REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Benefit Plans Committee
Gannett Retirement Plan

Scope and nature of the ERISA Section 103(a)(3)(C) audit
We have performed audits of the financial statements of the Gannett Retirement Plan (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2025 and 2024, and the related statements of changes in net assets available for benefits for the years ended December 31, 2025 and 2024, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2025 and 2024, and for the years ended December 31, 2025 and 2024, stating that the certified investment information, as described in Note 4 to the financial statements, is complete and accurate.

Opinion
In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Grant Thornton LLP is a U.S. member firm of Grant Thornton International Ltd (GTIL). GTIL and each of its member firms are separate legal entities and are not a worldwide partnership.

Basis for opinion
We conducted our audits in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of management for the financial statements
Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor’s responsibilities for the audit of the financial statements
Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures

responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

NOTE 1 — Description of the plan

General

The following description of the Gannett Retirement Plan (the "Plan" or the "GRP") provides only general information. Participants should refer to the Plan document for a more detailed description of the Plan's provisions.

The GRP is a defined benefit plan providing benefits to eligible employees of USA TODAY Media Corp. (the "Company" or the "Plan Sponsor"), formerly Gannett Media Corp., and certain of its subsidiaries. As of December 31, 2025, there were approximately 8,100 participants in the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

In June 2008, the Company's Board of Directors authorized and approved an amendment to the Plan which resulted in most participants in the Plan having their benefits frozen as of August 1, 2008. After that date, the service and earnings of these participants is not considered for purposes of calculating their retirement benefits, and the Plan was closed to new participants. Participants who were employed by the Company or one of its participating affiliates as of August 1, 2008 and whose benefits were frozen as a result of the amendment (as well as certain groups whose benefits were frozen on similar terms as of a later date) have their frozen benefits periodically increased by a cost-of-living adjustment until benefits commence.

Plan Administrator

The Gannett Benefit Plans Committee serves as the Plan Administrator.

Plan Assets

Effective January 1, 2024, approximately $10.4 million of net assets was transferred from the GRP to the Gannett Retirement Plan for Certain Union Employees (the "Union Plan"). This transfer represented approximately 188 participants. The Master Trust includes all of the investments of the GRP and the Union Plan.

Plan Benefits

Although benefit provisions of the subsidiaries covered by the Plan vary, retirement benefits are generally payable immediately upon departure from the Company. For participants covered under the Plan's primary pension equity formula, participants' benefits accrued through December 31, 1997 were converted to a percentage of their pay. For each year of service after January 1, 1998, participants accrue an additional percentage, based on years of service with the Company, as defined by the Plan and all Plan amendments, including the June 2008 amendment referred to above. Participants' final benefits are calculated by applying the total percentage accrued through their termination date to their final average earnings. For participants whose benefits were frozen as of August 1, 2008, accrued percentages and final average earnings shall be calculated as of July 31, 2008. Other formulas apply to specified groups of participants. Subject to the payment rules of the applicable formula, the calculated benefit may be paid as a lump-sum payment, life annuity, contingent annuity, or other acceptable optional form. Effective January 1, 2008, the majority of participants became fully vested after their third or fifth year of service.

Purchase of Pension Annuity Contract

On October 31, 2025, the Plan Sponsor entered into an agreement pursuant to which the Plan used a portion of its assets to purchase annuities from one insurance company (the "Insurer") and transferred approximately $197.7 million of the Plan's pension liabilities and related pension assets. As of November 7, 2025 (the "Effective Date"), this agreement irrevocably transferred to the Insurer future Plan benefit obligations for certain U.S. retirees and beneficiaries ("Annuity Participants") beginning with payments due to the Annuity Participants on January 1, 2026 and neither the Plan nor the Company has any financial responsibility for the Annuity Participants' benefits on or after such date. As of the Effective Date, the Insurer assumed responsibility for administrative and customer service

support, including distribution of payments to the Annuity Participants. Annuity Participants' benefits were not reduced as a result of this transaction.

Contributions to the Plan

The Company and its participating subsidiaries have to date provided the Plan with assets sufficient for benefit payments, and funding has been accomplished through contributions when necessary. Minimum employer contributions are calculated based on actuarial estimates supplied by Willis Towers Watson, the Plan's appointed actuary (the "Actuary"), and are sufficient to meet the minimum funding requirements of ERISA as modified by the Pension Protection Act of 2006. The Plan met the ERISA minimum funding requirements for 2025 and 2024.

