Independent Auditors' Report

To the Plan Participants and Plan Administrator
General Dynamics Retirement Plan (Electric Boat and Mission Systems):

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of General Dynamics Retirement Plan (Electric Boat and Mission Systems) (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits and of accumulated plan benefits as of December 31, 2025 and 2024, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 2025, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2025 and 2024, and for the year ended December 31, 2025, stating that the certified investment information, as described in Note 6 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditors' Responsibilities for the Audit of the Financial Statements section:

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with U.S. generally accepted accounting principles.
- The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical

requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information

to assess whether they are in accordance with the presentation and disclosure requirements of U.S. generally accepted accounting principles.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with U.S. generally accepted accounting principles.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedules Required by ERISA

The supplemental schedules of Schedule G, Part III – Schedule of Nonexempt Transactions for the year ended December 31, 2025, Schedule H, Line 4(i) – Schedule of Assets (Held at End of Year) as of December 31, 2025, and Schedule H, Line 4(j) – Schedule of Reportable Transactions for the year ended December 31, 2025 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion:

- The form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- The information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

(1) Plan Description

The following description of the General Dynamics Retirement Plan (Electric Boat and Mission Systems) (the Plan) provides only general information. Participants should refer to the Plan Documents for a more complete description of the Plan's provisions.

(a) General

The Plan is a noncontributory defined benefit plan covering certain employees of General Dynamics Corporation (the Company, the Plan Sponsor or the Plan Administrator) who are employed at those Electric Boat business unit locations engaged in government contracting activities under the Electric Boat Trust and certain employees from General Dynamics Mission Systems, Inc., a subsidiary of the Company, under the Mission Systems Trust. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Plan participates in the General Dynamics Corporation Group Retirement Trust (the Master Trust) along with certain other plans also sponsored by the Company.

(b) Pension Benefits

The Plan provides varying types of benefits under multiple benefit structures as defined in the sub-plans of the Plan Documents. The Plan provides benefits under normal, early, or disability retirement as specified in the Plan Document.

The Plan is closed to new hires. Eligible participants continue to accrue benefits based on either service, or service and compensation.

(c) Risks and Uncertainties

The Plan invests in the Master Trust, which invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, liquidity, and credit risks, as well as the risks associated with global events. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimations and assumptions in the near term would be material to the financial statements.

(2) Summary of Accounting Policies

(a) Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

(b) Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) requires Plan management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

(c) Investment Valuation and Income Recognition

The Plan's investment is reported at fair value. Fair value is the price that would be received by the Plan to sell an asset or paid by the Plan to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date in the Plan's principal or most advantageous market for the asset or liability. The Plan's sole investment is its interest in the Master Trust.

Purchases and sales of investments are recorded on the trade date. Investment income consists of dividend income, interest income and net appreciation in the fair value of investments. Dividends are recognized on the ex-dividend date. Interest income is recorded on an accrual basis. Net appreciation includes the gains or losses on investments bought and sold as well as held during the year.

(d) Payment of Benefits

Benefits are recorded when paid.

(e) Administrative Expenses

The Company administers the Plan, and administrative costs are paid by the Company or the Plan. Premiums paid to the Pension Benefit Guaranty Corporation (the PBGC), a U.S. government agency, Trustee fees and administrative costs paid by the Plan are reflected in the financial statements as administrative expenses of the Plan. There were certain other administrative costs paid by the Company for the year ended December 31, 2025. These costs were primarily related to professional service fees.

(3) Actuarial Assumptions for Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by the Plan's independent consulting actuary and is the amount resulting from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service Plan participants have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on the benefit structure for which the retiree or active employee is eligible for in accordance with the Plan Documents. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The principal assumptions used in the determination of the present value of accumulated plan benefits as of December 31, 2025 and 2024, were as follows:

- Expected long-term rate of return on plan assets – 6.68% and 6.36%, compounded annually, as of December 31, 2025 and 2024, respectively
- Mortality basis – RP-2014 total employee and healthy annuitant mortality tables with generational projection from the base year 2014 using Aon U.S. Adjusted Mortality Improvement Scale (2025) for December 31, 2025, and RP-2014 total employee and healthy annuitant mortality tables with generational projection from the base year 2014 using Aon U.S. Adjusted Mortality Improvement Scale (2024) (formerly known as the "Aon U.S. Endemic Mortality Improvement Scale (2024)") for December 31, 2024
- Retirements – rates from age 49 through age 70
- Withdrawals – graduated rates based on age

The change in assumptions was mainly due to the Plan Sponsor updating the investment mix under the General Dynamics Investment Policy of the Plan. As a result, the investment mix for the Mission Systems Trust portion of the Plan was shifted from 50% return-seeking and 50% fixed-income investments to 60% return-seeking and 40% fixed-income investments effective April 1, 2025. Due to the shift in investment mix, the expected long-term rate of return on plan assets used to calculate the present value of accumulated plan benefits increased resulting in a decrease in the present value of accumulated benefits at December 31, 2025.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

(4) Funding Policy

The funding policy of the Plan is to fund the defined benefit retirement plan in a manner that optimizes the tax deductibility and contract recovery of contributions, considered within the Company's capital deployment framework. The Company may make discretionary contributions in addition to the required contributions to the Plan to provide not only for benefits attributed to service to date but also for benefits to be earned in the future. Such contribution amounts must at least meet or exceed the minimum funding requirements under ERISA as determined by the Plan's actuary. The Company met the minimum funding requirements of ERISA for the year ended December 31, 2025.

(5) 401(h) Account

The Plan includes medical-benefit components in addition to the normal retirement benefits to fund a portion of the postretirement obligations for retirees and their beneficiaries in accordance with Section 401(h) of the Internal Revenue Code (the IRC). A 401(h) account was established and maintained in the Plan for the net assets related to the medical-benefit component. In accordance with IRC Section 401(h), the Plan investments in the 401(h) Account may not be used for, or diverted to, any purpose other than providing health benefits for retirees and their beneficiaries. Any assets transferred to the 401(h) Account from the defined benefit pension plan in a qualified transfer of excess pension plan assets (and any income allocable

thereto) that are not used during the plan year must be transferred out of the 401(h) Account to the pension plan. The related obligations for health benefits are not included in the Plan's obligations in the Statement of Accumulated Plan Benefits but are reflected as obligations in the financial statements of the General Dynamics IS&T Retiree Benefits Plan. The eligible Plan participants may contribute to the 401(h) Account. Employer contributions or qualified transfers to the 401(h) Account are determined annually and are at the discretion of the Company.

(6) Trustee Certified Information

The Plan Administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Investment in the Master Trust at fair value and 401(h) net assets and obligations as of December 31, 2025 and 2024 and the participation in net income of the Master Trust for the year ended December 31, 2025 that are disclosed in the accompanying financial statements and ERISA-required supplemental schedule and related Notes 6 and 7 were obtained or derived from information supplied to the Plan Administrator and certified as complete and accurate by The Northern Trust Company (the Trustee).

The assets of the Plan are combined with the assets of other retirement plans of the Company into the Master Trust for investment purposes. Each participating retirement plan has a divided interest in the Master Trust. BlackRock Financial Management, Inc. serves as the investment advisor of the Master Trust. The assets of the Master Trust are managed by independent investment management firms. The Trustee holds the assets of the Master Trust. The value shown in the accompanying financial statements represents the Plan's interest in the reported assets of the Master Trust. Investment income is allocated daily to each plan based on its interest in the market value of the underlying investments in the Master Trust.

The following table presents the net assets of the Master Trust and the Plan's and the 401(h) Account's interests in the Master Trust as of December 31, 2025:

(7) Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described as follows:

- Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2 – Inputs to the valuation methodology include:
  - Quoted prices for similar assets or liabilities in active markets;
  - Quoted prices for identical or similar assets or liabilities in inactive markets;
  - Inputs other than quoted prices that are observable for the assets or liabilities;
  - Inputs that are derived principally from, or corroborated by, observable market data by correlation or other means.

  If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value:

Registered investment companies: Valued at the closing price reported on the active market in which the individual securities are traded (Level 1).

Interest bearing cash: The fair value of interest bearing cash balances and overnight deposit accounts have been determined based upon the deposit account balance, with no discounts for credit quality or liquidity restrictions or at the net asset value as provided by the fund managers (Level 2).

Units of collective trusts: The fair values of these private investment securities are determined using the net asset value as provided by the fund managers (Level 2). Investments are redeemable daily at net asset value, and there are no significant restrictions on redemptions.

Hedge funds, real estate investment trust and limited partnership: The fair values of these private investment securities are determined using the net asset value as provided by the fund managers, which is a practical expedient for fair value.

The following tables set forth by level, within the fair value hierarchy, the Master Trust's assets at fair value as of December 31, 2025 and 2024:

	December 31, 2025			
	Fair value	Quoted price in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)

Total investments, at fair value	$ 9,614,978,531			

*Investments measured at fair value using net asset value per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table for such investments are intended to permit reconciliation of the fair value hierarchy presented for the Master Trust investments to the investments at fair value presented in Note 6.

The following table details relevant investment data for investments measured at fair value based on net asset value per share held within the Master Trust as of December 31, 2025 and 2024:

Investment Type	Investment Strategy	2025 Fair Value Determined Using NAV	2024 Fair Value Determined Using NAV	Unfunded Commitments	Redemption Restrictions
Multi-strategy hedge fund of funds	To target attractive long-term risk adjusted absolute returns with lower volatility than the broad equity markets by investing in the equity long/short, event driven, relative value and tactical trading sectors through a portfolio of investment vehicles managed by trading advisors.	$ -	$ 1,215,272	None	Monthly redemptions with a 45-day notice requirement (a)(b)
Macro-strategy hedge fund	To invest in a broadly diversified portfolio of global securities.	383,105	1,102,128	None	Weekly to monthly with four business days to two calendar months notice (b)
Real estate limited partnership	To invest directly or indirectly through partnership interest in real estate investments, mortgages and other loans.	141,547,663	188,254,934	None	Quarterly redemptions with a 90-day notice requirement (b)
Real estate investment trust	To invest in diversified U.S. real estate assets, including retail, multi-family, office and industrial, that will produce core real estate returns.	68,058,465	143,518,166	None	Quarterly redemptions with a 45-day notice requirement (b)
		$ 209,989,233	$ 334,090,500		

(a) As the sole investor in the BlackRock Multi-Strategy Fund of Funds, Plan management requested to liquidate its investment in the fund during 2019. Due to redemption restrictions of the underlying investments of the fund, limitations were put into effect causing the fund to be liquidated over time providing for payments of such request as cash became available. Final liquidation of the fund occurred during 2025.

