidate its investments in the remaining hedge funds, the real estate limited partnership, and the real estate investment trust. Due to redemption restrictions of the underlying investments of the fund, one of the hedge funds remains in the Master Trust and is expected to be liquidated during 2026. All other hedge funds were liquidated during 2025 and 2024. Final liquidation of the real estate limited partnership and the real estate investment trust is expected to occur in 2028.

(7) Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by letter dated February 27, 2018, that the Plan is qualified and the Master Trust established under the Plan is tax exempt under the appropriate sections of the Internal Revenue Code (the IRC). Although the Plan has been amended subsequent to the date of the latest determination from the IRS, the Plan Sponsor and the Plan's legal counsel believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

U.S. GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2025 and 2024, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions. There are currently no audits in progress for any tax periods. Under the applicable IRS statute of limitations, the Plan is no longer open to income tax examinations for years prior to 2022.

(8) Plan Termination

The Plan was established by the Company with the intention that it shall be operated indefinitely and that contributions to the Plan shall continue for an indefinite period. Although it has not expressed any intention to do so, the Company reserves the right at any time to terminate the Plan. In the event of termination, participants become fully vested and the Master Trust investments will be used to pay benefits to those who are eligible according to an orderly procedure as prescribed by ERISA, its related regulations and the Plan Document, generally to provide the following benefits in the order indicated:

- Other vested benefits insured by the PBGC up to the applicable limitations (discussed below).
- All other vested benefits (that is, vested benefits not insured by the PBGC).
- All non-vested benefits.

The PBGC insures benefits under the Plan if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain survivors' benefits. However, the PBGC does not guarantee all types of benefits under covered plans. The amount of benefit protection is subject to certain limitations. The PBGC guarantees vested benefits at the level in effect on the date of plan termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

(9) Related Party and Party-in-Interest Transactions

Investments in certain collective funds held in the Master Trust are managed by Northern Trust Investments, Inc., an affiliate of the Trustee, in the amounts of $2,709,779,956 and $2,795,388,711, as of December 31, 2025 and 2024, respectively. An investment in a hedge fund in the Master Trust was managed by BlackRock Financial Management, Inc., in the amount of $864,450 as of December 31, 2024. Investments in certain collective funds held in the Master Trust are managed by BlackRock Institutional Trust Company, N.A., an affiliate of BlackRock Financial Management, Inc., in the amounts of $4,122,206,835 and $3,254,485,210 as of December 31, 2025 and 2024, respectively. These transactions qualify as related party transactions. There were also fees paid to BlackRock Financial Management, Inc. and The Northern Trust Company from the Master Trust and the Plan that qualify as related party transactions. The Master Trust also holds investment funds issued by certain investment managers which also qualify as exempt party-in-interest investments. Fees paid to other service providers also qualify as exempt party-in-interest transactions.

As of December 31, 2025, the Master Trust recorded a liability of $189,700,000 due to the Trustee. This amount represents funds advanced by the Trustee on behalf of certain participating plans to fund contributions and address a temporary negative cash position resulting from the timing of investment liquidations. The Trustee was reimbursed on January 2, 2026.

(10) Master Trust Investments Presentation

The statement of net assets available for benefits presents Investments in Master Trust as a single line item at fair value, while the Form 5500 Schedule H reports both assets held within the Master Trust and certain assets reported as held outside of the Master Trust. Although these assets are collectively invested with other Master Trust assets, the Plan holds a direct and divided interest in them, and, as permitted by the Department of Labor, Plan management has elected to present these specific assets separately in the Form 5500 as of December 31, 2025. In the financial statements, these assets remain included in the “Investments in Master Trust at fair value” line item, but they are also listed individually on the supplemental schedule of assets (held at year end) as Plan assets to reflect the Plan’s direct and divided ownership interest.

