INDEPENDENT AUDITORS' REPORT

To the Executive Committee of the Board of Directors and Plan Participants
Maynard Nexsen, PC Pension Plan

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit
We have performed audits of the accompanying financial statements of the Maynard Nexsen, PC Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) [ERISA Section 103(a)(3)(C) audit]. The financial statements comprise the statements of net assets available for benefits as of December 31, 2025 and 2024, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of and for the years ended December 31, 2025 and 2024, stating that the certified investment information, as described in Note 4 to the financial statements, is complete and accurate.

Opinion
In our opinion, based on our audits and on the procedures performed as described in the Auditors' Responsibilities for the Audit of the Financial Statements section—

- the amounts and disclosures in the financial statements referred to above, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- the information in the financial statements referred to above related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion
We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements
Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; and for the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all Plan amendments; administering the Plan; and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements
Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing

an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings and certain internal control related matters that we identified during the audit.

Other Matter – Supplemental Schedules Required by ERISA,
The supplemental schedules of assets (held at end of year) as of December 31, 2025 and reportable transactions for the year ended December 31, 2025, are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with generally accepted auditing standards. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion—

- the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment

information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

- the information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

1. DESCRIPTION OF THE PLAN

The following description of Maynard Nexsen, PC Pension Plan (the Plan) provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan Sponsor, Maynard Nexsen, PC (the Firm), established the Plan effective as of January 1, 2016. The Plan, as amended and restated, is a cash balance defined benefit pension plan covering certain shareholders of the Firm. Shareholders are eligible to participate in the Plan subject to certain minimum compensation requirements. In addition, shareholders must be at least 21 years of age and have attained 1,000 hours of service within one year, as defined. Eligible shareholders become participants on the first day of the calendar month coinciding with or next following satisfaction of these requirements. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Plan is administered by the Firm's Benefits Committee (the Committee), which is a committee within the Executive Committee of the Firm. The Committee has overall responsibility for the operation and administration of the Plan. The Committee determines the appropriateness of the Plan's investment offerings and monitors investment performance.

Participant Accounts

Under the Plan's provisions, amounts are credited by the Firm to the participants' hypothetical accounts. The compensation credits are fixed dollar amounts determined from a schedule set forth in the Plan document based on the participant's age and certified compensation, each determined as of January 1 of the Plan year. Age and credited service are determined in whole years.

Participants' hypothetical accounts also receive investment credits. The investment credit rate is the annual rate of interest on 30-year Treasury securities in effect for the December preceding the beginning of the Plan year, and is credited as of the last day of the Plan year. The rate applicable to the 2025 and 2024 Plan years was 4.58% and 4.14%, respectively.

Funding Policy

The Plan's funding policy is for the Firm to contribute an amount which will meet or exceed the annual ERISA minimum funding requirement. During 2025 and 2024, the Firm made contributions of $8,850,292 and $6,843,043, respectively. The Firm's contributions for 2025 and 2024 exceeded the minimum funding requirements of ERISA.

Although it has not expressed any intention to do so, the Firm has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

Pension Benefits

Each year, participants' hypothetical accounts are credited for that Plan year with a hypothetical allocation amount based on age and compensation. If an eligible shareholder became a participant subsequent to January 1 of the Plan year, the shareholder's hypothetical allocation would be prorated based on the number of months for which he or she was a participant. Hypothetical

allocations accrue monthly and are credited as of the last day of the month. For each Plan year continuing to the end of the Plan year and before payment of a participant's accrued benefit commences, each participant's hypothetical account would be credited, whether or not he or she remained an employee, with a hypothetical interest amount determined by a formula defined in the Plan document. The benefit to which a participant is entitled would be the benefit that can be provided from the participant's vested hypothetical account.

Upon normal retirement (age 65), a participant will be entitled to a monthly benefit which is equal to the amount of a life annuity, payable monthly and commencing on the day after the normal retirement date (as defined), which is the actuarial equivalent of the balance in the participant's hypothetical account as of the normal retirement date, taking into account all hypothetical allocations and interest adjustments.