(b) During 2022, Plan management requested to liquidate its investments in the remaining hedge funds, the real estate limited partnership, and the real estate investment trust. Due to redemption restrictions of the underlying investments of the fund, one of the hedge funds remains in the Master Trust and is expected to be liquidated during 2026. All other hedge funds were liquidated during 2025 and 2024. Final liquidation of the real estate limited partnership and the real estate investment trust is expected to occur in 2028.

(8) Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by letter dated November 9, 2017, that the Plan is qualified and the Master Trust established under the Plan is tax exempt under the appropriate sections of the IRC. Although the Plan has been amended subsequent to the date of the latest determination from the IRS, the Plan Sponsor and the Plan's legal counsel believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

U.S. GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2025 and 2024, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions. There are currently no audits in progress for any tax periods. Under the applicable IRS statute of limitations, the Plan is no longer open to income tax examinations for years prior to 2022.

(9) Plan Termination

The Plan was established by the Company with the intention that it shall be operated indefinitely and that contributions to the Plan shall continue for an indefinite period. Although it has not expressed any intention to do so, the Company reserves the right at any time to terminate the Plan. In the event of termination, participants become fully vested and the Master Trust investments will be used to pay benefits to those who are eligible according to an orderly procedure as prescribed by ERISA, its related regulations and the Plan Documents, generally to provide the following benefits in the order indicated:

- Other vested benefits insured by the PBGC up to the applicable limitations (discussed below).
- All other vested benefits (that is, vested benefits not insured by the PBGC).
- All non-vested benefits.

The PBGC insures benefits under the Plan if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain survivors' benefits. However, the PBGC does not guarantee all types of benefits under covered plans. The amount of benefit protection is subject to certain limitations. The PBGC guarantees vested benefits at the level in effect on the date of plan termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

(10) Related Party and Party-in-Interest Transactions

Investments in certain collective funds held in the Master Trust are managed by Northern Trust Investments, Inc., an affiliate of the Trustee, in the amounts of $2,709,779,956 and $2,795,388,711, as of December 31, 2025 and 2024, respectively. An investment in a hedge fund in the Master Trust was managed by BlackRock Financial Management, Inc., in the amount of $864,450 as of December 31, 2024. Investments in certain

collective funds held in the Master Trust are managed by BlackRock Institutional Trust Company, N.A., an affiliate of BlackRock Financial Management, Inc., in the amounts of $4,122,206,835 and $3,254,485,210 as of December 31, 2025 and 2024, respectively. These transactions qualify as related party transactions. There were also fees paid to BlackRock Financial Management, Inc. and The Northern Trust Company from the Master Trust and the Plan that qualify as related party transactions. The Master Trust also holds investment funds issued by certain investment managers which also qualify as exempt party-in-interest investments. Fees paid to other service providers also qualify as exempt party-in-interest transactions.

As of December 31, 2025, the Master Trust recorded a liability of $189,700,000 due to the Trustee. This amount represents funds advanced by the Trustee on behalf of certain participating plans to fund contributions and address a temporary negative cash position resulting from the timing of investment liquidations. The Trustee was reimbursed on January 2, 2026.

(11) Reconciliation of Financial Statements to Form 5500

The following is a reconciliation of net assets available for benefits as reported in the financial statements to the Form 5500 as of December 31, 2025 and 2024:

	2025	2024
Net assets available for benefits as reported in the financial statements	$ 4,372,630,073	$ 4,016,899,767
2025 Contributions made during 2026*	132,000,000	–
401(h) account assets	65,823,845	59,969,491
Net assets as reported in the Form 5500	$ 4,570,453,918	$ 4,076,869,258

The following is a reconciliation of the net increase in net assets reported in the financial statements to the net income as reported on the Form 5500 including transfers for the year ended December 31, 2025:

Net increase on the financial statements	$ 355,730,306
2025 Contributions made during 2026*	132,000,000
Net increase in assets held in 401(h) accounts	5,854,354
Net income as reported on Form 5500	$ 493,584,660

* Contribution made subsequent to December 31, 2025. Reported in 2025 Schedule SB and H of Form 5500 as a 2025 related contribution but not reported in financial statements, in conformity with accounting principles generally accepted in the United States.

The assets of the 401(h) Account included in the Form 5500 are not available to pay pension benefits but can be used only to pay retiree health benefits and accordingly are reflected as 401(h) account assets with an offsetting obligation in the accompanying financial statements

(12) Master Trust Investments Presentation

The statement of net assets available for benefits presents Investments in Master Trust as a single line item at fair value, while the Form 5500 Schedule H reports both assets held within the Master Trust and certain assets reported as held outside of the Master Trust. Although these assets are collectively invested with other

Master Trust assets, the Plan holds a direct and divided interest in them, and, as permitted by the Department of Labor, Plan management has elected to present these specific assets separately in the Form 5500 as of December 31, 2025. In the financial statements, these assets remain included in the "Investments in Master Trust at fair value" line item, but they are also listed individually on the supplemental schedule of assets (held at year end) as Plan assets to reflect the Plan's direct and divided ownership interest.

(13) Subsequent Events

Plan management evaluated subsequent events and transactions that occurred after December 31, 2025 through September 25, 2026, which is the date the financial statements were available to be issued. No events were deemed relevant for disclosure.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Actuarial Assumptions and Methods

For ERISA Requirements

Interest Rates

The three-segment yield curve interest rates with a four month lookback (ending in the month of August 2024), each adjusted as needed to reflect the 5.00% floor under ARPA and to fall within the 25-year average interest rate corridor under HATFA and subsequent legislation, are used for minimum funding purposes. All of the rates shown below are compounded annually.

1st Segment Rate (Years 0 to 4)	5.07%
2nd Segment Rate (Years 5 to 19)	5.31%
3rd Segment Rate (Years 20 and After)	5.50%

Salary Scale

The salary scale is a graded table, as summarized in Exhibit A.

Postretirement Cash Out Option

To allow for the section 417(e)(3) cash out restrictions, the present value of the cash out option reflects assumed mortality in accordance with the table published by the Internal Revenue Service and the first, second and third segment rates applicable to lump sum distributions, as published by the Internal Revenue Service for the month immediately preceding the date of valuation. The three segment rates used for the valuation are 4.65%, 5.28% and 5.63%.

To allow for the guaranteed minimum present value of the cash out option using the alternate actuarial equivalent basis for lump sum determinations under the GSC benefit structure, the section 417(e)(3) cash out amount is increased by a load factor which varies based on the projected age of the member at retirement. The guaranteed minimum present value of the cash out option using the alternate actuarial equivalent basis for lump sum determinations reflects an assumed mortality in accordance with the Towers, Perrin, Forster & Crosby (TPF&C) 1971 Forecast Mortality Table for Males with ages set back two years for the member and set back four years for the contingent annuitant, and a discount rate equal to the six month moving average yield of United States Treasury obligations with ten year maturities, as reported in the Federal Reserve Statistical Release, with the six month averaging period commencing twelve months prior to the member's annuity starting date. The load factors used for valuation purposes grade down from 10% for members with a projected retirement age of 51, to 0% for members with a projected retirement age of 67 and over.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Retirement
The retirement decrement assumptions for active participants are summarized in Exhibit B. The weighted average retirement age is 64. All terminated vested members covered by the ASDS Represented benefit structure and hired before April 1, 1998 are assumed to retire at age 60 or immediately, if over age 60. All terminated vested members are assumed to retire at age 65 or immediately, if over age 65.

For at-risk calculations, participants who are eligible to retire within the next 10 years are assumed to retire immediately upon eligibility. The at-risk assumption for the assumed form of payment (other than assumed cash outs) is determined by benefit structure as follows:

Benefit Structure	At-Risk Assumption for Assumed Form of Payment
ATP Marion	Joint Life Annuity
AIS Represented	Joint Life Annuity
All Others	Normal Form of Payment

For each benefit structure, this assumed form of payment results in the highest present value.

Mortality
Base Table:
Pri-2012 total employee and nondisabled annuitant tables

Projection:
Mortality rates are generational, projected from the base year 2012 using 2024 Adjusted Scale MP-2021

Withdrawal
The withdrawal decrement assumptions are summarized in Exhibit C.

Disability
The disability decrement assumptions are summarized in Exhibit D. Mortality following disability assumed to be in accordance with table provided in IRS Revenue Ruling if qualified as disabled under Title II of Social Security Act, otherwise regular mortality is assumed.

Decrement Timing
Decrements are assumed to apply as of the beginning of the year.

Members on Leave or Layoff
Members on leave or layoff whose leave or layoff is assumed to be temporary are treated as active for valuation purposes.

For members whose leave or layoff is assumed to be permanent, no rates of withdrawal, disability or retirement are assumed. A member on leave due to long-term disability is assumed to retire when first eligible. Otherwise, a member on leave is treated as terminated for valuation purposes and assumed to retire at normal retirement age. If a member on layoff is expected to become eligible for retirement prior to the end of their layoff period for severance, they are assumed to retire when first eligible. Otherwise, they are assumed to terminate at the end of their layoff period for severance and subsequently retire at normal retirement age.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Probabilities Related to Spouse Option
For members covered by a benefit structure with a pre-retirement surviving spouse option, it is assumed that 65% of male members and 45% of female members are assumed to be married; husbands are assumed to be two years older than wives.

Form of Payment Election Option
For eligible members covered by the GSC and DSI Portable benefit structures, it is assumed that 60% will elect the cash out option at retirement and 40% will elect the normal form of payment option at retirement. For eligible members covered by the GDIS benefit structure, it is assumed that 30% will elect the cash out option at retirement and 70% will elect the normal form of payment option at retirement. For members covered by the Electric Boat TD benefit structure with benefit commencement dates on and after January 1, 2026, it is assumed that 60% will elect the cash out option at retirement and 40% will elect the normal form of payment option at retirement. For all other eligible members, it is assumed that 100% will elect the normal form of payment option at retirement.

Valuation Compensation
The valuation earnings are 2025 rates of compensation.

Benefit and Compensation Limits
Projected benefits are restricted to allow for the section 401(a)(17) limitations and the individual defined benefit plan limitation as specified in section 415 of the Internal Revenue Code. The maximum dollar limits in effect on the date of valuation are assumed to continue without change.