(11) Subsequent Events

Plan management evaluated subsequent events and transactions that occurred after December 31, 2025 through September 25, 2026, which is the date the financial statements were available to be issued. No events were deemed relevant for disclosure.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Actuarial Assumptions and Methods

For ERISA Requirements

Interest Rates
The three-segment yield curve interest rates with a four month lookback (ending in the month of August 2024), each adjusted as needed to reflect the 5.00% floor under ARPA and to fall within the 25-year average interest rate corridor under HATFA and subsequent legislation, are used for minimum funding purposes. All of the rates shown below are compounded annually.

1st Segment Rate (Years 0 to 4)	5.07%
2nd Segment Rate (Years 5 to 19)	5.31%
3rd Segment Rate (Years 20 and After)	5.50%

Salary Scale
Salaries are assumed to increase by 4.00% during each year subsequent to the date of valuation.

Social Security
The 2025 taxable wage base of $176,100 is assumed to increase 3.20% per year, compounded annually.

Retirement
The retirement decrement assumptions for active participants are summarized in Exhibit A. The weighted average retirement age is 65. All terminated vested members are assumed to retire at age 65 or immediately, if over age 65.

For at-risk calculations, participants who are eligible to retire within the next 10 years are assumed to retire immediately upon eligibility. The at-risk assumption for the assumed form of payment is the Joint Life Annuity form of payment. This form of payment results in the highest present value.

Mortality
Base Table:
Pri-2012 total employee and nondisabled annuitant tables

Projection:
Mortality rates are generational, projected from the base year 2012 using 2024 Adjusted Scale MP-2021

Withdrawal
The withdrawal decrement assumptions are summarized in Exhibit B.

Disability
The disability decrement assumptions are summarized in Exhibit C. Mortality following disability assumed to be in accordance with table provided in IRS Revenue Ruling if qualified as disabled under Title II of Social Security Act, otherwise regular mortality is assumed.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Decrement Timing
Decrements are assumed to apply as of the beginning of the year.

Members on Leave or Layoff
Members on leave or layoff whose leave or layoff is assumed to be temporary are treated as active for valuation purposes.

For members whose leave or layoff is assumed to be permanent, no rates of withdrawal, disability or retirement are assumed. A member on leave due to long term disability is assumed to retire when first eligible. Otherwise, a member on leave is treated as terminated for valuation purposes and assumed to retire at normal retirement age. If a member on layoff is expected to become eligible for retirement prior to the end of their layoff period for severance, they are assumed to retire when first eligible. Otherwise, they are assumed to terminate at the end of their layoff period for severance and subsequently retire at normal retirement age.

Probabilities Related to Spouse Option
For members covered by a benefit structure with a pre-retirement surviving spouse option, it is assumed that 65% of male members and 45% of female members are assumed to be married; husbands are assumed to be two years older than wives.

Form of Payment Election Option
For eligible members, it is assumed 100% of married members will elect i) the subsidized 60% contingent annuity option with pop-up feature at retirement for benefits accrued under the UAW Benefit Formula, and ii) the subsidized 60% contingent annuity option with 10 years certain and pop-up feature at retirement for benefits accrued under the SERP Benefit Formula. For unmarried eligible members, it is assumed 100% will elect the normal form of payment at retirement.

Valuation Compensation
The valuation earnings are 2025 rates of compensation.

Benefit and Compensation Limits
Projected benefits are restricted to allow for the section 401(a)(17) limitations and the individual defined benefit plan limitation as specified in section 415 of the Internal Revenue Code. The maximum dollar limits in effect on the date of valuation are assumed to continue without change.

Reemployment
There is no allowance made for potential reinstatement of terminated members upon reemployment.

