INDEPENDENT AUDITORS' REPORT

The Plan Administrator
New York Central Mutual Fire Insurance Company Retirement Income Plan

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of New York Central Mutual Fire Insurance Company Retirement Income Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2025, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, the statements of accumulated plan benefits as of December 31, 2024 and 2023, and the related statements of changes in accumulated plan benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of and for the years ended December 31, 2025, 2024 and 2023, stating that the certified investment information, as described in Note 4 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditors' Responsibilities for the Audit of the Financial Statements section:

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).
- The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all Plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certifications, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of U.S. GAAP.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with U.S. GAAP.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits, significant audit findings, and certain internal control-related matters that we identified during the audits.

Additional Information

2025 Supplemental Schedules Required by ERISA

The supplemental schedules of assets (held at end of year) and reportable transactions, are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion:

- The form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- The information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Notes to Financial Statements

1. Description of Plan:

The following brief description of New York Central Mutual Fire Insurance Company Retirement Income Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan Agreement for more complete information.

General: The Plan is a noncontributory defined benefit pension plan covering essentially all employees of New York Central Mutual Fire Insurance Company (the Company) and any subsidiaries and affiliates that have adopted the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Eligibility: Employees become eligible to participate on the first day of the month following their 21st birthday and completion of one year of service.

Effective January 1, 2024, the Plan was amended so that employees hired on or after January 1, 2024 are not eligible to participate in the Plan.

Pension Benefits: Participants are entitled to monthly pension benefits beginning at the later of normal retirement age (65) or five years of participation in the Plan. The monthly benefit is equal to 50% of average monthly compensation, up to the integration level (highest 60 consecutive months out of previous 120 months), plus 66.6% of their average monthly compensation in excess of the integration level. The benefit is reduced for early retirement or for less than normal years of service (but not less than 1.87% of the monthly average of the highest five consecutive years of compensation, multiplied by the years of service after March 1, 1984, in which the Plan is top-heavy, as defined by Internal Revenue Service regulations). Employees may elect to receive their pension benefits in various forms, including straight, single or survivorship life annuities, or lump-sum distributions subject to limitations as provided for in the Plan Agreement.

The Plan permits early retirement with reduced benefits for participants whose employment terminates on or after attaining early retirement age (55) but prior to normal retirement age.

The Plan also provides death and disability benefits.

Vesting: Participants are 100% vested after six years of service or attaining age 55 while still employed by the Company.

2. Summary of Significant Accounting Policies:

Basis of Accounting:

The accompanying financial statements are prepared on the accrual basis of accounting.

Investment Valuation and Income Recognition:

The Plan's investments are stated at fair value. Inputs to the valuation methodology for mutual funds are unadjusted quoted market prices for identical assets in active markets. The pooled separate accounts are valued based on the net asset values per share without further adjustment as a practical expedient to determine fair value. Net asset values are based on the aggregate fair values of the underlying investments. The Plan may redeem shares at net asset value daily, without restriction.

The funds held in the insurance company general account are stated at fair value which is the amount that would be received if withdrawing funds from the participating contract. Fair value is calculated using a cash-out factor based on an associated pool of general account assets determined on a book value basis (fair value approximates contract value).

Purchases and sales of investments are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Unrealized appreciation or depreciation on investments is charged or credited to the net assets of the Plan.

Actuarial Present Value of Accumulated Plan Benefits:

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service participants have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

The actuarial present value of accumulated plan benefits is determined by Principal Financial Group (Principal), and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The actuarial present value of accumulated plan benefits includes the liability for retirees guaranteed under the benefit index option. The significant actuarial assumptions used in the valuations as of December 31, 2024 and 2023 were:

1. Actuarial cost method – Unit credit
2. Salary increase – 3.5% per year
3. Life expectancy of participants – Pri-2012 Total dataset base rate mortality table projected generationally using the Principal Mortality Improvement Scale (Principal 2024) (Principal 2023 in 2023)
4. Retirement age – Ages 60 – 65 for active participants based on probability of retirement and age 65 for inactive participants
5. Investment return – 6.5%
6. Interest rate used to value liabilities – 6%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable to determine the actuarial present value of accumulated plan benefits.