Accumulated Employee Contributions
Accumulated employee contributions are credited with interest at the applicable rate, as specified in section 411 of the Internal Revenue Code. The interest rate in effect on the date of valuation is assumed to continue without change.

Reemployment
There is no allowance made for potential reinstatement of terminated members upon reemployment.

Future Layoffs and Plant Shutdowns
There is no explicit assumption for the incidence of future layoffs or plant shutdowns. Accordingly, there is no allowance made for potential increases in liabilities resulting from these events.

Employee Transfers
Certain salaried employees who transfer between segments remain subject to the terms of the salaried benefit structure that the employee was covered by for benefit accruals prior to the transfer. This statement of actuarial assumptions does not include the applicable assumptions pertaining to all such benefit structures. The assumptions for rates of postretirement cash out option and cost of living adjustments pertaining to each such benefit structure are described in the statement of actuarial assumptions contained in the actuarial valuation report associated with such benefit structure.

General Dynamics Corporation
(EIN: 13-1673581, PN: 070)
General Dynamics Retirement Plan (Electric Boat and Mission Systems)

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Valuation of Plan Assets
The value of plan assets is used to calculate contribution requirements under ERISA. The value of plan assets is determined by recognizing asset gains and losses over a period of three years. Asset gains and losses are defined as the difference between the expected return on the market value of assets, using a return assumption not to exceed the third segment rate, and the actual return on the market value of assets. This gain or loss is recognized over a period of three years at 33% per year, beginning in the current year. The value of plan assets must be within 10% of the market value of assets.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

Expected Return on Assets

2023 Plan Year	6.64% The applicable third segment rate limitation is 5.74%.
2024 Plan Year	6.64% The applicable third segment rate limitation is 5.59%.
2025 Plan Year	6.36% The applicable third segment rate limitation is 5.50%.

Expenses
Assumed expenses included in target normal cost are estimated as 0.12% of the Electric Boat Trust and 0.11% of the Mission Systems Trust market value of assets plus $3,200,000 for the Electric Boat Trust and $1,800,000 for the Mission Systems Trust plus PBGC premiums.

Actuarial Cost Method
The method used to calculate the ERISA target normal cost and funding target is the unit credit cost method.

Valuation Date
The valuation date is January 1, 2025.

Rationale for Assumptions
For each economic and demographic assumption that has a significant effect on the measurement, and that the actuary has determined does not significantly conflict with what, in the actuary's professional judgement, is reasonable for the purpose of the measurement, the information and analysis used to support this determination are documented in the 2024 GDC Pension OPEB Experience Dashboard, 2014-2020 GDC Experience Study Report dated December 10, 2021, and subsequent communications between Aon and General Dynamics. General Dynamics approved the assumptions in December 2024.

Actuarial Assumptions and Methods

Discussion of Actuarial Assumptions and Methods

For the funding valuation, the allowable interest rates and mortality tables available to measure plan liabilities are prescribed by IRC section 412. Aon provided guidance with respect to the alternative interest rate and mortality table options, and it is our belief that the options prescribed by General Dynamics Corporation are appropriate for funding purposes. It is our belief that all other actuarial assumptions used for the funding valuation represent reasonable expectations of anticipated plan experience. The actuarial cost and amortization methods used are prescribed by IRC section 412. While the method used to value assets is prescribed by General Dynamics Corporation, Aon provided guidance with respect to the use of this method, and it is our belief that the method is appropriate for funding purposes.

Calculation of Normal Costs and Liabilities

The method used to calculate the ERISA target normal cost and funding target is the unit credit cost method. The funding target under IRC section 430 is calculated as the present value of all benefits that have been accrued or earned under the plan as of the first day of the plan year, based on current service and current pay. The target normal cost is the present value of all benefits expected to accrue or be earned under the plan during the plan year, including any increase in benefits earned in prior plan years attributable to compensation increases in the current plan year, plus certain trust expenses.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the ERISA assumptions is the ERISA funding target. The target normal cost is the present value of the benefits earned during the year.

For calculating the actuarial present value of vested benefits, benefits at each decrement age are determined in the same manner but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, certain ancillary benefits have been treated as vested consistent with PBGC premium regulations.

The ERISA funding target for lump sum benefits, other than lump sum benefits paid from a statutory hybrid plan under the provisions of IRC section 411(a)(13)(A), is determined by valuing the annuity that corresponds to the distribution using special actuarial assumptions, as described under Treasury regulations section 1.430(d). Under these special assumptions, for the period beginning with the annuity starting date, the current IRC section 417(e) applicable mortality table is substituted for the mortality table otherwise used.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

General Dynamics Retirement Plan (Electric Boat and Mission Systems)

2025 Schedule SB, Line 22 – Description of Weighted Average Retirement Age

The weighted average retirement age reported in Line 22 has been computed in the following manner:

Various benefit structures within the General Dynamics Retirement Plan (Electric Boat and Mission Systems) provide for early retirement upon the attainment of specified age and service requirements. A set of assumed retirement rates is associated with each of these benefit structures, and are summarized on the following page of this attachment. The average assumed retirement age is determined for each benefit structure by applying the assumed retirement rate at each age to the percentage of members who have not yet been expected to retire. This produces for each eligible age the percentage of members who are expected to retire at that age. These percentages are then used as weights to determine the average assumed retirement age. The average retirement ages are then weighted in proportion to the total funding target (disregarding prescribed at-risk assumptions) for each benefit structure as compared to the plan as a whole. This produces a weighted average retirement age for the plan as a whole.

Actuarial Assumptions and Methods

For ERISA Requirements

Interest Rates

The three-segment yield curve interest rates with a four month lookback (ending in the month of August 2024), each adjusted as needed to reflect the 5.00% floor under ARPA and to fall within the 25-year average interest rate corridor under HATFA and subsequent legislation, are used for minimum funding purposes. All of the rates shown below are compounded annually.

1st Segment Rate (Years 0 to 4)	5.07%
2nd Segment Rate (Years 5 to 19)	5.31%
3rd Segment Rate (Years 20 and After)	5.50%

Salary Scale

The salary scale is a graded table, as summarized in Exhibit A.

Postretirement Cash Out Option

To allow for the section 417(e)(3) cash out restrictions, the present value of the cash out option reflects assumed mortality in accordance with the table published by the Internal Revenue Service and the first, second and third segment rates applicable to lump sum distributions, as published by the Internal Revenue Service for the month immediately preceding the date of valuation. The three segment rates used for the valuation are 4.65%, 5.28% and 5.63%.

To allow for the guaranteed minimum present value of the cash out option using the alternate actuarial equivalent basis for lump sum determinations under the GSC benefit structure, the section 417(e)(3) cash out amount is increased by a load factor which varies based on the projected age of the member at retirement. The guaranteed minimum present value of the cash out option using the alternate actuarial equivalent basis for lump sum determinations reflects an assumed mortality in accordance with the Towers, Perrin, Forster & Crosby (TPF&C) 1971 Forecast Mortality Table for Males with ages set back two years for the member and set back four years for the contingent annuitant, and a discount rate equal to the six month moving average yield of United States Treasury obligations with ten year maturities, as reported in the Federal Reserve Statistical Release, with the six month averaging period commencing twelve months prior to the member's annuity starting date. The load factors used for valuation purposes grade down from 10% for members with a projected retirement age of 51, to 0% for members with a projected retirement age of 67 and over.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Retirement
The retirement decrement assumptions for active participants are summarized in Exhibit B. The weighted average retirement age is 64. All terminated vested members covered by the ASDS Represented benefit structure and hired before April 1, 1998 are assumed to retire at age 60 or immediately, if over age 60. All terminated vested members are assumed to retire at age 65 or immediately, if over age 65.

For at-risk calculations, participants who are eligible to retire within the next 10 years are assumed to retire immediately upon eligibility. The at-risk assumption for the assumed form of payment (other than assumed cash outs) is determined by benefit structure as follows:

Benefit Structure	At-Risk Assumption for Assumed Form of Payment
ATP Marion	Joint Life Annuity
AIS Represented	Joint Life Annuity
All Others	Normal Form of Payment

For each benefit structure, this assumed form of payment results in the highest present value.

Mortality
Base Table:
Pri-2012 total employee and nondisabled annuitant tables

Projection:
Mortality rates are generational, projected from the base year 2012 using 2024 Adjusted Scale MP-2021

Withdrawal
The withdrawal decrement assumptions are summarized in Exhibit C.

Disability
The disability decrement assumptions are summarized in Exhibit D. Mortality following disability assumed to be in accordance with table provided in IRS Revenue Ruling if qualified as disabled under Title II of Social Security Act, otherwise regular mortality is assumed.

Decrement Timing
Decrements are assumed to apply as of the beginning of the year.

Members on Leave or Layoff
Members on leave or layoff whose leave or layoff is assumed to be temporary are treated as active for valuation purposes.

For members whose leave or layoff is assumed to be permanent, no rates of withdrawal, disability or retirement are assumed. A member on leave due to long-term disability is assumed to retire when first eligible. Otherwise, a member on leave is treated as terminated for valuation purposes and assumed to retire at normal retirement age. If a member on layoff is expected to become eligible for retirement prior to the end of their layoff period for severance, they are assumed to retire when first eligible. Otherwise, they are assumed to terminate at the end of their layoff period for severance and subsequently retire at normal retirement age.

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Probabilities Related to Spouse Option
For members covered by a benefit structure with a pre-retirement surviving spouse option, it is assumed that 65% of male members and 45% of female members are assumed to be married; husbands are assumed to be two years older than wives.

Form of Payment Election Option
For eligible members covered by the GSC and DSI Portable benefit structures, it is assumed that 60% will elect the cash out option at retirement and 40% will elect the normal form of payment option at retirement. For eligible members covered by the GDIS benefit structure, it is assumed that 30% will elect the cash out option at retirement and 70% will elect the normal form of payment option at retirement. For members covered by the Electric Boat TD benefit structure with benefit commencement dates on and after January 1, 2026, it is assumed that 60% will elect the cash out option at retirement and 40% will elect the normal form of payment option at retirement. For all other eligible members, it is assumed that 100% will elect the normal form of payment option at retirement.

Valuation Compensation
The valuation earnings are 2025 rates of compensation.

Benefit and Compensation Limits
Projected benefits are restricted to allow for the section 401(a)(17) limitations and the individual defined benefit plan limitation as specified in section 415 of the Internal Revenue Code. The maximum dollar limits in effect on the date of valuation are assumed to continue without change.