Plan Termination

Upon termination of the Plan, participants become fully vested in benefits accrued to date (to the extent funded). The net assets of the Plan would be allocated for benefits, as prescribed by ERISA and related regulations, in the following order: (a) annuity benefits payable to participants or their beneficiaries who were receiving benefits for at least three years and benefits that could have been payable to non-retired participants three years prior to termination; (b) other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC"); (c) all other vested benefits; and (d) non-vested benefits. The financial position of the Plan and the Company and guarantees available from the PBGC would determine the extent of benefits provided to participants if the Plan were terminated. As of December 31, 2025, the Company and its subsidiaries did not have a plan to terminate the Plan.

NOTE 2 — Summary of significant accounting policies

Basis of Accounting and Use of Estimates

The accompanying financial statements have been prepared on the accrual basis of accounting. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Risks and Uncertainties

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation, and demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible changes in these estimates and assumptions in the near term would be material to the financial statements. Investment securities are exposed to various risks such as interest rate risk, market risk, and credit risk. Due to the level of risk associated with certain investment securities, it is at least reasonably possible changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Income Recognition

The Master Trust's investment income is accrued when earned, and gains or losses on such assets are recorded when realized. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Master Trust's gains and losses on investments bought and sold as well as held during the year.

Valuation of Investments

The Plan's investments are held in the Master Trust. Investments in the Master Trust are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). See Note 7 — Fair value measurements for further discussion and disclosures related to fair value measurements. Pending purchases and sales

of securities relate to security trades executed prior to the balance sheet date but not yet settled as the Plan records purchases and sales on a trade-date basis.

Payment of Benefits

Benefits are recorded when paid.

Administrative Expenses

The Plan incurs expenses directly related to its management, which consist primarily of third party administrator fees, trustee fees, PBGC fees, and actuarial fees. These expenses are reported on the statements of changes in net assets available for benefits as administrative expenses.

NOTE 3 — Actuarial Present Value of Accumulated Plan Benefits and Changes in Accumulated Plan Benefits

Accumulated plan benefits represent the actuarial present value of estimated future periodic payments, including lump-sum distributions attributable to services rendered by the employees through the valuation date under the Plan's provisions. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances (e.g., retirement, death, disability, or termination of employment) are included to the extent they are deemed attributable to employee service rendered through the valuation date. Participants' interests in the Plan are actuarially determined for each year.

The present value of obligations for benefits is determined to be the present value of retirement benefits accumulated by participants during the current and prior years to be paid at or during retirement less benefits forfeited or previously paid.

Significant assumptions underlying accumulated benefit information include the following:

- *Discount rates:* The discount rate was 5.25% for both Plan years ended December 31, 2025 and 2024, respectively.

- *Retirement rates:* Retirement rates are estimated to range from 16% at age 55 to 100% at age 70 for both the Plan years ended December 31, 2025 and 2024.

- *Mortality rates:* Mortality rates as of both December 31, 2025 and 2024 were calculated using the Pri-2012 mortality base table projected after 2012 using the same model and assumptions as the MP-2021 projection scale (unadjusted) with separate tables for contingent survivors.

The foregoing actuarial assumptions are based on the presumption the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

At December 31, the actuarial present value of accumulated benefits is summarized as follows:

	2025	2024
Vested benefits:		
Participants currently receiving benefits	$ 399,029,228	$ 604,173,764
Participants entitled to deferred benefits	205,111,391	235,578,315
Non-vested benefits	164,759	242,219
Total	$ 604,305,378	$ 839,994,298

Accumulated employee contributions, including interest, were approximately $0.07 million and $0.1 million at December 31, 2025 and 2024, respectively. Interest was credited on these employee contributions at an annual rate of 5.10% and 5.25% during 2025 and 2024, respectively.