Participants who are married as of the date benefits are set to begin will automatically receive their accrued benefits in the form of a joint and survivor annuity, and unmarried participants will automatically receive a life annuity, unless other elections are made. If a participant's vested benefit under the Plan does not exceed $1,000 or the participant elects not to have benefits paid in the form of an annuity, the participant's benefit will be distributed in a single lump-sum payment. Distributions may also be rolled over to another qualified plan or individual retirement account.

Payment of accrued benefits will be made to disabled participants as if the participant had retired at his or her normal retirement date. Death benefits will be paid to a participant's designated beneficiary and will equal 100% of the actuarial equivalent of the participant's accrued benefit. Participants who terminate employment for reasons other than normal retirement, disability or death are entitled to receive only the vested percentage of the participant's accrued benefit.

Vesting
Vesting is based on years of continuous service. A participant is 20% vested after two years of credited service and 100% vested after three years of credited service. Participants will, however, become 100% vested upon normal retirement, disability or death, regardless of length of service.

Plan Amendment
Effective April 1, 2025, the Plan was amended to permit certain former employees of Ogletree, Deakins, Nash, Smoak & Stewart, P.C. who were hired by the Firm in March 2025 to participate in the Plan, and to grant such employees prior service credit for purposes of participation and vesting, subject to the other eligibility requirements of the Plan. The effect of this amendment will be reflected in the actuarial valuation as of January 1, 2026.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting
The financial statements of the Plan were prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (GAAP).

Use of Estimates
The preparation of financial statements in accordance with GAAP requires management to make

estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Investment Valuation and Income Recognition
Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as those held during the year.

Payment of Benefits
Benefit payments to participants are recorded upon distribution.

Employer Contributions
Employer contributions are recorded in the period the Firm makes the contribution or, if earlier, the period in which the contribution becomes a legal obligation of the Firm.

Administrative Expenses
The Plan’s expenses are paid either by the Plan or the Firm, as provided by the Plan document. Expenses that are paid by the Firm are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying statements of changes in net assets available for benefits. In addition, certain investment related expenses are included in net appreciation in fair value of investments presented in the accompanying statements of changes in net assets available for benefits.

Subsequent Events
The Plan’s management has evaluated subsequent events through September 29, 2026, the date the financial statements were available to be issued.

Actuarial Present Value of Plan Benefits
Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan’s provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of employees who have died, and (3) present employees or their beneficiaries. Benefits under the Plan are based on employees’ hypothetical account balances. The accumulated plan benefits for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances – retirement, death, disability and termination of employment – are included to the extent that they are deemed attributable to employee service rendered as of the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary from Principal Financial Group and is the amount that results from applying actuarial assumptions

to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits is presented as of January 1, 2025 and 2024, the most recent benefit information dates, which differ from the dates of the accompanying statements of net assets available for benefits.

The significant actuarial assumptions used in the valuation as of January 1, 2025 and 2024, are as follows:

- Mortality rates for participants: Pri-2012 Total dataset base rate mortality table, projected generationally using the Principal Mortality Improvement Scale (Principal 2024) in 2025 [Pri-2012 Total dataset base rate mortality table, projected generationally using the Principal Mortality Improvement Scale (Principal 2023) in 2024]
- Retirement age: Age 65 in 2025 and 2024, respectively
- Interest rate: 4.58% and 4.14% in 2025 and 2024, respectively
- Withdrawal: 10% per year in 2025 and 2024, respectively
- Form of benefit: 100% of participants are assumed to elect a single lump-sum distribution at the assumed retirement age

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. At January 1, 2025 and 2024, the dates of the most recent actuarial valuations, the actuarial present value of the accumulated plan benefits totaled:

	2025	2024
Vested Plan benefits:		
Inactive participants	$ 2,721,310	$ 2,193,199
Active participants	49,804,011	44,426,046
Total vested Plan benefits	52,525,321	46,619,245
Nonvested Plan benefits:		
Active participants	-	9,238
Total nonvested Plan benefits	-	9,238
Total Plan benefits	$ 52,525,321	$ 46,628,483

The following is a summary of the factors affecting the year-to-year change in the actuarial present value of accumulated plan benefits at January 1, 2025 and 2024:

	2025	2024
Actuarial present value of accumulated Plan benefits at January 1, 2024 and 2023	$ 46,628,483	$ 39,707,709
Increases (decreases) attributable to:		
Interest due to change in discount period	1,956,608	1,417,728
Benefits paid	(2,902,814)	(971,962)
Benefits accumulated and Plan experience	6,843,044	6,475,008
Net increase	5,896,838	6,920,774
Actuarial present value of accumulated Plan benefits at January 1, 2025 and 2024	$ 52,525,321	$ 46,628,483

There were no changes in actuarial assumptions, Plan amendments or changes in actuarial methods that had a significant effect on the actuarial present value of accumulated plan benefits for the year presented.

3. FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements*, are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 – Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from, or corroborated by, observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value at December 31, 2025 and 2024.

Money market funds: The Plan's money market holdings consist of the Fidelity Government Portfolio, a government money market mutual fund. The fund is valued at its published net asset value (NAV), which represents the price at which shares transact and is based on quoted prices in active markets for identical assets. Accordingly, the fund is classified within Level 1 of the fair value hierarchy. Although the Fidelity Government Portfolio is classified as cash and cash equivalents in the statements of net assets available for benefits due to its highly liquid nature and original maturities of three months or less, it is included in the fair value hierarchy disclosure below because it is measured at fair value.

Registered investment companies: The Plan's investments in registered investment companies consist of open-end mutual funds and exchange-traded funds registered with the Securities and Exchange Commission (SEC). Open-end mutual funds are valued at the daily closing net asset value (NAV) reported by the fund, which is the price at which shares are issued and redeemed. Exchange-traded funds are valued at the closing price reported on the active market on which the shares are traded. All such funds held by the Plan are deemed to be actively traded and are classified within Level 1 of the fair value hierarchy.

U.S. government and agency securities: Valued using pricing models maximizing the use of observable inputs for similar securities.

Corporate bonds and notes: Valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings.

The following tables set forth by level, within the fair value hierarchy, the Plan's investment assets at fair value as of December 31, 2025 and 2024. Assets included in cash and cash equivalents that are measured at fair value, including the Fidelity Government Portfolio, are included in the table below:

	Fair value measurements as of December 31, 2025			
Description	**Total**	**Level 1**	**Level 2**	**Level 3**
Money market funds	$ 3,043,883	$ 3,043,883	$ -	$ -
U.S. government and agency securities	10,920,963	-	10,920,963	-
Corporate bonds and notes	9,584,368	-	9,584,368	-
Registered investment companies	44,240,094	44,240,094	-	-
	$ 67,789,308	$ 47,283,977	$ 20,505,331	$ -

	Fair value measurements as of December 31, 2024			
Description	Total	Level 1	Level 2	Level 3
Money market funds	$ 1,042,369	$ 1,042,369	$ -	$ -
U.S. government and agency securities	10,010,764	-	10,010,764	-
Corporate bonds and notes	7,513,302	-	7,513,302	-
Registered investment companies	38,244,305	38,244,305	-	-
	$ 56,810,740	$ 39,286,674	$ 17,524,066	$ -

Gains and losses included in changes in net assets available for benefits for the years ended December 31, 2025 and 2024, are reported in net appreciation in fair value of investments.

The Plan's policy is to recognize transfers of investments into or out of Level 3 as of the date of the event or change in circumstances that caused the transfer. For the years ended December 31, 2025 and 2024, there were no transfers of investments into or out of Level 3.

4. INFORMATION CERTIFIED BY TRUSTEE

Certain information related to investments disclosed in the accompanying financial statements and ERISA-required supplemental schedules, including investments at December 31, 2025 and 2024, net appreciation in fair value of investments, interest and dividends, and administrative expenses for the years then ended, was obtained by management and agreed to or derived from information certified as complete and accurate by Regions Trust Company (the trustee).

5. PLAN TERMINATION

In the event the Plan terminates, the net assets of the Plan will be allocated, generally, as prescribed by ERISA and its related regulations to provide the following benefits in the order indicated:

1. Benefits attributable to employee contributions, taking into account those paid out before termination, if any.
2. Annuity benefits former employees, or their beneficiaries, have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.