Accumulated Employee Contributions
Accumulated employee contributions are credited with interest at the applicable rate, as specified in section 411 of the Internal Revenue Code. The interest rate in effect on the date of valuation is assumed to continue without change.

Reemployment
There is no allowance made for potential reinstatement of terminated members upon reemployment.

Future Layoffs and Plant Shutdowns
There is no explicit assumption for the incidence of future layoffs or plant shutdowns. Accordingly, there is no allowance made for potential increases in liabilities resulting from these events.

Employee Transfers
Certain salaried employees who transfer between segments remain subject to the terms of the salaried benefit structure that the employee was covered by for benefit accruals prior to the transfer. This statement of actuarial assumptions does not include the applicable assumptions pertaining to all such benefit structures. The assumptions for rates of postretirement cash out option and cost of living adjustments pertaining to each such benefit structure are described in the statement of actuarial assumptions contained in the actuarial valuation report associated with such benefit structure.

General Dynamics Retirement Plan (Electric Boat and Mission Systems)

2025 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Valuation of Plan Assets
The value of plan assets is used to calculate contribution requirements under ERISA. The value of plan assets is determined by recognizing asset gains and losses over a period of three years. Asset gains and losses are defined as the difference between the expected return on the market value of assets, using a return assumption not to exceed the third segment rate, and the actual return on the market value of assets. This gain or loss is recognized over a period of three years at 33% per year, beginning in the current year. The value of plan assets must be within 10% of the market value of assets.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

Expected Return on Assets

2023 Plan Year	6.64% The applicable third segment rate limitation is 5.74%.
2024 Plan Year	6.64% The applicable third segment rate limitation is 5.59%.
2025 Plan Year	6.36% The applicable third segment rate limitation is 5.50%.

Expenses
Assumed expenses included in target normal cost are estimated as 0.12% of the Electric Boat Trust and 0.11% of the Mission Systems Trust market value of assets plus $3,200,000 for the Electric Boat Trust and $1,800,000 for the Mission Systems Trust plus PBGC premiums.

Actuarial Cost Method
The method used to calculate the ERISA target normal cost and funding target is the unit credit cost method.

Valuation Date
The valuation date is January 1, 2025.

Rationale for Assumptions
For each economic and demographic assumption that has a significant effect on the measurement, and that the actuary has determined does not significantly conflict with what, in the actuary's professional judgement, is reasonable for the purpose of the measurement, the information and analysis used to support this determination are documented in the 2024 GDC Pension OPEB Experience Dashboard, 2014-2020 GDC Experience Study Report dated December 10, 2021, and subsequent communications between Aon and General Dynamics. General Dynamics approved the assumptions in December 2024.

Actuarial Assumptions and Methods

Discussion of Actuarial Assumptions and Methods

For the funding valuation, the allowable interest rates and mortality tables available to measure plan liabilities are prescribed by IRC section 412. Aon provided guidance with respect to the alternative interest rate and mortality table options, and it is our belief that the options prescribed by General Dynamics Corporation are appropriate for funding purposes. It is our belief that all other actuarial assumptions used for the funding valuation represent reasonable expectations of anticipated plan experience. The actuarial cost and amortization methods used are prescribed by IRC section 412. While the method used to value assets is prescribed by General Dynamics Corporation, Aon provided guidance with respect to the use of this method, and it is our belief that the method is appropriate for funding purposes.

Calculation of Normal Costs and Liabilities

The method used to calculate the ERISA target normal cost and funding target is the unit credit cost method. The funding target under IRC section 430 is calculated as the present value of all benefits that have been accrued or earned under the plan as of the first day of the plan year, based on current service and current pay. The target normal cost is the present value of all benefits expected to accrue or be earned under the plan during the plan year, including any increase in benefits earned in prior plan years attributable to compensation increases in the current plan year, plus certain trust expenses.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the ERISA assumptions is the ERISA funding target. The target normal cost is the present value of the benefits earned during the year.

For calculating the actuarial present value of vested benefits, benefits at each decrement age are determined in the same manner but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, certain ancillary benefits have been treated as vested consistent with PBGC premium regulations.

The ERISA funding target for lump sum benefits, other than lump sum benefits paid from a statutory hybrid plan under the provisions of IRC section 411(a)(13)(A), is determined by valuing the annuity that corresponds to the distribution using special actuarial assumptions, as described under Treasury regulations section 1.430(d). Under these special assumptions, for the period beginning with the annuity starting date, the current IRC section 417(e) applicable mortality table is substituted for the mortality table otherwise used.

Eligibility
Certain salaried employees at segments of General Dynamics Corporation covered by this benefit structure who have completed one year of service. Salaried employees covered by a collective bargaining agreement may only be covered if specifically provided in such agreement.

Closure to New Hires Date
January 1, 2007 (January 1, 2005 for employees at the Mission Systems Non-Union segment).

Normal Retirement Date
Age 65.

Early Retirement Date
Between ages 55 and 65. Benefits payable under final average pay formula, and career average pay formula for benefit accrued after December 31, 2006, also require completion of 10 years of continuous service.

Normal Retirement Pension

Final Average Pay Formula
For members at the Electric Boat Salaried and Electro Dynamic Salaried segments, a monthly pension as shown below:

i. Service prior to 1/1/2007: 1-1/3% of final average pay per year of plan membership service. Plan membership service is limited to 40 years for service earned prior to January 1, 2005.

ii. Service after 12/31/2006: 1% of final average pay per year of plan membership service.

For members at the Mission Systems Non-Union segment, a monthly pension as shown below:

i. Service prior to 1/1/2007: 1-1/3% of final average pay per year of plan membership service. Plan membership service is limited to 40 years for service earned prior to January 1, 2005.

ii. Service 1/1/2007 to 12/31/2013: 1% of final average pay per year of plan membership service.

iii. Service 1/1/2014 to 12/31/2018: $25 per year of plan membership service. Plan membership service is frozen as of December 31, 2018.

For Corporate officers whose benefits have not already been frozen, plan membership is frozen as of December 31, 2018, or the date they are named as an officer, if later. For executive compensation program members whose benefits have not already been frozen, plan membership is frozen as of September 30, 2025, or the date they become a member of the executive compensation program, if later.

2025 Schedule SB, Part V – Summary of Plan Provisions

Benefit Provisions of Salaried Benefit Structure

Final average pay equals the average of the highest consecutive 60 monthly base rates of pay (including 100% of incentive compensation) received during last 120 months of plan membership. For service prior to January 1, 2007, final average pay is frozen as of December 31, 2010. For members at the Mission Systems Non-Union segment, final average pay for service accrued from January 1, 2007 to December 31, 2013 is frozen as of December 31, 2013. For Corporate officers whose benefits have not already been frozen, final average pay for service accrued from January 1, 2007 to December 31, 2018 is frozen as of December 31, 2018, or the date they are named as an officer, if later. For executive compensation program members whose benefits have not already been frozen, final average pay for service accrued from January 1, 2007 to September 30, 2025 is frozen as of September 30, 2025, or the date they become a member of the executive compensation program, if later.

Career Average Pay Formula
For certain individuals who were members or salaried employees as of June 30, 1990, a monthly pension as shown below:

i. Service prior to 1/1/2007: Benefit accrued as of December 31, 2006.

ii. Service after 12/31/2006: Same as Final Average Pay Formula.

Minimum Benefit Formula
A monthly pension as shown below:

i. Service prior to 1/1/2007: $26.00 multiplied by the period, in years and months, during which benefits were accrued under this benefit structure including, if the member joined within two months of his first becoming eligible, that additional period during which he would have accrued benefits but for the age and/or service requirements for eligibility to enter this benefit structure, plus 150% of the benefit attributable to employee contributions to any prior plan.

ii. Service after 12/31/2006: Same as Final Average Pay Formula.

Early Retirement Pension

Final Average Pay Formula
The benefit accrued to date of early retirement under the final average pay formula (or under the minimum benefit formula, if greater) based on service accrued prior to January 1, 2007, either (i) with no reduction, if benefits commence at or after age 62 or (ii) reduced by 2-1/2% for each year between age 62 and the date of commencement of benefits, if benefits commence prior to age 62.

The benefit accrued to date of early retirement based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits.

2025 Schedule SB, Part V – Summary of Plan Provisions

Benefit Provisions of Salaried Benefit Structure

Career Average Pay Formula

The benefit accrued to date of early retirement under the career average pay formula (or under the minimum benefit formula, if greater) based on service accrued prior to January 1, 2007, with no reduction if the sum of a member's age and service (his points) equals or exceeds the required number of points at each age as specified below:

Attained Age Last Birthday	Required Points	Attained Age Last Birthday	Required Points
55	85	60	80
56	84	61	76
57	83	62	72
58	82	63	68
59	81	64	69

If these point requirements are not met, the accrued benefit based on service accrued prior to January 1, 2007 will be payable either (i) commencing at normal retirement date or (ii) commencing immediately and reduced by the lesser of (1) 2-1/2% times the number of points by which age plus service are less than those required, or (2) 2-1/2% for each year between age 65 and the date of commencement of benefits.

In addition, if the early retirement benefit based on service accrued prior to January 1, 2007 is payable under the career average pay formula and commences prior to age 62, a temporary monthly supplemental benefit is payable between early retirement date and age 62, or earlier death, equal to $1.50 per year of service as a member between October 1, 1956, and the date of retirement. No additional benefit accrues after June 30, 1990. This temporary benefit is reduced by the same factor as for the accrued benefit above, if applicable.

The benefit accrued to date of early retirement based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits, after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

Available Forms of Payment

Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are the 10 year certain and life annuity; and 50% and 100% contingent annuities. For portion of benefit accrued prior to January 1, 2007, level income at 62 and 65 options are also available on an actuarial equivalent basis.

Employee Contributions

No employee contributions are required on or after January 1, 1982.

Termination

If terminating employment after completion of five years of continuous service, the accrued normal retirement pension is payable commencing at age 65. The benefit may commence prior to age 65 on an actuarial equivalent basis if early retirement requirements are satisfied; in no event is an amount less than the member's own contributions with regular interest returned.

2025 Schedule SB, Part V – Summary of Plan Provisions

Benefit Provisions of Salaried Benefit Structure

Death Before Retirement
If a member dies while eligible for early retirement or while eligible for a vested benefit and leaves a surviving spouse, the surviving spouse will be entitled to the benefit that would have been payable had the member terminated employment on the date of death with payment of benefits to commence on the earliest date permitted thereafter and elected the 100% contingent annuitant option.