Future Layoffs and Plant Shutdowns
There is no explicit assumption for the incidence of future layoffs or plant shutdowns. Accordingly, there is no allowance made for potential increases in liabilities resulting from these events. If the shutdown or permanent layoff provisions of the plan should become applicable, liabilities can be expected to increase significantly.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Valuation of Plan Assets
The value of plan assets is used to calculate contribution requirements under ERISA. The value of plan assets is determined by recognizing asset gains and losses over a period of three years. Asset gains and losses are defined as the difference between the expected return on the market value of assets, using a return assumption not to exceed the third segment rate, and the actual return on the market value of assets. This gain or loss is recognized over a period of three years at 33% per year, beginning in the current year. The value of plan assets must be within 10% of the market value of assets.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

Expected Return on Assets

2023 Plan Year	6.21% The applicable third segment rate limitation is 5.74%.
2024 Plan Year	6.64% The applicable third segment rate limitation is 5.59%.
2025 Plan Year	6.64% The applicable third segment rate limitation is 5.50%.

Expenses
Assumed expenses included in target normal cost are estimated as 0.12% of the market value of assets plus $900,000 plus PBGC premiums.

Actuarial Cost Method
The method used to calculate the ERISA target normal cost and funding target is the unit credit cost method.

Valuation Date
The valuation date is January 1, 2025.

Rationale for Assumptions
For each economic and demographic assumption that has a significant effect on the measurement, and that the actuary has determined does not significantly conflict with what, in the actuary's professional judgement, is reasonable for the purpose of the measurement, the information and analysis used to support this determination are documented in the 2024 GDC Pension OPEB Experience Dashboard, 2014-2020 GDC Experience Study Report dated December 10, 2021, and subsequent communications between Aon and General Dynamics. General Dynamics approved the assumptions in December 2024.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Actuarial Assumptions and Methods

Discussion of Actuarial Assumptions and Methods

For the funding valuation, the allowable interest rates and mortality tables available to measure plan liabilities are prescribed by IRC section 412. Aon provided guidance with respect to the alternative interest rate and mortality table options, and it is our belief that the options prescribed by General Dynamics Corporation are appropriate for funding purposes. It is our belief that all other actuarial assumptions used for the funding valuation represent reasonable expectations of anticipated plan experience. The actuarial cost and amortization methods used are prescribed by IRC section 412. While the method used to value assets is prescribed by General Dynamics Corporation, Aon provided guidance with respect to the use of this method, and it is our belief that the method is appropriate for funding purposes.

Calculation of Normal Costs and Liabilities

The method used to calculate the ERISA target normal cost and funding target is the unit credit cost method. The funding target under IRC section 430 is calculated as the present value of all benefits that have been accrued or earned under the plan as of the first day of the plan year, based on current service and current pay. The target normal cost is the present value of all benefits expected to accrue or be earned under the plan during the plan year, including any increase in benefits earned in prior plan years attributable to compensation increases in the current plan year, plus certain trust expenses.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the ERISA assumptions is the ERISA funding target. The target normal cost is the present value of the benefits earned during the year.

For calculating the actuarial present value of vested benefits, benefits at each decrement age are determined in the same manner but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, certain ancillary benefits have been treated as vested consistent with PBGC premium regulations.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

2025 Schedule SB, Line 22 – Description of Weighted Average Retirement Age

The weighted average retirement age reported in Line 22 has been computed in the following manner:

Early retirement is permitted at employee's option (1) between ages 60 and 65 with ten years of service, (2) between ages 55 and 60 with years of age plus service equal to 85 or more, or (3) before age 55 with 30 years of service. A member is assumed to first become eligible to retire under these provisions, on average, at age 60. The average assumed retirement age for a member first eligible to retire at age 60 is determined by applying the assumed retirement rate at each age to the percentage of members who have not yet been expected to retire. This produces for each eligible age the percentage of members who are expected to retire at that age. These percentages are then used as weights to determine the average assumed retirement age.

The assumed annual rates of retirement for active participants are summarized in the following table:

Annual Rates of Retirement

Age	Retirement Rate	Age	Retirement Rate
55	1.0%	63	17.0%
56	1.0	64	9.0
57	4.0	65	15.0
58	5.0	66	15.0
59	5.0	67	15.0
60	14.0	68	15.0
61	14.0	69	15.0
62	10.0	70 & Over	100.0

A rate of 1.0% is used for all ages prior to age 55, if eligible to retire.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Actuarial Assumptions and Methods

For ERISA Requirements

Interest Rates
The three-segment yield curve interest rates with a four month lookback (ending in the month of August 2024), each adjusted as needed to reflect the 5.00% floor under ARPA and to fall within the 25-year average interest rate corridor under HATFA and subsequent legislation, are used for minimum funding purposes. All of the rates shown below are compounded annually.