The significant factors affecting the change in the actuarial present value of accumulated plan benefits for the years ended December 31, 2025 and 2024 were as follows:

	2025	2024
Actuarial present value of accumulated Plan benefits as of the beginning of the year	$ 839,994,298	$ 884,948,533
Increase (decrease) during the year attributable to:		
Benefits accumulated and actuarial loss (gain)	7,614,744	6,225,582
Benefits paid, including purchase of annuity contract	(280,064,896)	(84,915,274)
Transfers	—	(10,474,482)
Increase due to decrease in the discount period	36,747,997	44,231,770
Change in actuarial assumptions[(a)]	13,235	(21,831)
Actuarial present value of accumulated Plan benefits as of the end of the year	$ 604,305,378	$ 839,994,298

[(a)] Assumption changes in 2025 primarily related to an update in the basis used to convert annuities to lump sums and PEP balances to annuities, reflecting the 2025 discount rates and the most recent mortality tables. Assumption changes in 2024 primarily related to an update in the basis used to convert annuities to lump sums and PEP balances to annuities, reflecting the 2024 discount rates and an update to the mortality table.

NOTE 4 — Master Trust and Investments

The Master Trust includes the net assets of both the Plan and the Union Plan. The Gannett Benefit Plans Committee is the named fiduciary responsible for overseeing the administration of the investments. The Northern Trust Company ("Northern Trust") is the Trustee of the Plan, and the Gannett Benefit Plans Committee appoints various investment managers to direct the Master Trust's investments. The Trustee, with its consent, may (but need not) be appointed to manage some or all Plan investments; except to the extent an agreement is made for the Trustee to assume investment management responsibilities, the Trustee serves as a directed trustee. As of December 31, 2025 and 2024, the Plan's net assets available for benefits represented 98.5% and 98.8% of the Master Trust, respectively.

The Plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Northern Trust has certified that the investment information disclosed in the accompanying financial statements, including the Plan's interest in the Master Trust and the underlying investment information of the Master Trust, is complete and accurate. Such information includes investments, pending sales (purchases) of securities, accrued interest and dividends receivable, interest and dividends of investments, and the net appreciation (depreciation) of investments as of and for the Plan years ended December 31, 2025 and 2024.

The following table presents the net assets available for benefits for the Master Trust and the Plan:

NOTE 5 — Income tax status

The Plan has received a determination letter from the Internal Revenue Service ("IRS") dated February 10, 2021, stating the Plan is qualified under Section 401(a) of the Internal Revenue Code (the "Code") and, therefore the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. Subsequent plan amendments have been executed since receiving the determination letter but the Plan Administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Code and, therefore, believes the Plan is qualified and the related trust is tax exempt.

GAAP requires plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan and has concluded there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

NOTE 6 — Related party transactions

The Plan owns investments managed by Northern Trust and BlackRock, Inc., a beneficial owner of USA TODAY Co., Inc. common stock. USA TODAY Media Corp. is a wholly-owned subsidiary of USA TODAY Co., Inc. In addition, the Plan incurs expenses associated with administering the Plan, which are paid to Northern Trust. These transactions qualify as party-in-interest transactions; however, they are exempt from the prohibited transactions rules under ERISA.

NOTE 7 — Fair value measurements

Fair value is defined under the Financial Accounting Standards Board Accounting Standards Codification ("ASC") 820 as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). To measure fair value, a hierarchy has been established requiring an entity to maximize the use of observable inputs and minimize the use of unobservable inputs. As such, the hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

The three levels of the fair value hierarchy in ASC 820 are described below:

- Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets the Master Trust has the ability to access.

- Level 2 – Inputs to the valuation methodology include:
  - Quoted prices for similar assets or liabilities in active markets;
  - Quoted prices for identical or similar assets or liabilities in inactive markets;
  - Inputs other than quoted prices observable for the asset or liability; and
  - Inputs derived principally from or corroborated by observable market data by correlation or other means.

  If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

- Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Below is a description of the valuation methodologies used for assets and liabilities measured at fair value. There have been no changes in the methodologies used at December 31, 2025 and 2024.

Cash and cash equivalents: Includes cash held at the custodian for the day-to-day cash management of the Master Trust, accruals and small amounts of cash held by various separate account managers. The carrying value of cash and cash equivalents approximates fair value due to their short-term nature.

Corporate stock: Corporate stock is classified as Level 1 and valued primarily at the closing price reported on the active market on which the individual securities are traded.

Corporate and government bonds: Corporate and government bonds are a type of debt security issued by a corporation and are primarily valued using trades or quotes in secondary markets for that specific issue or similar security.

Interests in common collective trust funds: These investments will vary based on the chosen strategy of the Master Trust. Interests in common/collective trusts are primarily equity and fixed income investments valued using net asset values provided by the administrator of the underlying fund available daily to the Plan Administrator. Where daily net asset values are not provided, interests in common/collective trusts are valued either through the use of a net asset value as provided monthly by the fund family or fund company or through proprietary models with varying degrees of complexity. Shares in the common/collective trusts are generally redeemable upon request.