Funding Policy:

The Company's funding policy is to make contributions to the Plan in amounts that are estimated to fully provide for all employees' benefits by the time they retire. The amount and timing of employer contributions are determined based on actuarial valuations and recommendations. Contributions for the years ended December 31, 2025, 2024 and 2023 met the minimum funding requirements of ERISA.

Plan Termination:

Should the Plan terminate at some future time, its net assets would generally not be available on a pro rata basis to provide participant benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC's benefit guarantee, while other benefits may not be provided for at all.

Use of Estimates:

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Payment of Benefits:

Benefits are recorded when paid.

Subsequent Events:

The Fund has evaluated events and transactions for potential recognition or disclosure through August 12, 2026 (the date the financial statements were available to be issued).

3. Investments and Fair Value Measurements (Unaudited):

Accounting guidance established a three-level fair value hierarchy that prioritizes the inputs used to measure assets at fair value. Inputs refer broadly to the assumptions that market participants would use in pricing the asset, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset and are based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own perceptions about the assumptions market participants would use in pricing the asset and are based on the best information available.

The three levels of fair value hierarchy are as follows:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Plan has the ability to access on the reporting date.

Level 2 – Inputs other than quoted market prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. If the asset or liability has a specific (contractual) term, a Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs that are unobservable for the asset or liability. The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

The Plan uses net asset value (NAV) per share (or its equivalent) as a practical expedient to determine the fair value of investments that (i) do not have a readily determinable fair value predicated upon quoted prices in active markets, and (ii) have the attributes of an investment company or prepare their financial statements consistent with the measurement principles of an investment company.

The fair values of investment assets valued at fair value are determined as follows as of December 31, 2025, 2024 and 2023:

	Based on		
2025	Level 1	Level 3	NAV
Mutual funds	$ 95,403,048	$ -	$ -
Insurance company general account	-	53,949,700	-
Pooled separate accounts	-	-	4,818,169
	$ 95,403,048	$ 53,949,700	$ 4,818,169
2024			
Mutual funds	$ 93,129,771	$ -	$ -
Insurance company general account	-	42,613,816	-
Pooled separate accounts	-	-	4,404,048
	$ 93,129,771	$ 42,613,816	$ 4,404,048
2023			
Mutual funds	$ 96,743,927	$ -	$ -
Insurance company general account	-	34,492,481	-
Pooled separate accounts	-	-	4,665,530
	$ 96,743,927	$ 34,492,481	$ 4,665,530

Level 3 investment purchases totaled $32,249,853, $36,026,209 and $5,730,245 for the years ended December 31, 2025, 2024 and 2023.

4. Financial Information Certified by Principal:

In accordance with Department of Labor Regulation 2520.103-8, the plan administrator has obtained certified "Statements of Account" from Principal as of December 31, 2025, 2024 and 2023 and for the years then ended that the information below is complete and accurate:

- Statements of Net Assets Available for Benefits – Investments.
- Statements of Changes in Net Assets Available for Benefits – Investment income.
- Schedule of Assets (Held at End of Year) – all items and amounts.
- Schedule of Reportable Transactions – all items and amounts.

5. Tax Status:

The Internal Revenue Service has determined that the Plan meets the requirements of Section 401(a) of the Internal Revenue Code and is exempt from income taxes under the provisions of Section 501(a).

The Plan obtained its latest determination letter, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The plan administrator believes that the Plan is currently designed and operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

6. Insurance Contract:

The Plan's contract with Principal Life Insurance Company (Principal Life) includes a benefit index option. Under the benefit index option, Principal Life provides each retired participant a contract to guarantee future benefit payments. The benefit index equals the present value of future amounts to be paid to retired participants and is considered allocated out of the Plan's investments. Accordingly, that portion of the Plan's investments are excluded from the statements of net assets available for benefits. The total investment in these contracts excluded from Plan assets was $33,402,392, $32,918,717 and $30,677,559 at December 31, 2025, 2024 and 2023.