1st Segment Rate (Years 0 to 4)	5.07%
2nd Segment Rate (Years 5 to 19)	5.31%
3rd Segment Rate (Years 20 and After)	5.50%

Salary Scale
Salaries are assumed to increase by 4.00% during each year subsequent to the date of valuation.

Social Security
The 2025 taxable wage base of $176,100 is assumed to increase 3.20% per year, compounded annually.

Retirement
The retirement decrement assumptions for active participants are summarized in Exhibit A. The weighted average retirement age is 65. All terminated vested members are assumed to retire at age 65 or immediately, if over age 65.

For at-risk calculations, participants who are eligible to retire within the next 10 years are assumed to retire immediately upon eligibility. The at-risk assumption for the assumed form of payment is the Joint Life Annuity form of payment. This form of payment results in the highest present value.

Mortality
Base Table:
Pri-2012 total employee and nondisabled annuitant tables

Projection:
Mortality rates are generational, projected from the base year 2012 using 2024 Adjusted Scale MP-2021

Withdrawal
The withdrawal decrement assumptions are summarized in Exhibit B.

Disability
The disability decrement assumptions are summarized in Exhibit C. Mortality following disability assumed to be in accordance with table provided in IRS Revenue Ruling if qualified as disabled under Title II of Social Security Act, otherwise regular mortality is assumed.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Decrement Timing
Decrements are assumed to apply as of the beginning of the year.

Members on Leave or Layoff
Members on leave or layoff whose leave or layoff is assumed to be temporary are treated as active for valuation purposes.

For members whose leave or layoff is assumed to be permanent, no rates of withdrawal, disability or retirement are assumed. A member on leave due to long term disability is assumed to retire when first eligible. Otherwise, a member on leave is treated as terminated for valuation purposes and assumed to retire at normal retirement age. If a member on layoff is expected to become eligible for retirement prior to the end of their layoff period for severance, they are assumed to retire when first eligible. Otherwise, they are assumed to terminate at the end of their layoff period for severance and subsequently retire at normal retirement age.

Probabilities Related to Spouse Option
For members covered by a benefit structure with a pre-retirement surviving spouse option, it is assumed that 65% of male members and 45% of female members are assumed to be married; husbands are assumed to be two years older than wives.

Form of Payment Election Option
For eligible members, it is assumed 100% of married members will elect i) the subsidized 60% contingent annuity option with pop-up feature at retirement for benefits accrued under the UAW Benefit Formula, and ii) the subsidized 60% contingent annuity option with 10 years certain and pop-up feature at retirement for benefits accrued under the SERP Benefit Formula. For unmarried eligible members, it is assumed 100% will elect the normal form of payment at retirement.

Valuation Compensation
The valuation earnings are 2025 rates of compensation.

Benefit and Compensation Limits
Projected benefits are restricted to allow for the section 401(a)(17) limitations and the individual defined benefit plan limitation as specified in section 415 of the Internal Revenue Code. The maximum dollar limits in effect on the date of valuation are assumed to continue without change.

Reemployment
There is no allowance made for potential reinstatement of terminated members upon reemployment.