Partnership/joint venture interests: Partnerships/joint ventures are classified as Level 3 and valued in consideration of items such as expected cash flows, changes in market outlook, and subsequent rounds of financing.

These investments are included in Level 3 of the fair value hierarchy because exit prices tend to be unobservable and reliance is placed on the above methods. Most of the partnerships are general leveraged buyout funds while others include a venture capital fund, a fund formed to invest in special credit opportunities, an infrastructure fund, and a real estate fund. Interests in partnership investments may be sold on the secondary market but cannot be redeemed. Instead, distributions are received as the underlying assets of the funds are liquidated. As of both December 31, 2025 and 2024 there was $3.1 million in unfunded commitments related to partnership/joint venture interests

The methods described above may produce a fair value calculation not indicative of net realizable value or reflective of future fair values. Furthermore, while the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. Additionally, as permitted by GAAP, the Master Trust uses net asset values as a practical expedient to determine the fair value of certain investments. These investments measured at net asset value have not been classified in the fair value hierarchy. The amounts presented in the table below are intended to permit reconciliation to the amounts presented in the statements of net assets available for benefits. Investment transactions may occur daily, and investments are redeemable at any time.

The following table sets forth, by level within the fair value hierarchy, the Master Trust's assets at fair value as of December 31, 2025:

	Level 1	Level 2	Level 3[a]	Total

The following table sets forth by level, within the fair value hierarchy, the Master Trust's assets at fair value as of December 31, 2024:

	Level 1	Level 2	Level 3[a]	Total
Assets:

Investments measured at net asset value using the practical expedient				
Interest in common/collective trusts [b]:				
Fixed income				23,163,298
Total investments in Master Trust at fair value				$ 870,037,300

[a] For the year ended December 31, 2024, includes $2.9 million of purchases related to partnerships and joint ventures.
[b] Fund files as direct filing entity and, as such, investment strategy disclosures are not required.

In accordance with Accounting Standards Update 2018-09, we have determined that assets for which the net asset value of the fund was available from the administrator but was not provided to the Plan Administrator on a daily basis can be included in the fair value hierarchy rather than applying the practical expedient and have reflected this in the fair value measurement tables for 2025 and 2024 above.

NOTE 8 — Subsequent events

Management evaluated subsequent events for the Plan through September 17, 2026, the date the financial statements were available to be issued. Effective October 30, 2026, the George W. Prescott Publishing Company

Pension Plan and the Times Publishing Company Defined Benefit Pension Plan will be merged with and into the GRP. Effective October 31, 2026, the GRP will be terminated. Plan management is not aware of any other subsequent events that would require recognition or disclosure in the accompanying financial statements.

SCHEDULE SB ATTACHMENTS

Schedule SB, Part V
Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis

• Applicable month	December
• Interest rate basis	Full Yield Curve

Interest rates for plan funding purposes:

• 10-year rate	5.20%
• 20-year rate	5.56%
• 30-year rate	5.58%
• Effective interest rate	5.23%

As permitted by law, a yield curve reflecting returns on high quality corporate bonds (A, AA and AAA) is used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are prescribed by law and reflect current market conditions (specifically, the average market conditions for the month preceding the valuation date) they may from time to time be inconsistent with other economic assumptions used in the valuation, which may reflect both current economic conditions and assumed future conditions.

Compensation Increase

N/A

Future Increases in Social Security

Social security benefits are assumed to increase in the future due to increases in the national average wage index of 4.00% per year, and compensation and benefit limits are assumed to increase 2.00% per year.

SCHEDULE SB ATTACHMENTS

Assumed Cost-of-Living Adjustments

For any active participant as of July 31, 2008 who was frozen as of August 1, 2008, a 2.0% COLA (prorated for partial years) is applied to the frozen benefit until assumed retirement date. The 2.0% is a long-term assumption consistent with historical 10-year and 30-year averages of the relevant index.

Lump Sum Conversion Rate

For the PPA funding valuation, lump sums are determined using the PPA Full Yield Curve.

Inclusion Date

The valuation date coincident with or next following the date on which the employee becomes a participant.