3. Other vested benefits insured by the Pension Benefit Guaranty Corporation (a U.S. governmental agency) up to the applicable limitations (discussed below).
4. All other vested benefits (that is, vested benefits not insured by the Pension Benefit Guaranty Corporation).
5. All nonvested benefits.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC). Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2025 and 2024, that ceiling, which is adjusted periodically, was $7,432 and $7,108 per month, respectively. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or Plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

6. TAX STATUS

The Internal Revenue Service (IRS) has determined and informed the Firm by a letter dated April 12, 2018, issued in the Firm's former name, Maynard, Cooper & Gale, P.C., that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter; however, the Plan administrator believes that the Plan was designed, and is being operated, in compliance with the applicable requirements of the IRC and, therefore, believes that the Plan is qualified, and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2018.

7. RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Because of the level of risk associated with

certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits and the Plan's ability to satisfy accumulated plan benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

8. RELATED PARTY AND PARTY-IN-INTEREST TRANSACTIONS

As described in Note 2, the Plan paid certain expenses related to Plan operations and investment activity to various service providers. In addition, the Plan holds shares of a mutual fund managed by an affiliate of the Plan's actuary. These transactions qualify as party-in-interest transactions under ERISA; however, they are exempt from the prohibited transaction rules under ERISA.

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods
Maynard Nexsen, PC Pension Plan
EIN 63-0864426 Plan No. 004

Assumptions prescribed by law	
Mortality	Before benefit payment period IRS Prescribed Mortality - Generational Non-annuitant, male and female. During benefit payment period IRS Prescribed Mortality - Generational Annuitant, male and female.
Assumptions selected by actuary	
Inflation	2.40% increase per year. Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.
Expected expense	The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets. This is the best estimate available of upcoming year's expenses.
Retirement	Active and inactive participants are assumed to retire at normal retirement age as defined in Plan provisions. This assumption is based on the results of recent experience analysis and anticipated future experience.
Upcoming year salary increase	The preceding year's salary is increased by 4.00% at each age. Note: not used for Plan accounting calculations. Expected salary increase is composed of salary inflation, a real wage growth and a merit increase. This reflects company salary increase philosophies along with more recent experience of the plan participants.
Disability	None. This plan does not offer a subsidized disability benefit therefore the disability assumption is built into the withdrawal assumption.
Marriage	100% married; husbands are 3 years older than wives. This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.
Withdrawal	10% per year. This assumption is based on the result of recent experience analysis.
Compensation limit increase	2.40% increase per year used in the calculation of the IRC 404 maximum deduction cushion. See Calculated deduction in Rules and regulations. Compensation limit increase is consistent with the inflation assumption.

Form of benefit and basis	100% of active participants will elect a benefit paid in a lump sum at the assumed retirement age. Active participants who terminate before the earliest assumed retirement age are assumed to receive a single sum immediately. Participants who are already terminated on the valuation date are assumed to elect a single sum payable at the assumed retirement age. This assumption is based on the results of recent experience analysis and anticipated future experience. The lump sum benefit is based on the Applicable Mortality projected to decrement and the plan's funding target interest rates, as prescribed.
Cash balance interest crediting rate	4.58% compounded annually The plan credits interest according to the 30 year Treasury rate in effect for the December prior to the current plan year
Methods prescribed by law	
Liability measure	Funding Target is the present value of the benefits accrued on the valuation date. Target normal cost is based on benefits expected to accrue during the current plan year.
Benefit accrual	All benefits paid at decrement are considered in total and then split to determine how much is included in funding target. The following pieces are included in the funding target. • The portion based on the plan's definition of accrued benefit. • The benefit portion in excess of the accrued benefit based on the ratio of the participant's years of service on the valuation date to the years of service the participant will have at the time of decrement. The benefits included in target normal cost are calculated similarly, by splitting the benefits. The target normal cost is based on the difference between the amount included in funding target and an amount calculated assuming the participant accrues service through the end of the plan year.