Future Layoffs and Plant Shutdowns
There is no explicit assumption for the incidence of future layoffs or plant shutdowns. Accordingly, there is no allowance made for potential increases in liabilities resulting from these events. If the shutdown or permanent layoff provisions of the plan should become applicable, liabilities can be expected to increase significantly.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Valuation of Plan Assets
The value of plan assets is used to calculate contribution requirements under ERISA. The value of plan assets is determined by recognizing asset gains and losses over a period of three years. Asset gains and losses are defined as the difference between the expected return on the market value of assets, using a return assumption not to exceed the third segment rate, and the actual return on the market value of assets. This gain or loss is recognized over a period of three years at 33% per year, beginning in the current year. The value of plan assets must be within 10% of the market value of assets.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

Expected Return on Assets

2023 Plan Year	6.21% The applicable third segment rate limitation is 5.74%.
2024 Plan Year	6.64% The applicable third segment rate limitation is 5.59%.
2025 Plan Year	6.64% The applicable third segment rate limitation is 5.50%.

Expenses
Assumed expenses included in target normal cost are estimated as 0.12% of the market value of assets plus $900,000 plus PBGC premiums.

Actuarial Cost Method
The method used to calculate the ERISA target normal cost and funding target is the unit credit cost method.

Valuation Date
The valuation date is January 1, 2025.

Rationale for Assumptions
For each economic and demographic assumption that has a significant effect on the measurement, and that the actuary has determined does not significantly conflict with what, in the actuary's professional judgement, is reasonable for the purpose of the measurement, the information and analysis used to support this determination are documented in the 2024 GDC Pension OPEB Experience Dashboard, 2014-2020 GDC Experience Study Report dated December 10, 2021, and subsequent communications between Aon and General Dynamics. General Dynamics approved the assumptions in December 2024.

Actuarial Assumptions and Methods

Discussion of Actuarial Assumptions and Methods

For the funding valuation, the allowable interest rates and mortality tables available to measure plan liabilities are prescribed by IRC section 412. Aon provided guidance with respect to the alternative interest rate and mortality table options, and it is our belief that the options prescribed by General Dynamics Corporation are appropriate for funding purposes. It is our belief that all other actuarial assumptions used for the funding valuation represent reasonable expectations of anticipated plan experience. The actuarial cost and amortization methods used are prescribed by IRC section 412. While the method used to value assets is prescribed by General Dynamics Corporation, Aon provided guidance with respect to the use of this method, and it is our belief that the method is appropriate for funding purposes.

Calculation of Normal Costs and Liabilities

The method used to calculate the ERISA target normal cost and funding target is the unit credit cost method. The funding target under IRC section 430 is calculated as the present value of all benefits that have been accrued or earned under the plan as of the first day of the plan year, based on current service and current pay. The target normal cost is the present value of all benefits expected to accrue or be earned under the plan during the plan year, including any increase in benefits earned in prior plan years attributable to compensation increases in the current plan year, plus certain trust expenses.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the ERISA assumptions is the ERISA funding target. The target normal cost is the present value of the benefits earned during the year.

For calculating the actuarial present value of vested benefits, benefits at each decrement age are determined in the same manner but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, certain ancillary benefits have been treated as vested consistent with PBGC premium regulations.

Normal Retirement Date
Age 65.

Early Retirement Date
At employee's option: (i) between ages 60 and 65 with 10 years of credited service, (ii) between ages 55 and 60 with years of age plus credited service equal to 85 or more, or (iii) before age 55 with 30 years of credited service.

At company's option or under mutually satisfactory conditions, between ages 55 and 65 with 10 years of credited service.

Disability Retirement Date
Ten years of credited service.

Normal Retirement Pension

UAW Benefit Formula
The applicable benefit rate per year of credited service accrued during service accrual period as shown below:

Service Accrual Period	Benefit Rate
Prior to 1/1/2020	$51.00
1/1/2020 - 12/31/2020	52.00
1/1/2021 - 12/31/2023	53.00
1/1/2024 - 12/31/2024	58.00
1/1/2025 - 12/31/2025	61.00
1/1/2026 - 12/31/2026	64.00
On and After 1/1/2027	67.00

SERP Benefit Formula
A monthly pension for salaried employees equal to the benefit accrued to date (beginning with $0 at December 31, 2015) plus 1.50% of base salary over monthly benefit base per year of credited service earned after December 31, 2015.