Benefits paid from allocated contracts excluded from the statements of changes in net assets available for benefits were $3,014,152, $2,892,790 and $2,772,479 for the years ended December 31, 2025, 2024 and 2023.

7. Risks and Uncertainties:

The Plan invests in various investment securities. Investment securities are exposed to risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

SCHEDULE H, line 4i - SCHEDULE OF ASSETS (HELD AT END OF YEAR)

Assumptions prescribed by law

Mortality

Before benefit payment period

IRS Prescribed Mortality - Generational Non-annuitant, male and female.

During benefit payment period

IRS Prescribed Mortality - Generational Annuitant, male and female.

Assumptions selected by actuary

Inflation

2.40% increase per year.

Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.

Asset return

6.50% for the current plan year.

The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.

Expected expense

The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets. This is the best estimate available of upcoming year's expenses.

Retirement

Active participants

Age	Probability of retirement
60	10%
61	10%
62	25%
63	15%
64	15%
65	Remaining participants

Inactive participants are assumed to retire at age 65.

This assumption is based on the results of recent experience analysis and anticipated future experience.

Upcoming year salary increase

The preceding year's salary is increased using the S-5 Table from The Actuary's Pension Handbook, increased by 1.90% at each age. This table provides a rate of increase that declines as participants age.

Note: not used for Plan accounting calculations.

Age	Upcoming increase
25	6.08%
40	4.62%
55	3.78%

Expected salary increase is composed of salary inflation, a real wage growth and a merit increase. This reflects company salary increase philosophies along with more recent experience of the plan participants.

Disability

None. This plan does not offer a subsidized disability benefit therefore the disability assumption is built into the withdrawal assumption.

Marriage

75% married; husbands are 3 years older than wives.

This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.

Withdrawal

2003 Society of Actuaries Small Plan Age Table, multiplied by 1.00.

We rely on a publicly published table due to the limited size of the plan. The SOA Small Plan Age Table is the most recent withdrawal experience table published by the Society of Actuaries. A multiplier of 1.00 is applied to this table to reflect the results of the most recent experience analysis and anticipated future experience.

Wage base increase

3.50% per year.

Our Wage Base increase assumption are based on inflation and the real wage differential forecast from Social Security Trustee Report. Based on average annual real wage growth forecast from the Social Security Trustee report and historical averages, our best estimate places this assumption at 3.50%.

Compensation limit increase

2.40% increase per year used in the calculation of the IRC 404 maximum deduction cushion. See Calculated deduction in Rules and regulations.

Compensation limit increase is consistent with the inflation assumption.

Form of benefit and basis	50% of all participants will elect a benefit paid in a lump sum at the assumed retirement ages. The remaining participants will elect a monthly annuity on the normal form at the assumed retirement age. This assumption is based on the results of recent experience analysis and anticipated future experience. The single sum benefit is based on the Applicable Mortality and the plan's funding target interest rates, as prescribed.
Methods prescribed by law	
Liability measure	Funding target is the present value of the benefits accrued on the valuation date. Included in Funding Target is the value of any missed required minimum distributions (defined in IRC §401(a)(9) and Treasury Regulation §1.401(a)(9)), equal to back payments with interest at 7.50% Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.
Benefit accrual	All benefits paid at decrement are considered in total and then split to determine how much is included in funding target. The following pieces are included in the funding target. The portion based on the plan's definition of accrued benefit. The benefit portion in excess of the accrued benefit based on the ratio of the participant's years of service on the valuation date to the years of service the participant will have at the time of decrement. The benefits included in target normal cost are calculated similarly, by splitting the benefits. The target normal cost is based on the difference between the amount included in Funding Target and an amount calculated assuming the participant accrues service through the end of the plan year.
Lump sum payments	Lump sum payments are valued using the plan's funding target interest rates as required, per IRS guidance. These rates could differ from actual plan lump sum rates.