Plan Related Expenses

The amount included for plan-related expenses is $6,915,501. This is estimated as 0.8% of January 1, 2025 assets plus the PBGC variable-rate premium due in October calculated using the Alternative Method. The loads are added to the normal cost on January 1.

Mortality

Separate rates for non-annuitants and annuitants based on Pri-2012 “Employees” and “Healthy Annuitants” (participants and beneficiaries combined) tables, respectively, without collar or amount adjustments and then projected forward with a generational projection as specified in the regulations under §1.430(h)(3)-1 using the IRS adjusted Scale MP-2021 (i.e., MP-2021 with no mortality improvement for 2020-2023 and future mortality improvement capped at 0.78% for years after 2024).

SCHEDULE SB ATTACHMENTS

Form of Payment

Participants under the pension equity formula are assumed to take their benefit as a lump sum. For active participants, 60% of these lump sums are assumed to be paid immediately upon termination, with the remaining 40% deferred. For participants who terminated employment within one year of the census date, 40% of these lump sums are assumed to be paid immediately upon termination, with the remaining 60% deferred. For participants who terminated employment at least one year prior to the census date, 5% are assumed to be paid immediately with the remaining 95% deferred. For participants who are assumed to defer benefits, if younger than 58, then assumed to defer benefits until age 58; if older than 58, then assumed to defer benefits until age 65; if older than 65, then assumed to defer until age 70. Participants frozen under a grandfathered benefit or still accruing under a formula other than the pension equity formula are assumed to take their benefit as an annuity with terminated vested participants commencing at age 65. For participants assumed to commence an annuity, 50% are assumed to elect a single life annuity and 50% are assumed to elect a 100% joint and survivor annuity.

Marriage

It is assumed that 80% of active male participants and 50% of active female participants are married to an eligible spouse.

Female spouses are assumed to be three years younger than male participants; male spouses are assumed to be three years older than female participants.

Asset Method

The market value of assets, including discounted receivables, on the valuation date, adjusted for 2/3 of the prior year’s investment gains (losses) and 1/3 of the second prior year’s investment gains (losses). Investment gains and losses are defined as the excess or deficiency of the expected return on the market value (at an assumed rate of 5.25%, not to exceed the third segment rate for that year) over the actual return on the market value of assets, including discounted receivables, for any given year. The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

SCHEDULE SB ATTACHMENTS

Future Increases in Maximum Benefits and Plan Compensation Limitations

Accrued benefits projected to be paid in future years are limited to the maximum presently allowed under IRC §415. Plan compensation is limited to the maximum presently allowed under IRC §401(a)(17). No provision is made for future increases in the maximum annual benefit or compensation limit.

Employees

It was assumed there will be no new or rehired employees.

Data Sources

These calculations are based on census data as of January 1, 2025 provided by the WTW BenefitConnect system and team. These data files were reviewed and approved by Gannett. In certain cases, we used stored information that had been provided for purposes of prior years' actuarial valuations, where Gannett indicated that the stored information was the most accurate information available.

Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussion with the plan sponsor, assumptions or estimates were made when data were not available or were apparently inconsistent. The discussion also would consider adjustments to reflect any significant events that occurred between the date the data was collected and the measurement date; no such adjustments were made in this valuation. Please see the GRP Data Summary sent to Gannett on April 18, 2025 for sources of data, a summary of data questions and answers and a description of assumptions that were made for missing or apparently inconsistent data.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Valuation Date

First day of plan year

Funding Target

Present value of accrued benefits as required by regulations under IRC §430.

Target Normal Cost

Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

SCHEDULE SB ATTACHMENTS

Decrement Timing

The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Benefits not Included in Valuation

All benefits described in Appendix B of this report were valued based on discussions with Gannett regarding the likelihood that these benefits will be paid. WTW has reviewed the plan provisions with Gannett and, based on that review, is not aware of any significant benefits required to be valued that were not.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Marital Assumptions

- Percent married — The assumed percentage married is based on the general population statistics on the marital status of individuals of retirement age.
- Spouse age — The assumed age difference for spouses is based on general population statistics on the age difference for married individuals of retirement age.

As permitted by law, a yield curve reflecting returns on high quality corporate bonds (A, AA and AAA) is used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are prescribed by law and reflect current market conditions (specifically, the average market conditions for the month preceding the valuation date) they may from time to time be inconsistent with other economic assumptions used in the valuation, which may reflect both current economic conditions and assumed future conditions.