2025 Schedule SB, Part V – Summary of Plan Provisions

Annual benefit base equals annual benefit base effective for prior plan year plus 50% of any increase in the Social Security taxable wage base rounded down to the nearest $300. The annual benefit base for 2025 is $82,200.

Early Retirement Pension

UAW Benefit Formula

A member retiring early at his own option will be entitled to the accrued normal retirement benefit reduced by the following early retirement factors:

Age When Benefit Commences	Early Retirement Factor	Age When Benefit Commences	Early Retirement Factor
47	30.4%	55	57.9%
48	32.8	56	63.5
49	35.4	57	69.4
50	38.3	58	75.2
51	41.5	59	80.8
52	45.0	60	86.7
53	48.9	61	93.3
54	53.2	62 & Over	100.0

If the member has 30 or more years of credited service, or has years of age plus credited service equal to 85 or more, then no reduction applies to payments payable at the member's Social Security Normal Retirement Age less 36 months and later.

If the member has 30 or more years of credited service, a monthly supplement is payable to the member's Social Security Normal Retirement Age less 36 months, which when added to the basic and temporary benefits, equals $3,250 per month. This supplement is subject to an earnings test.

If the member is at least age 55 with less than 30 years of credited service, an interim monthly supplement per year of credited service, payable to the member's Social Security Normal Retirement Age less 36 months, is as follows:

Age When Benefit Commences	Supplement
55	$31.00
56	32.00
57	33.00
58	34.00
59	35.00
60	36.00
61	36.00

A member who retires as the result of a permanent plant shutdown, permanent layoff or at the company's option under mutually satisfactory conditions subsequent to age 50 with 10 years of credited service, shall be entitled to unreduced accrued normal retirement benefits plus a temporary monthly pension, payable to the member's Social Security Normal Retirement Age less 36 months, equal to $46.00 for each year of credited service, up to 30 years. A supplemental pension, as outlined above, may also be payable.

2025 Schedule SB, Part V – Summary of Plan Provisions

SERP Benefit Formula
At employee's option between ages 55 and 60 with years of age plus credited service equal to 85 or more, accrued normal retirement pension reduced by the following early retirement factors:

Age When Benefit Commences	Early Retirement Factor	Age When Benefit Commences	Early Retirement Factor
55	57.9%	58	75.2%
56	63.5	59	80.8
57	69.4	60	86.7*

* This factor is used only to compute factors for retirement between ages 59 and 60. When termination of employment occurs on or after the employee's 60th birthday, the early payment factor is 100%.

At employee's option between ages 60 and 65 with 10 years of credited service, at company's option or under mutually satisfactory conditions, unreduced accrued normal retirement benefit.

For commencement prior to age 55, accrued normal retirement pension reduced on an actuarial equivalent basis.

Disability Retirement Pension
Accrued normal retirement benefit plus a temporary monthly pension, payable to the earlier of the member's Social Security Normal Retirement Age less 36 months or commencement of Social Security disability benefits, equal to $46.00 for each year of credited service, up to 30 years.

Available Forms of Payment
For benefits accrued under the UAW Benefit Formula, the normal form of payment is a single life annuity. Optional forms also available are 60% contingent annuity option with pop-up feature on a subsidized basis and 75% contingent annuity option on an actuarial equivalent basis. For benefits accrued under the SERP Benefit Formula, the normal form of payment is a 10 year certain and life annuity. Optional forms also available are 60% contingent annuity option with 10 years certain and pop-up feature on a subsidized basis and 75% contingent annuity option on an actuarial equivalent basis.

Termination
If terminating employment after completion of five years of continuous service, the accrued normal retirement pension is payable commencing at age 65. The benefit accrued under the UAW Benefit Formula may commence prior to age 65 on an actuarial equivalent basis if early retirement requirements are satisfied. The benefit accrued under the SERP Benefit Formula may commence prior to age 65 on an actuarial equivalent basis.