Methods selected by plan sponsor

Asset method

The asset valuation method is prescribed by law for plans that elect to use a value other than market value.

For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.

The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.

When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.

Segment rates

24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.

PBGC premium basis

Variable rate premiums are calculated using census, market value of assets and the one-month average of corporate bond rates in effect on the valuation date. You elected this Standard interest method for the 01/01/2023 plan year and the method must be used for five years before a change can be made.

Segment 1 years 0-5	Segment 2 years 5-20	Segment 3 years 20+
4.65%	5.28%	5.63%

Methods elected by actuary

Retirees

Assets and liabilities for current and future retirees are included.

Vested benefits

A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.

The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality

Based on Pri-2012 Total dataset base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2024).

Mortality base rates

Before benefit payment period

Employee amount-weighted, male and female

During benefit payment period

Retiree amount-weighted, male and female

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Total dataset base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.

Mortality improvement

Principal 2024 MI scale is based on MIM-2021-v4 application tool issued by SOA in October 2023 with the following parameters:

Parameter	Principal 2024
Historical dataset	SSA
Whittaker-Henderson Graduation	Order 3
Interpolation Structure	Basic
Graduated MI data last year ("jumping off" point)	2017
H/D transition ultimate year by age/cohort	2030/2030
Weight placed on interpolation by cohort	50%
Initial Slope periods (constraint)	2016-2017 (0.000)
LTR	SSA LTR 2024
COVID-19 or Excess load	None[1]

[1]Based on the sponsor's input, plan experience does not show a need for long-term excess death or Covid death load adjustments.

See Mortality documentation for rationale and additional information.

Interest rate used to value liabilities	6.00% The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.
Treatment of administrative expenses	No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses. Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer. Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.
Basis for lump sums	Interest rate Based on the three segment yield curve: 3.55%/3.95%/4.95% The plan document defines the lump sum interest rate based on IRC §417(e) rates which closely tie to the high quality corporate bond yields. According to our most recent study, the long-term expected yields for short/intermediate/long corporate bonds are 3.55%/3.95%/4.95%. For details, see Corporate AA yield in Table 3 of Long-Term Capital Market Assumptions link. Mortality We have selected the same mortality assumption for lump sum payments, but with a 50/50 blend of male and female total dataset base rates and mortality improvement scales. This reflects the IRS practice of defining lump sum mortality on a unisex basis.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Line 2a - Explanation of Assets
New York Central Mutual Fire Insurance Company Retirement Income Plan
EIN 15-0398170 Plan No. 001

The market value of assets on line 2a does not equal assets shown on Schedule H, Schedule I or Form 5500-SF. Schedule H, Schedule I and Form 5500-SF use the full value of contributions received after plan year end. Line 2a includes the value of $4,000,000 contributions received after the plan year end with a discounted value of $3,964,471.

In addition, line 2a includes assets allocated for retirees' guaranteed benefits of $32,918,717.

Schedule SB, Line 22 - Description Of Weighted Average Retirement Age
New York Central Mutual Fire Insurance Company Retirement Income Plan
EIN 15-0398170 Plan No. 001

The weighted average retirement age is weighted by the expected percentage of active participants retiring at each age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.

(1) Age	(2) Expected Active Headcount	(3) Retirement Rate	(4) Expected Retirements (2)*(3)	(5) Weighted Age (1)*(4)

This report reflects the maximum benefit limits under Internal Revenue Code (IRC) Section 415 and maximum compensation limits under IRC Section 401 in effect on the first day of each plan year.

The following is a summary of plan provisions and does not alter the intent or meanings of the provisions contained in the contract or plan document. This report reflects the provisions of the plan restatement of 12/31/2023, signed 12/01/2023.

Plan eligibility

Age	Attained age 21.
Service	1,000 hours of service.
Entry	No new or former active participant shall become an active participant if hired or rehired after 12/31/2023.