Death After Retirement
Depends on the form of pension elected; in any event, the excess, if any, of the death benefit payable just prior to retirement over actual pension payments is paid to the beneficiary.

Pension Enhancement
Certain members employed prior to January 1, 1999, and retiring from active service will be entitled to a pension enhancement benefit of $94 per month, prorated for less than 10 years of continuous service at retirement, commencing at age 65. An additional benefit, in the same amount, will be payable when an eligible spouse attains age 65.

If a member was employed prior to January 1, 1999, and terminates with a deferred vested benefit, the pension enhancement benefit will be reduced by the ratio of the member's years of service at termination to the years of service he would have had at age 65.

For members at the Mission Systems Non-Union segment, the pension enhancement benefit is frozen as of December 31, 2013. For Corporate officers whose benefits have not already been frozen, the pension enhancement benefit is frozen as of December 31, 2018, or the date they are named as an officer, if later. For executive compensation program members whose benefits have not already been frozen, the pension enhancement benefit is frozen as of September 30, 2025, or the date they become a member of the executive compensation program, if later.

Facility Closure

Electro Dynamic
Enhanced benefits for eligible active members laid off due to the December 31, 2000, facility closure:

- The layoff period for severance—i.e., the period following layoff from active employment during which the member's continuous service is not yet considered severed, unless the member fails to comply with a request to return to active employment—is extended from 24 months to 60 months.
- Each member is awarded an additional five years of plan membership and continuous service. No additional continuous service accrues during the layoff period for severance.
- The reduction for early commencement applicable to the accrued normal retirement pension payable commencing at age 65 for members terminating employment after completion of five years of continuous service is 4-1/2% per year prior to age 65.

Charleston
A monthly pension of $16.00 per year of credited service.

A member who (i) was actively employed at the Quonset Point facility on June 1, 2003, (ii) has accrued a benefit under the salaried plan attributable to salaried plan membership while a salaried employee at the Quonset Point facility, and (iii) has not incurred a break in service after April 1, 1974, may be entitled to an additional monthly pension. The additional monthly pension is equal to the excess, if any, of the monthly pension benefit determined by multiplying the Quonset Point benefit rate by the member's salaried plan membership while a salaried employee at the Quonset Point facility over the member's accrued benefit under the salaried plan attributable to such salaried plan membership.

In addition, all breaks in service prior to January 1, 1976, are bridged at $23.00 for members represented by the Metal Trades Council, Pattern Makers' Association or United Brotherhood of Carpenters, and for members who are not covered by a collective bargaining agreement at the Quonset Point facility.

Early Retirement Pension
A member retiring early on or after age 55 whose age plus service equal 85 points will be entitled to the full accrued benefit without reduction. A member retiring early with less than 85 points will have his accrued benefit reduced 3% for each point less than 85 or reduced 3% for each year prior to age 65, whichever provides the lesser reduction.

Disability Retirement Pension

ii. Commencement after age 50 and prior to age 55: The greater of (a) current formula benefit reduced 3% for each point less than 75 points and (b) transition formula benefit reduced 3% for each year between age 55 and the date of commencement of benefits if member has 30 or more years of continuous service, 6% for each year if member has 25 or more but less than 30 years of continuous service or on an actuarial equivalent basis if member has less than 25 years of continuous service. At age 55, accrued benefit based on service accrued prior to January 1, 2007 reduced on an actuarial equivalent basis, or reduced by 17.5% if member was at least age 40 with five years of continuous service at January 1, 2000 plus the balance of the accrued benefit for service accrued after December 31, 2006 reduced on an actuarial equivalent basis, is also payable.

iii. Commencement after age 55: The greater of (a) the greater of the final average pay formula benefit (or the minimum benefit formula benefit, if greater) for service accrued prior to January 1, 2007, reduced 2-1/2% for each year between age 62 and the date of commencement of benefits plus the final average pay formula benefit for service accrued after December 31, 2006, reduced 4.8% for each year between age 65 and the date of commencement of benefits and (b) split benefit formula benefit for service accrued from January 1, 2002 to December 31, 2006, reduced 2-1/2% for each year between age 62 and the date of commencement of benefits plus the split benefit formula benefit for service accrued after December 31, 2006, reduced 4.8% for each year between age 65 and the date of commencement of benefits plus the greater of (1) current formula benefit reduced 3% for each point less than 75 points if member has 15 or more years of continuous service or reduced on an actuarial equivalent basis if member has less than 15 years of continuous service and (2) transition formula benefit unreduced if member has 20 or more years of continuous service or reduced on an actuarial equivalent basis if member has less than 20 years of continuous service.

Available Forms of Payment
Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are the 10 year certain and life annuity; and 50% and 100% contingent annuities. For portion of benefit accrued prior to January 1, 2007, level income at 62 and 65 options are also available on an actuarial equivalent basis.

2025 Schedule SB, Part V – Summary of Plan Provisions

Termination
If terminating employment after completion of five years of continuous service, the accrued normal retirement pension is payable commencing at age 65. The benefit may commence prior to age 65 on an actuarial equivalent basis if early retirement requirements are satisfied.

Death Before Retirement
If a member dies while eligible for early retirement or while eligible for a vested benefit and leaves a surviving spouse, the surviving spouse will be entitled to the benefit that would have been payable had the member terminated employment on the date of death with payment of benefits to commence on the earliest date permitted thereafter and elected the 100% contingent annuitant option.

Death After Retirement
Depends on the form of pension elected.

Employee Transfers
Certain salaried employees who transfer between segments before January 1, 2005 remain subject to the terms of the salaried benefit structure that the employee was covered by prior to the transfer for benefit accruals prior to January 1, 2005. This summary of benefit provisions does not describe all such benefit structures. The benefit provisions pertaining to each such benefit structure are described in the summary of benefit provisions contained in the actuarial valuation report associated with such benefit structure.

ii. Service 1/1/2005 to 12/31/2006: 1-1/3% of final average pay per year of plan membership service.

iii. Service after 12/31/2006: Same as Final Average Pay Formula.

2025 Schedule SB, Part V – Summary of Plan Provisions

Early Retirement Pension

The benefit accrued to date of early retirement under (i), (ii) or (iii) below, whichever provides the greatest actuarial equivalent value:

i. The sum of (a) and (b) as follows:

   a. The final average pay formula benefit based on service accrued prior to January 1, 2007, reduced by 2-1/2% for each year between age 62 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

   b. The final average pay formula benefit based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

ii. The sum of (a), (b), (c) and (d) as follows:

   a. The RIP formula benefit either (1) with no reduction, if benefits commence at or after age 60, or (2) reduced as shown below for each year between age 60 and the date of commencement of benefits, if benefits commence prior to age 60.

Years of Benefit Eligibility Service	Early Payment Reduction per Year of Retirement Prior to Age 60	Years of Benefit Eligibility Service	Early Payment Reduction per Year of Retirement Prior to Age 60
5	7.00%	18	5.18%
6	6.86	19	5.04
7	6.72	20	4.90
8	6.58	21	4.76
9	6.44	22	4.62
10	6.30	23	4.48
11	6.16	24	4.34
12	6.02	25	4.20
13	5.88	26	4.06
14	5.74	27	3.92
15	5.60	28	3.78
16	5.46	29	3.64
17	5.32	30 & Over	3.50

   b. If the RIP formula benefit commences prior to age 62, after completion of 10 years of benefit eligibility service, a temporary monthly supplemental benefit is payable between early retirement date and age 62, or earlier death, equal to $100 plus $20.00 per year of credited service accrued prior to January 1, 2005 up to a maximum of 25 years. This temporary benefit is reduced by 15% for each year retirement precedes age 60.

   c. The split benefit formula benefit based on service accrued from January 1, 2005 to December 31, 2006, reduced by 2-1/2% for each year between age 62 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

d. The split benefit formula benefit based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

iii. The sum of (a), (b), (c) and (d) as follows:

a. The TOPS formula benefit payable after age 60 only with no reduction.

b. If the TOPS formula benefit commences prior to age 62, a temporary monthly supplemental benefit is payable between early retirement date and age 62, or earlier death, equal to $10.00 per year of credited service accrued prior to January 1, 2005. If retiring after completion of 25 years of continuous service as of December 31, 2004 and prior to age 62, an additional temporary monthly supplemental benefit is payable between early retirement date and age 62, or earlier death, equal to $225.

c. The split benefit formula benefit based on service accrued from January 1, 2005 to December 31, 2006, reduced by 2-1/2% for each year between age 62 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

d. The split benefit formula benefit based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

Available Forms of Payment
Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are the 10 year certain and life annuity; and 50% and 100% contingent annuities. Other forms of payment available on an actuarial equivalent basis for benefit payable under RIP formula are five year certain and life annuity; 25% contingent annuity with five year pop-up; and level income at 62 option. For portion of benefit accrued under the final average pay formula for service prior to January 1, 2007, the 25% contingent annuity with five year pop-up and level income at 62 and 65 options are also available on an actuarial equivalent basis. For portion of benefit accrued under the split benefit formula for service January 1, 2005 to December 31, 2006, level income at 62 and 65 options are also available on an actuarial equivalent basis.

Employee Contributions
No employee contributions are required on or after January 1, 1995.

Termination
If terminating employment after completion of five years of continuous service, the accrued normal retirement pension is payable commencing at age 65. The benefit may commence prior to age 65 if early retirement requirements are satisfied, payable based on the benefit under (i), (ii) or (iii) below, whichever provides the greatest actuarial equivalent value:

i. The final average pay formula benefit reduced on an actuarial equivalent basis.

ii. The sum of (a) and (b) as follows:

a. The RIP formula benefit with a reduction for each year retiring early as shown below; in no event is an amount less than the member's own contributions with regular interest returned.

Years of Benefit Eligibility Service	Early Payment Reduction per Year of Retirement Prior to Age 65	Years of Benefit Eligibility Service	Early Payment Reduction per Year of Retirement Prior to Age 65

iv. Service 1/1/2014 to 12/31/2018: $25 per year of plan membership service. Plan membership service is frozen as of December 31, 2018.

Final average pay equals the average of the highest consecutive 60 monthly base rates of pay (including 100% of incentive compensation) received during last 120 months of plan membership. For service prior to January 1, 2007, final average pay is frozen as of December 31, 2010. Final average pay for service accrued from January 1, 2007 to December 31, 2013 is frozen as of December 31, 2013.

Breakpoint equals 125% of the average of the Social Security taxable wage bases in effect for each calendar year during the 35 year period ending in the year in which the member attains the Social Security retirement age but not greater than the Social Security taxable wage base in effect in the year of termination. Breakpoint is frozen as of December 31, 2010.