Death Before Retirement
If a member dies while eligible for early retirement at employee option and leaves a surviving spouse, the surviving spouse will receive the benefit accrued under the UAW Benefit Formula that would have been payable had the member retired at age 62 and elected the surviving spouse option plus the benefit accrued under the SERP Benefit Formula that would have been payable had the member retired at age 65 and elected the surviving spouse option.

2025 Schedule SB, Part V – Summary of Plan Provisions

If a member dies while eligible for a vested benefit but prior to eligibility for early retirement and leaves a surviving spouse, the surviving spouse will receive 60% (50% for disabled members for the portion of the benefit accrued under the UAW Benefit Formula) of the benefit that would have been payable had the member terminated employment on the date of death with payment of benefits to commence on the earliest date permitted thereafter.

Death After Retirement
Depends on the form of pension elected.

Pension Enhancement
Members retiring from active service will be entitled to a pension enhancement benefit of $94 per month, prorated for less than 10 years of credited service at retirement, commencing at age 65. An additional benefit, in the same amount, will be payable when an eligible spouse attains age 65. For a retired member who has not reached age 65, a pension enhancement benefit is payable if an eligible spouse is age 65 or older.

If a member terminates with a deferred vested benefit, the pension enhancement benefit will be reduced by the ratio of the member's years of service at termination to the years of service he would have had at age 65.

2025 Schedule SB, Line 22 – Description of Weighted Average Retirement Age

The weighted average retirement age reported in Line 22 has been computed in the following manner:

Early retirement is permitted at employee's option (1) between ages 60 and 65 with ten years of service, (2) between ages 55 and 60 with years of age plus service equal to 85 or more, or (3) before age 55 with 30 years of service. A member is assumed to first become eligible to retire under these provisions, on average, at age 60. The average assumed retirement age for a member first eligible to retire at age 60 is determined by applying the assumed retirement rate at each age to the percentage of members who have not yet been expected to retire. This produces for each eligible age the percentage of members who are expected to retire at that age. These percentages are then used as weights to determine the average assumed retirement age.

The assumed annual rates of retirement for active participants are summarized in the following table:

Annual Rates of Retirement

Age	Retirement Rate	Age	Retirement Rate
55	1.0%	63	17.0%
56	1.0	64	9.0
57	4.0	65	15.0
58	5.0	66	15.0
59	5.0	67	15.0
60	14.0	68	15.0
61	14.0	69	15.0
62	10.0	70 & Over	100.0

A rate of 1.0% is used for all ages prior to age 55, if eligible to retire.

SERP Benefit Formula
A monthly pension for salaried employees equal to the benefit accrued to date (beginning with $0 at December 31, 2015) plus 1.50% of base salary over monthly benefit base per year of credited service earned after December 31, 2015.

2025 Schedule SB, Part V – Summary of Plan Provisions

Annual benefit base equals annual benefit base effective for prior plan year plus 50% of any increase in the Social Security taxable wage base rounded down to the nearest $300. The annual benefit base for 2025 is $82,200.

Early Retirement Pension

UAW Benefit Formula

A member retiring early at his own option will be entitled to the accrued normal retirement benefit reduced by the following early retirement factors:

Age When Benefit Commences	Early Retirement Factor	Age When Benefit Commences	Early Retirement Factor
47	30.4%	55	57.9%
48	32.8	56	63.5
49	35.4	57	69.4
50	38.3	58	75.2
51	41.5	59	80.8
52	45.0	60	86.7
53	48.9	61	93.3
54	53.2	62 & Over	100.0

If the member has 30 or more years of credited service, or has years of age plus credited service equal to 85 or more, then no reduction applies to payments payable at the member's Social Security Normal Retirement Age less 36 months and later.

If the member has 30 or more years of credited service, a monthly supplement is payable to the member's Social Security Normal Retirement Age less 36 months, which when added to the basic and temporary benefits, equals $3,250 per month. This supplement is subject to an earnings test.