Normal retirement benefit

Age	The later of attained age 65 or five years of plan participation.
Form	Monthly annuity guaranteed for ten years and life thereafter (optional forms may be elected in advance of retirement).
Amount (accrued benefit)	The greater of a) or b): a) The product of 1), 2) and 3): 1) 50% of average compensation not in excess of the integration level plus 66.6% of average compensation in excess of the integration level. 2) Accrued benefit adjustment. 3) Short service percentage (based on 35 years). b) The product of 1), 2) and 3): 1) 50% of average compensation. 2) Accrued benefit adjustment. 3) Short service percentage (based on 30 years). Minimum benefit for non-highly compensated employees equal to expected benefit on February 28, 1989, multiplied by accrued benefit adjustment. Minimum accrued benefit for active participants will not be less than the monthly retirement benefit accrued under the plan as of the day before 01/01/2018.

Early retirement benefit

Age	Attained age 55.
Form	Same as normal retirement benefit.
Amount	Accrued benefit on early retirement date reduced by 6 2/3% for each year up to five and 3 1/3% for each year between five and ten that the early retirement date precedes normal retirement date.

Late retirement benefit	
Age	No maximum age.
Form	Same as normal retirement benefit.
Amount	Greater of accrued benefit on late retirement date or accrued benefit on normal retirement date actuarially increased to late retirement date.

Termination benefit	
Vesting percentage	Subsequent to two years of vesting service, 20% plus 20% per year thereafter. 100% after eligible to early retire.
Form	Same as normal retirement benefit with income deferred until normal retirement date.
Amount	The sum of a) and b): a) The amount of annuity which could be purchased on the normal retirement date by the vested value. b) The excess of accrued benefit on date of termination over (a) multiplied by the vesting percentage. At any time on or after termination, a participant may elect to receive his vested value in lieu of any and all other benefits.

Survivor annuity death benefit (a vested benefit)	
Eligibility	Qualified married participant fully or partially vested in an accrued benefit.
Form	Monthly annuity payable to spouse, deferred to participant's earliest retirement date if later than the date of death.
Amount	If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day.
Minimum	Vested value as of the date of death, if any, or the value of the single sum death benefit, whichever is greater.

Single sum death benefit	
Eligibility	All participants.
Form	Single sum payable immediately.
Amount	The present value of the vested accrued benefit on the date of death.

Definitions	
Accrued benefit adjustment	The percentage determined by dividing the number of years of service to date by the number of years of service between date of employment and normal retirement age.
Compensation	Earnings based on Code Section 3401(a) excluding reimbursements or other expense allowances, fringe benefits (cash and noncash), moving expenses, deferred compensation (other than elective contributions), and welfare benefits.
Average compensation	The monthly average of compensation received for the 60 consecutive months out of the 120 latest compensation months prior to retirement date which gives the highest average.
Integration level	The monthly average of the social security taxable wage bases in effect under Section 230 of the Social Security Act for each year in the 35-year period ending with the year in which the employee attains social security retirement age.
Optional forms of benefit payments	The optional forms of benefit payments are: • Monthly annuity payable for life, or 5, 10, or 15 years certain and life. • Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 66 2/3, 75, or 100. • Single sum payment equal to the present value of the retirement benefit. The optional form conversion basis is 7.5% interest and the mortality table in Revenue Ruling 95-6 for payments other than lump sums. Lump sum provisions Small amount force out (SAFO) – allowed up to $7,000. Lump sums in excess of SAFO - are allowed. Conversion –greater of the deferred or immediate rate with early retirement factor based on the applicable interest rate and applicable mortality table as set forth in Code Section 417 for lump sum payments. The applicable interest rate uses the second calendar month proceeding the first day of the stability period, which is the successive period of one calendar month that contains the annuity starting date for distribution and for which the applicable interest rate remains constant.
Short Service Percentage	The percentage obtained by dividing the number of years of service between a participant's date of employment and later of normal retirement age and late retirement age by 35 for the benefit calculated under (a), and 30 for the benefit calculated under (b) for normal retirement benefit (maximum 100%).

Changes in Principal Eligibility or Benefit Provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.