Minimum Benefit Formula
A monthly pension as shown below:

i. Service prior to 1/1/2002: The greater of (a) and (b), as shown below:
   a. 1.20% of final average pay per year of credited service, plus 0.40% of final average pay in excess of the breakpoint per year of credited service up to a maximum of 30 years.
   b. The greater of (1) two times the actuarial equivalent life annuity of the salary reduction or after-tax contributions accumulated with interest to the normal retirement date at the rate of 5% annually through December 31, 1980 and 8% annually thereafter and (2) the actuarial equivalent life annuity of the after-tax contributions accumulated with interest to the normal retirement date at the rate specified in section 411(c)(2) of the Internal Revenue Code.

ii. Service 1/1/2002 to 12/31/2006: $26.00 per year of plan membership service.

iii. Service after 12/31/2006: Same as Final Average Pay Formula.

Early Retirement Pension
The benefit accrued to date of early retirement based on service accrued prior to January 1, 2002, reduced by 2% for the base portion of benefit and 3% for the excess portion of benefit, for each year between age 65 and the date of commencement of benefits. Such amount shall not be less than the benefit provided by salary reductions or after-tax contributions reduced on an actuarial equivalent basis.

The benefit accrued to date of early retirement based on service accrued from January 1, 2002 to December 31, 2006, reduced by 2-1/2% for each year between age 62 and the date of commencement of benefits if benefits commence after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis if benefits commence prior to completion of 10 years of continuous service.

The benefit accrued to date of early retirement based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits if benefits commence after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis if benefits commence prior to completion of 10 years of continuous service.

Available Forms of Payment
Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are the 10 year certain and life annuity; and 50% and 100% contingent annuities. For portion of benefit accrued prior to January 1, 2007, the 15 year certain and life annuity and level income at 62 and 65 options are also available on an actuarial equivalent basis. For portion of benefit accrued prior to January 1, 2002, the lump sum cash out option is also available on an actuarial equivalent basis.

Employee Contributions
No employee contributions are required on or after January 1, 2002.

2025 Schedule SB, Part V – Summary of Plan Provisions

Termination
If terminating employment after completion of five years of continuous service, the accrued normal retirement pension is payable commencing at age 65. The benefit may commence prior to age 65 on an actuarial equivalent basis if early retirement requirements are satisfied. Terminations with less than five years of continuous service receive the portion of the accrued normal retirement pension based on salary reductions and after-tax contributions commencing at age 65.

Death Before Retirement
If a member dies while eligible for early retirement or while eligible for a vested benefit and leaves a surviving spouse, the surviving spouse will be entitled to the benefit that would have been payable had the member terminated employment on the date of death with payment of benefits to commence on the earliest date permitted thereafter and elected the 100% contingent annuitant option. The surviving spouse may elect the lump sum cash out option for the portion of benefit accrued for service prior to January 1, 2002.

Beneficiaries of unmarried members who die receive the portion of the accrued normal retirement pension based on salary reductions and after-tax contributions in the lump sum cash out option.

Death After Retirement
Depends on the form of pension elected; in any event, the excess, if any, of the death benefit payable just prior to retirement over actual pension payments is paid to the beneficiary.

Employee Transfers
Certain salaried employees who transfer between segments before January 1, 2005 remain subject to the terms of the salaried benefit structure that the employee was covered by prior to the transfer for benefit accruals prior to January 1, 2005. This summary of benefit provisions does not describe all such benefit structures. 2025 Schedule SB, Part V – Summary of Plan Provisions

Early Retirement Pension
The benefit accrued to date of early retirement either (i) with no reduction if benefits commence at or after age 55 or member has 30 or more years of service, or (ii) reduced by 6% for each year between age 55 and the date of commencement of benefits if the benefits commence prior to age 55 and the member has less than 30 years of service.

Disability Retirement Pension
Accrued normal retirement benefit.

Available Forms of Payment
Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are 10 year certain and life annuity; 75% contingent annuity; and 50% and 100% contingent annuities with pop-up feature.

Termination
If terminating employment after completion of five years of service, the accrued normal retirement pension is payable commencing at age 65. The benefit may commence prior to age 65 on an actuarial equivalent basis if early retirement requirements are satisfied.

Death Before Retirement
If an active member dies after completing at least 15 years of credited service, a lifetime benefit shall be payable to the surviving spouse equal to 50% of the benefit that member would have received had the member retired on the date of death and elected the 50% contingent annuitant option but without reduction for early commencement. If an active member dies prior to completion of 15 years of credited service but is eligible for a vested benefit or a deferred vested member dies and leaves a surviving spouse, the surviving spouse will be entitled to the benefit that would have been payable to the spouse had the member terminated employment on the date of death with payment of benefits to commence when the member would have reached age 65 and elected the 50% contingent annuitant option. The surviving spouse of a deferred vested member may elect early commencement of this benefit in a reduced amount.

Death After Retirement
Depends on the form of pension elected.

47,851	-	49,050	47.00	49.00
49,051	&	Over	48.00	50.00

Early Retirement Pension

The benefit accrued to date of early retirement under the career average formula (or under the minimum benefit formula, if greater), payable on or after age 60 with no reduction. Also, a member retiring early on or after age 57 whose age plus service equals 82 points will be entitled to the full accrued benefit without reduction. A member retiring early with less than 82 points will have his accrued benefit reduced 4% for each point less than 82 or reduced 6% for each year prior to age 60, whichever provides the lesser reduction but subject to a maximum reduction of 12%.

In addition, if the early retirement benefit commences between ages 60 and 62 and after completion of five years of service, a temporary monthly supplemental benefit is payable between early retirement date and age 62, or earlier death, equal to $32.00 per year of service. If the early retirement benefit commences prior to age 60, a temporary monthly supplemental benefit is payable between the commencement date and age 62 in a reduced amount, as follows:

Age When Benefit Commences	Supplement per Year of Service
57	$26.00
58	28.00
59	30.00

Available Forms of Payment

Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are 75% contingent annuity, and 50% and 100% contingent annuities with five year pop-up.

Employee Contributions

No employee contributions are required on or after January 1, 1995.

2025 Schedule SB, Part V – Summary of Plan Provisions

Termination
If terminating employment after completion of five years of service, the accrued normal retirement pension is payable commencing at age 65. The benefit may commence between ages 60 and 65 equal to the unreduced career average formula benefit plus the excess, if any, of the minimum benefit formula benefit reduced by 6% for each year retirement precedes age 65 over the unreduced career average formula benefit.

Members terminating with 20 years of service may commence benefits between ages 57 and 60 equal to the career average formula benefit reduced 8% for each year retirement precedes age 60 plus the excess, if any, of the minimum benefit formula benefit reduced by 6% for each year retirement precedes age 65 over the career average formula benefit reduced 8% for each year retirement precedes age 60.

Death Before Retirement
If a member dies while eligible for early retirement or while eligible for a vested benefit and leaves a surviving spouse, the surviving spouse will be entitled to the benefit that would have been payable had the member terminated employment on the date of death with payment of benefits to commence on the earliest date permitted thereafter and elected the 50% contingent annuitant option, reduced by 12% for commencement before age 60. If death occurs after age 50 and after completion of 15 years of service, the benefit will commence immediately reduced by 5% if commencement is between ages 55 and 60 and reduced by 10% if commencement is between ages 50 and 55.

Death After Retirement
Depends on the form of pension elected; in no event, is an amount less than the member's own contributions with regular interest returned.

Death Before Retirement
If a member dies while eligible for early retirement or while eligible for a vested benefit and leaves a surviving spouse, the surviving spouse will be entitled to the benefit that would have been payable had the member terminated employment on the date of death with payment of benefits to commence on the earliest date permitted thereafter and elected the 50% contingent annuitant option.

Death After Retirement
Depends on the form of pension elected.

2025 Schedule SB, Part V – Summary of Plan Provisions

Benefit Provisions − Changes Since Last Valuation

Benefit Provisions of Salaried Benefit Structure

Since the last valuation, the following benefit provisions have been changed:

- For executive compensation program members whose benefits have not already been frozen, no additional plan membership service accrued after September 30, 2025, or the date they become a member of the executive compensation program, if later. Also, for these members final average pay is frozen as of September 30, 2025, or the date they become a member of the executive compensation program, if later.

- For executive compensation program whose benefits have not already been frozen, the pension enhancement benefit is frozen as of September 30, 2025, or the date they become a member of the executive compensation program, if later.

Note: The changes in benefit provisions for the Salaried Benefit Structure summarized above occurred subsequent to the valuation date, and General Dynamics Corporation did not elect under IRC Section 412(d)(2) to include these changes in the Funding Target and Target Normal Cost as if they were adopted on January 1, 2025. The changes listed above have been included in this report for completeness.

Benefit Provisions of Electric Boat Hourly Benefit Structure

Since the last valuation, the following benefit provisions have been changed:

- For Quonset Point, the basic monthly benefit per year of credited service increased from $65.00 to $67.00 for service on and after January 1, 2025.

- For Guards, the basic monthly benefit per year of credited service increased from $55.00 to $57.00 for service on and after January 1, 2025.

Benefit Provisions of Electric Boat TD Benefit Structure

Effective April 5, 2025, a new collective bargaining agreement was ratified. Summarized below are the benefit provision changes effective in the new agreement:

- Basic monthly benefit per year of credited service increased from $64.00 to $69.00 for service on and after January 1, 2026.

- For benefit commencement dates on and after January 1, 2026 a lump sum cash out option is also available on an actuarial equivalent basis.

Note: The changes in benefit provisions for the Electric Boat TD Benefit Structure summarized above occurred subsequent to the valuation date, and General Dynamics Corporation did not elect under IRC Section 412(d)(2) to include these changes in the Funding Target and Target Normal Cost as if they were adopted on January 1, 2025. The changes listed above have been included in this report for completeness.

General Dynamics Retirement Plan (Electric Boat and Mission Systems)

2025 Schedule SB, Line 22 – Description of Weighted Average Retirement Age

The weighted average retirement age reported in Line 22 has been computed in the following manner:

Various benefit structures within the General Dynamics Retirement Plan (Electric Boat and Mission Systems) provide for early retirement upon the attainment of specified age and service requirements. A set of assumed retirement rates is associated with each of these benefit structures, and are summarized on the following page of this attachment. The average assumed retirement age is determined for each benefit structure by applying the assumed retirement rate at each age to the percentage of members who have not yet been expected to retire. This produces for each eligible age the percentage of members who are expected to retire at that age. These percentages are then used as weights to determine the average assumed retirement age. The average retirement ages are then weighted in proportion to the total funding target (disregarding prescribed at-risk assumptions) for each benefit structure as compared to the plan as a whole. This produces a weighted average retirement age for the plan as a whole.