Methods selected by plan sponsor

Asset method

Market value

Segment rates

24-month average with no weighting to prior law basis. Use rates where December is the last month included in the average.

PBGC premium basis

Variable rate premiums are calculated using census, market value of assets and the one-month average of corporate bond rates in effect on the valuation date. You elected this Standard interest method for the 01/01/2016 plan year.

Segment 1 years 0-5	Segment 2 years 5-20	Segment 3 years 20+
4.65%	5.28%	5.63%

Methods elected by actuary

Retirees

Assets and liabilities for current and future retirees are included.

Vested benefits

A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.

The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality

Based on Pri-2012 Total dataset base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2024).

Mortality base rates

Before benefit payment period
Employee amount-weighted, male and female
During benefit payment period
Retiree amount-weighted, male and female

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Total dataset base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.

Mortality improvement

Principal 2024 MI scale is based on MIM-2021-v4 application tool issued by SOA in October 2023 with the following parameters:

Parameter	Principal 2024
Historical dataset	SSA
Whittaker-Henderson Graduation	Order 3
Interpolation Structure	Basic
Graduated MI data last year ("jumping off" point)	2017
H/D transition ultimate year by age/cohort	2030/2030
Weight placed on interpolation by cohort	50%
Initial Slope periods (constraint)	2016-2017 (0.000)
LTR	SSA LTR 2024
COVID-19 or Excess load	None[1]

[1]Based on the sponsor's input, plan experience does not show a need for long-term excess death or Covid death load adjustments.
See Mortality documentation for rationale and additional information.

Interest rate used to value liabilities

4.58%

The interest rate used to value ASC 960 liabilities is set equal to the interest crediting rate for the current year as the investment return objective is to match this crediting rate.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Schedule SB, Part V - Summary of Plan Provisions
Maynard Nexsen, PC Pension Plan
EIN 63-0864426 Plan No. 004

This report reflects the maximum benefit limits under Internal Revenue Code (IRC) Section 415 and maximum compensation limits under IRC Section 401 in effect on the first day of each plan year.

The following is a summary of plan provisions and does not alter the intent or meanings of the provisions contained in the contract or plan document.

This report reflects the Maynard Nexsen, PC Pension Plan as established effective January 1, 2016, and as amended effective October 15, 2022.

Plan eligibility

Participation

Commencing January 1, 2016, each Eligible Employee becomes a participant on the first of the quarter coincident with or next following age 21 and completion of one year of service.

Eligible Employee

An Eligible Employee means any Employee who:

(a) Is an "Equity Shareholder" or an "Other Shareholder as of January 1, of the applicable Plan Year; and

(b) Has Compensation that is equal to or greater than the "Minimum Compensation Threshold" established for Equity Shareholders and Other Shareholders.

Normal retirement benefit

Age

Age 65

Form

Participants may take a single lump sum distribution or an actuarially equivalent annuity.

Amount (accrued benefit)

The sum of a participant's employer hypothetical allocations plus interest credits:

Employer hypothetical cash balance allocations are provided to each participant in an amount based on participant's age and compensation (both determined as of January 1). One twelfth of the amount is credited each month. The employer hypothetical allocations are based on the table on the following page.

Interest Crediting Rate: At the end of the plan year, the interest crediting rate is applied to the account balance at the beginning of year, plus one-half of the hypothetical allocations applied for service during the year minus any distributions during the year. The crediting rate is the 30-Year Treasury Rate in effect for December prior to the beginning of the plan year.

Termination benefit

Vesting percentage

Participants earn a non-forfeitable right to their benefits under the plan according to the vesting schedule, as follows:

Years of service	Vested %
Less than 2	0%
2	20%
3	100%

Form

Same as normal retirement.

Amount

Accrued benefit on date of termination multiplied by the vesting percentage.

Definitions

Plan year

Calendar year

Year of service

One year of service is granted for each 12 month period in which a shareholder completes 1,000 hours of service, commencing with the date the participant first earns one hour of service, then each anniversary thereafter.

Compensation

Compensation of a participant is estimated earnings for the valuation year determined as of January 1 of the valuation year.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