If the member is at least age 55 with less than 30 years of credited service, an interim monthly supplement per year of credited service, payable to the member's Social Security Normal Retirement Age less 36 months, is as follows:

Age When Benefit Commences	Supplement
55	$31.00
56	32.00
57	33.00
58	34.00
59	35.00
60	36.00
61	36.00

A member who retires as the result of a permanent plant shutdown, permanent layoff or at the company's option under mutually satisfactory conditions subsequent to age 50 with 10 years of credited service, shall be entitled to unreduced accrued normal retirement benefits plus a temporary monthly pension, payable to the member's Social Security Normal Retirement Age less 36 months, equal to $46.00 for each year of credited service, up to 30 years. A supplemental pension, as outlined above, may also be payable.

2025 Schedule SB, Part V – Summary of Plan Provisions

SERP Benefit Formula
At employee's option between ages 55 and 60 with years of age plus credited service equal to 85 or more, accrued normal retirement pension reduced by the following early retirement factors:

Age When Benefit Commences	Early Retirement Factor	Age When Benefit Commences	Early Retirement Factor
55	57.9%	58	75.2%
56	63.5	59	80.8
57	69.4	60	86.7*

* This factor is used only to compute factors for retirement between ages 59 and 60. When termination of employment occurs on or after the employee's 60th birthday, the early payment factor is 100%.

At employee's option between ages 60 and 65 with 10 years of credited service, at company's option or under mutually satisfactory conditions, unreduced accrued normal retirement benefit.

For commencement prior to age 55, accrued normal retirement pension reduced on an actuarial equivalent basis.

Disability Retirement Pension
Accrued normal retirement benefit plus a temporary monthly pension, payable to the earlier of the member's Social Security Normal Retirement Age less 36 months or commencement of Social Security disability benefits, equal to $46.00 for each year of credited service, up to 30 years.

Available Forms of Payment
For benefits accrued under the UAW Benefit Formula, the normal form of payment is a single life annuity. Optional forms also available are 60% contingent annuity option with pop-up feature on a subsidized basis and 75% contingent annuity option on an actuarial equivalent basis. For benefits accrued under the SERP Benefit Formula, the normal form of payment is a 10 year certain and life annuity. Optional forms also available are 60% contingent annuity option with 10 years certain and pop-up feature on a subsidized basis and 75% contingent annuity option on an actuarial equivalent basis.

Termination
If terminating employment after completion of five years of continuous service, the accrued normal retirement pension is payable commencing at age 65. The benefit accrued under the UAW Benefit Formula may commence prior to age 65 on an actuarial equivalent basis if early retirement requirements are satisfied. The benefit accrued under the SERP Benefit Formula may commence prior to age 65 on an actuarial equivalent basis.

Death Before Retirement
If a member dies while eligible for early retirement at employee option and leaves a surviving spouse, the surviving spouse will receive the benefit accrued under the UAW Benefit Formula that would have been payable had the member retired at age 62 and elected the surviving spouse option plus the benefit accrued under the SERP Benefit Formula that would have been payable had the member retired at age 65 and elected the surviving spouse option.

2025 Schedule SB, Part V – Summary of Plan Provisions

If a member dies while eligible for a vested benefit but prior to eligibility for early retirement and leaves a surviving spouse, the surviving spouse will receive 60% (50% for disabled members for the portion of the benefit accrued under the UAW Benefit Formula) of the benefit that would have been payable had the member terminated employment on the date of death with payment of benefits to commence on the earliest date permitted thereafter.

Death After Retirement
Depends on the form of pension elected.

Pension Enhancement
Members retiring from active service will be entitled to a pension enhancement benefit of $94 per month, prorated for less than 10 years of credited service at retirement, commencing at age 65. An additional benefit, in the same amount, will be payable when an eligible spouse attains age 65. For a retired member who has not reached age 65, a pension enhancement benefit is payable if an eligible spouse is age 65 or older.

If a member terminates with a deferred vested benefit, the pension enhancement benefit will be reduced by the ratio of the member's years of service at termination to the years of service he would have had at age 65.