General Dynamics Salaried Retirement Plan—Corporate Legacy Provisions and General Dynamics Salaried Retirement Plan.

Effective Date
October 1, 1956.

Eligibility
Certain salaried employees at segments of General Dynamics Corporation covered by this benefit structure who have completed one year of service. Salaried employees covered by a collective bargaining agreement may only be covered if specifically provided in such agreement.

Closure to New Hires Date
January 1, 2007 (January 1, 2005 for employees at the Mission Systems Non-Union segment).

Normal Retirement Date
Age 65.

Early Retirement Date
Between ages 55 and 65. Benefits payable under final average pay formula, and career average pay formula for benefit accrued after December 31, 2006, also require completion of 10 years of continuous service.

Normal Retirement Pension

Final Average Pay Formula
For members at the Electric Boat Salaried and Electro Dynamic Salaried segments, a monthly pension as shown below:

i. Service prior to 1/1/2007: 1-1/3% of final average pay per year of plan membership service. Plan membership service is limited to 40 years for service earned prior to January 1, 2005.

ii. Service after 12/31/2006: 1% of final average pay per year of plan membership service.

For members at the Mission Systems Non-Union segment, a monthly pension as shown below:

i. Service prior to 1/1/2007: 1-1/3% of final average pay per year of plan membership service. Plan membership service is limited to 40 years for service earned prior to January 1, 2005.

ii. Service 1/1/2007 to 12/31/2013: 1% of final average pay per year of plan membership service.

iii. Service 1/1/2014 to 12/31/2018: $25 per year of plan membership service. Plan membership service is frozen as of December 31, 2018.

For Corporate officers whose benefits have not already been frozen, plan membership is frozen as of December 31, 2018, or the date they are named as an officer, if later. For executive compensation program members whose benefits have not already been frozen, plan membership is frozen as of September 30, 2025, or the date they become a member of the executive compensation program, if later.

2025 Schedule SB, Part V – Summary of Plan Provisions

Benefit Provisions of Salaried Benefit Structure

Final average pay equals the average of the highest consecutive 60 monthly base rates of pay (including 100% of incentive compensation) received during last 120 months of plan membership. For service prior to January 1, 2007, final average pay is frozen as of December 31, 2010. For members at the Mission Systems Non-Union segment, final average pay for service accrued from January 1, 2007 to December 31, 2013 is frozen as of December 31, 2013. For Corporate officers whose benefits have not already been frozen, final average pay for service accrued from January 1, 2007 to December 31, 2018 is frozen as of December 31, 2018, or the date they are named as an officer, if later. For executive compensation program members whose benefits have not already been frozen, final average pay for service accrued from January 1, 2007 to September 30, 2025 is frozen as of September 30, 2025, or the date they become a member of the executive compensation program, if later.

Career Average Pay Formula
For certain individuals who were members or salaried employees as of June 30, 1990, a monthly pension as shown below:

i. Service prior to 1/1/2007: Benefit accrued as of December 31, 2006.

ii. Service after 12/31/2006: Same as Final Average Pay Formula.

Minimum Benefit Formula
A monthly pension as shown below:

i. Service prior to 1/1/2007: $26.00 multiplied by the period, in years and months, during which benefits were accrued under this benefit structure including, if the member joined within two months of his first becoming eligible, that additional period during which he would have accrued benefits but for the age and/or service requirements for eligibility to enter this benefit structure, plus 150% of the benefit attributable to employee contributions to any prior plan.

ii. Service after 12/31/2006: Same as Final Average Pay Formula.

Early Retirement Pension

Final Average Pay Formula
The benefit accrued to date of early retirement under the final average pay formula (or under the minimum benefit formula, if greater) based on service accrued prior to January 1, 2007, either (i) with no reduction, if benefits commence at or after age 62 or (ii) reduced by 2-1/2% for each year between age 62 and the date of commencement of benefits, if benefits commence prior to age 62.

The benefit accrued to date of early retirement based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits.

2025 Schedule SB, Part V – Summary of Plan Provisions

Benefit Provisions of Salaried Benefit Structure

Career Average Pay Formula

The benefit accrued to date of early retirement under the career average pay formula (or under the minimum benefit formula, if greater) based on service accrued prior to January 1, 2007, with no reduction if the sum of a member's age and service (his points) equals or exceeds the required number of points at each age as specified below:

Attained Age Last Birthday	Required Points	Attained Age Last Birthday	Required Points
55	85	60	80
56	84	61	76
57	83	62	72
58	82	63	68
59	81	64	69

If these point requirements are not met, the accrued benefit based on service accrued prior to January 1, 2007 will be payable either (i) commencing at normal retirement date or (ii) commencing immediately and reduced by the lesser of (1) 2-1/2% times the number of points by which age plus service are less than those required, or (2) 2-1/2% for each year between age 65 and the date of commencement of benefits.

In addition, if the early retirement benefit based on service accrued prior to January 1, 2007 is payable under the career average pay formula and commences prior to age 62, a temporary monthly supplemental benefit is payable between early retirement date and age 62, or earlier death, equal to $1.50 per year of service as a member between October 1, 1956, and the date of retirement. No additional benefit accrues after June 30, 1990. This temporary benefit is reduced by the same factor as for the accrued benefit above, if applicable.

The benefit accrued to date of early retirement based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits, after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

Available Forms of Payment

Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are the 10 year certain and life annuity; and 50% and 100% contingent annuities. For portion of benefit accrued prior to January 1, 2007, level income at 62 and 65 options are also available on an actuarial equivalent basis.

Employee Contributions

No employee contributions are required on or after January 1, 1982.

Termination

If terminating employment after completion of five years of continuous service, the accrued normal retirement pension is payable commencing at age 65. The benefit may commence prior to age 65 on an actuarial equivalent basis if early retirement requirements are satisfied; in no event is an amount less than the member's own contributions with regular interest returned.

2025 Schedule SB, Part V – Summary of Plan Provisions

Benefit Provisions of Salaried Benefit Structure

Death Before Retirement
If a member dies while eligible for early retirement or while eligible for a vested benefit and leaves a surviving spouse, the surviving spouse will be entitled to the benefit that would have been payable had the member terminated employment on the date of death with payment of benefits to commence on the earliest date permitted thereafter and elected the 100% contingent annuitant option.

Death After Retirement
Depends on the form of pension elected; in any event, the excess, if any, of the death benefit payable just prior to retirement over actual pension payments is paid to the beneficiary.

Pension Enhancement
Certain members employed prior to January 1, 1999, and retiring from active service will be entitled to a pension enhancement benefit of $94 per month, prorated for less than 10 years of continuous service at retirement, commencing at age 65. An additional benefit, in the same amount, will be payable when an eligible spouse attains age 65.

If a member was employed prior to January 1, 1999, and terminates with a deferred vested benefit, the pension enhancement benefit will be reduced by the ratio of the member's years of service at termination to the years of service he would have had at age 65.

For members at the Mission Systems Non-Union segment, the pension enhancement benefit is frozen as of December 31, 2013. For Corporate officers whose benefits have not already been frozen, the pension enhancement benefit is frozen as of December 31, 2018, or the date they are named as an officer, if later. For executive compensation program members whose benefits have not already been frozen, the pension enhancement benefit is frozen as of September 30, 2025, or the date they become a member of the executive compensation program, if later.

Facility Closure

Electro Dynamic
Enhanced benefits for eligible active members laid off due to the December 31, 2000, facility closure:

- The layoff period for severance—i.e., the period following layoff from active employment during which the member's continuous service is not yet considered severed, unless the member fails to comply with a request to return to active employment—is extended from 24 months to 60 months.
- Each member is awarded an additional five years of plan membership and continuous service. No additional continuous service accrues during the layoff period for severance.
- The reduction for early commencement applicable to the accrued normal retirement pension payable commencing at age 65 for members terminating employment after completion of five years of continuous service is 4-1/2% per year prior to age 65.

Charleston
A monthly pension of $16.00 per year of credited service.

A member who (i) was actively employed at the Quonset Point facility on June 1, 2003, (ii) has accrued a benefit under the salaried plan attributable to salaried plan membership while a salaried employee at the Quonset Point facility, and (iii) has not incurred a break in service after April 1, 1974, may be entitled to an additional monthly pension. The additional monthly pension is equal to the excess, if any, of the monthly pension benefit determined by multiplying the Quonset Point benefit rate by the member's salaried plan membership while a salaried employee at the Quonset Point facility over the member's accrued benefit under the salaried plan attributable to such salaried plan membership.

In addition, all breaks in service prior to January 1, 1976, are bridged at $23.00 for members represented by the Metal Trades Council, Pattern Makers' Association or United Brotherhood of Carpenters, and for members who are not covered by a collective bargaining agreement at the Quonset Point facility.

Early Retirement Pension
A member retiring early on or after age 55 whose age plus service equal 85 points will be entitled to the full accrued benefit without reduction. A member retiring early with less than 85 points will have his accrued benefit reduced 3% for each point less than 85 or reduced 3% for each year prior to age 65, whichever provides the lesser reduction.

Disability Retirement Pension
Accrued normal retirement benefit.

iii. Service after 12/31/2006: Same as Final Average Pay Formula.

2025 Schedule SB, Part V – Summary of Plan Provisions

Early Retirement Pension

The benefit accrued to date of early retirement under (i), (ii) or (iii) below, whichever provides the greatest actuarial equivalent value:

i. The sum of (a) and (b) as follows:

   a. The final average pay formula benefit based on service accrued prior to January 1, 2007, reduced by 2-1/2% for each year between age 62 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

   b. The final average pay formula benefit based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

ii. The sum of (a), (b), (c) and (d) as follows:

   a. The RIP formula benefit either (1) with no reduction, if benefits commence at or after age 60, or (2) reduced as shown below for each year between age 60 and the date of commencement of benefits, if benefits commence prior to age 60.

Years of Benefit Eligibility Service	Early Payment Reduction per Year of Retirement Prior to Age 60	Years of Benefit Eligibility Service	Early Payment Reduction per Year of Retirement Prior to Age 60
5	7.00%	18	5.18%
6	6.86	19	5.04
7	6.72	20	4.90
8	6.58	21	4.76
9	6.44	22	4.62
10	6.30	23	4.48
11	6.16	24	4.34
12	6.02	25	4.20
13	5.88	26	4.06
14	5.74	27	3.92
15	5.60	28	3.78
16	5.46	29	3.64
17	5.32	30 & Over	3.50

   b. If the RIP formula benefit commences prior to age 62, after completion of 10 years of benefit eligibility service, a temporary monthly supplemental benefit is payable between early retirement date and age 62, or earlier death, equal to $100 plus $20.00 per year of credited service accrued prior to January 1, 2005 up to a maximum of 25 years. This temporary benefit is reduced by 15% for each year retirement precedes age 60.

   c. The split benefit formula benefit based on service accrued from January 1, 2005 to December 31, 2006, reduced by 2-1/2% for each year between age 62 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

d. The split benefit formula benefit based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

iii. The sum of (a), (b), (c) and (d) as follows:

a. The TOPS formula benefit payable after age 60 only with no reduction.

b. If the TOPS formula benefit commences prior to age 62, a temporary monthly supplemental benefit is payable between early retirement date and age 62, or earlier death, equal to $10.00 per year of credited service accrued prior to January 1, 2005. If retiring after completion of 25 years of continuous service as of December 31, 2004 and prior to age 62, an additional temporary monthly supplemental benefit is payable between early retirement date and age 62, or earlier death, equal to $225.

c. The split benefit formula benefit based on service accrued from January 1, 2005 to December 31, 2006, reduced by 2-1/2% for each year between age 62 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

d. The split benefit formula benefit based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis before completion of 10 years of continuous service.

Available Forms of Payment
Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are the 10 year certain and life annuity; and 50% and 100% contingent annuities. Other forms of payment available on an actuarial equivalent basis for benefit payable under RIP formula are five year certain and life annuity; 25% contingent annuity with five year pop-up; and level income at 62 option. For portion of benefit accrued under the final average pay formula for service prior to January 1, 2007, the 25% contingent annuity with five year pop-up and level income at 62 and 65 options are also available on an actuarial equivalent basis. For portion of benefit accrued under the split benefit formula for service January 1, 2005 to December 31, 2006, level income at 62 and 65 options are also available on an actuarial equivalent basis.

Employee Contributions
No employee contributions are required on or after January 1, 1995.

Termination
If terminating employment after completion of five years of continuous service, the accrued normal retirement pension is payable commencing at age 65. The benefit may commence prior to age 65 if early retirement requirements are satisfied, payable based on the benefit under (i), (ii) or (iii) below, whichever provides the greatest actuarial equivalent value:

i. The final average pay formula benefit reduced on an actuarial equivalent basis.

ii. The sum of (a) and (b) as follows:

a. The RIP formula benefit with a reduction for each year retiring early as shown below; in no event is an amount less than the member's own contributions with regular interest returned.

Years of Benefit Eligibility Service	Early Payment Reduction per Year of Retirement Prior to Age 65	Years of Benefit Eligibility Service	Early Payment Reduction per Year of Retirement Prior to Age 65

For service prior to January 1, 2007, final average pay is frozen as of December 31, 2010. Final average pay for service accrued from January 1, 2007 to December 31, 2013 is frozen as of December 31, 2013.

Breakpoint equals 125% of the average of the Social Security taxable wage bases in effect for each calendar year during the 35 year period ending in the year in which the member attains the Social Security retirement age but not greater than the Social Security taxable wage base in effect in the year of termination. Breakpoint is frozen as of December 31, 2010.

Minimum Benefit Formula
A monthly pension as shown below:

i. Service prior to 1/1/2002: The greater of (a) and (b), as shown below:
   a. 1.20% of final average pay per year of credited service, plus 0.40% of final average pay in excess of the breakpoint per year of credited service up to a maximum of 30 years.
   b. The greater of (1) two times the actuarial equivalent life annuity of the salary reduction or after-tax contributions accumulated with interest to the normal retirement date at the rate of 5% annually through December 31, 1980 and 8% annually thereafter and (2) the actuarial equivalent life annuity of the after-tax contributions accumulated with interest to the normal retirement date at the rate specified in section 411(c)(2) of the Internal Revenue Code.

ii. Service 1/1/2002 to 12/31/2006: $26.00 per year of plan membership service.

iii. Service after 12/31/2006: Same as Final Average Pay Formula.

Early Retirement Pension
The benefit accrued to date of early retirement based on service accrued prior to January 1, 2002, reduced by 2% for the base portion of benefit and 3% for the excess portion of benefit, for each year between age 65 and the date of commencement of benefits. Such amount shall not be less than the benefit provided by salary reductions or after-tax contributions reduced on an actuarial equivalent basis.

The benefit accrued to date of early retirement based on service accrued from January 1, 2002 to December 31, 2006, reduced by 2-1/2% for each year between age 62 and the date of commencement of benefits if benefits commence after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis if benefits commence prior to completion of 10 years of continuous service.

The benefit accrued to date of early retirement based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits if benefits commence after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis if benefits commence prior to completion of 10 years of continuous service.

Available Forms of Payment
Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are the 10 year certain and life annuity; and 50% and 100% contingent annuities. iv. Service 1/1/2014 to 12/31/2018: $25 per year of plan membership service. Plan membership service is frozen as of December 31, 2018.

Final average pay equals the average of the highest consecutive 60 monthly base rates of pay (including 100% of incentive compensation) received during last 120 months of plan membership. For service prior to January 1, 2007, final average pay is frozen as of December 31, 2010. Final average pay for service accrued from January 1, 2007 to December 31, 2013 is frozen as of December 31, 2013.

Early Retirement Pension
The benefit accrued at December 31, 2004, reduced on an actuarial equivalent basis.

The benefit accrued to date of early retirement based on service accrued from January 1, 2005 to December 31, 2006, reduced by 2-1/2% for each year between age 65 and the date of commencement of benefits, or on an actuarial equivalent basis, whichever produces the lesser reduction.

2025 Schedule SB, Part V – Summary of Plan Provisions

The benefit accrued to date of early retirement based on service accrued after December 31, 2006, reduced by 4.8% for each year between age 65 and the date of commencement of benefits if benefits commence after completion of 10 years of continuous service, or reduced on an actuarial equivalent basis if benefits commence prior to completion of 10 years of continuous service. No payment prior to age 55.

Available Forms of Payment
Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are 10 year certain and life annuity; and 50% and 100% contingent annuities. For portion of benefit accrued prior to January 1, 2007, lump sum cash out option also available on an actuarial equivalent basis.

Termination
If terminating employment after completion of five years of continuous service, the accrued normal retirement pension is payable commencing at age 65. The benefit may commence prior to age 65 on the same basis as for early retirement pension applicable to the benefit accrued based on service prior to January 1, 2007 and on an actuarial equivalent basis applicable to the remaining portion of the accrued benefit if early retirement requirements are satisfied.

Death Before Retirement
If a member dies while eligible for early retirement or while eligible for a vested benefit and leaves a surviving spouse, the surviving spouse will be entitled to the benefit based on service prior to January 1, 2007 that would have been payable had the member terminated employment on the date of death with payments to commence at the election of the surviving spouse on an actuarial equivalent basis.

For the portion of the benefit accrued for service after December 31, 2006, the surviving spouse will be entitled to the benefit that would have been payable had the member terminated employment on the date of death with payments to commence on the earliest date permitted thereafter and elected the 100% contingent annuitant option.

Death After Retirement
Depends on the form of pension elected.

Employee Transfers
Certain salaried employees who transfer between segments before January 1, 2005 remain subject to the terms of the salaried benefit structure that the employee was covered by prior to the transfer for benefit accruals prior to January 1, 2005. This summary of benefit provisions does not describe all such benefit structures. The benefit provisions pertaining to each such benefit structure are described in the summary of benefit provisions contained in the actuarial valuation report associated with such benefit structure.

47,851	-	49,050	47.00	49.00
49,051	&	Over	48.00	50.00

Early Retirement Pension

The benefit accrued to date of early retirement under the career average formula (or under the minimum benefit formula, if greater), payable on or after age 60 with no reduction. Also, a member retiring early on or after age 57 whose age plus service equals 82 points will be entitled to the full accrued benefit without reduction. A member retiring early with less than 82 points will have his accrued benefit reduced 4% for each point less than 82 or reduced 6% for each year prior to age 60, whichever provides the lesser reduction but subject to a maximum reduction of 12%.

In addition, if the early retirement benefit commences between ages 60 and 62 and after completion of five years of service, a temporary monthly supplemental benefit is payable between early retirement date and age 62, or earlier death, equal to $32.00 per year of service. If the early retirement benefit commences prior to age 60, a temporary monthly supplemental benefit is payable between the commencement date and age 62 in a reduced amount, as follows:

Age When Benefit Commences	Supplement per Year of Service
57	$26.00
58	28.00
59	30.00

Available Forms of Payment

Normal form of payment is a single life annuity. Optional forms of payment also available on an actuarial equivalent basis are 75% contingent annuity, and 50% and 100% contingent annuities with five year pop-up.

Employee Contributions

No employee contributions are required on or after January 1, 1995.

2025 Schedule SB, Part V – Summary of Plan Provisions

Termination
If terminating employment after completion of five years of service, the accrued normal retirement pension is payable commencing at age 65. The benefit may commence between ages 60 and 65 equal to the unreduced career average formula benefit plus the excess, if any, of the minimum benefit formula benefit reduced by 6% for each year retirement precedes age 65 over the unreduced career average formula benefit.

Members terminating with 20 years of service may commence benefits between ages 57 and 60 equal to the career average formula benefit reduced 8% for each year retirement precedes age 60 plus the excess, if any, of the minimum benefit formula benefit reduced by 6% for each year retirement precedes age 65 over the career average formula benefit reduced 8% for each year retirement precedes age 60.

Death Before Retirement
If a member dies while eligible for early retirement or while eligible for a vested benefit and leaves a surviving spouse, the surviving spouse will be entitled to the benefit that would have been payable had the member terminated employment on the date of death with payment of benefits to commence on the earliest date permitted thereafter and elected the 50% contingent annuitant option, reduced by 12% for commencement before age 60. If death occurs after age 50 and after completion of 15 years of service, the benefit will commence immediately reduced by 5% if commencement is between ages 55 and 60 and reduced by 10% if commencement is between ages 50 and 55.

Death After Retirement
Depends on the form of pension elected; in no event, is an amount less than the member's own contributions with regular interest returned.
