Schedule SB, Part V - STATEMENT OF ACTUARIAL ASSUMPTIONS

Funding Discount Rates

IRS-Prescribed Three-Segment Rates, for the fourth month prior to the valuation date (September).

	Non-Stabilized	Limited to 25-Year Corridor
Segment 1:	5.07%	5.07%
Segment 2:	5.33%	5.31%
Segment 3:	5.36%	5.50%

The "Limited to 25 Year Corridor" rates are adjusted by the applicable maximum and applicable minimum percentages of the 25-year average segment rates, as set forth in the American Rescue Plan Act of 2021 ('ARPA-21') for use in Minimum Required Contribution calculations. The IRS Maximum Deductible Limit Calculations use the rates from the "Non-Stabilized" column above.

Effective Interest Rate

The Effective Interest Rate (EIR) for the current Plan Year is 5.33%. For the prior Plan Year, the EIR was 5.05%.

The EIR is the single rate of interest which, if used to determine the Funding Target, would result in the same Funding Target determined using the Plan Sponsor's above-elected discount rates. The EIR is used to discount contributions for minimum funding requirements and to accumulate excess contributions to the end of the year.

Funding Expected Return on Assets

The Expected Return on Assets (EROA) used in the calculation of the Actuarial Value of Assets is the lesser of (a) or (b), below:

(a) The expected long-term rate of return on assets based on policy trust allocations; or

(b) The third segment rate in the IRS-prescribed three-segment rate assumption, based on the elections made by the Plan Sponsor for minimum funding purposes.

The results are as follows:

Plan Year	Assumption (a)	Seg. III (b)	EROA (smaller of (a) or (b))
2024	5.50%	5.59%	5.50%
2023	5.50%	5.74%	5.50%

Funding Administrative Expenses Administrative expenses of $85,000 were estimated to be paid from the trust in the current Plan Year and were included in the Normal Cost.

Salary Scale None.

Inflation None.

Funding Mortality §430(h) Generational Mortality Tables for the Current Plan Year.

Changes in funding assumptions since the prior valuation

In accordance with federal law, the discount rates for funding and PBGC purposes were updated from the discount rates disclosed in the 2024 Actuarial Valuation Report to the discount rates shown above.

In accordance with federal law, the funding mortality table was changed from the IRS 2024 Generational Mortality Table to the IRS 2025 Generational Mortality Table.

Actuarial Cost Method	The Pension Protection Act (PPA) requires the calculation of the Target Liability and Target Normal Cost. The Target Liability represents the present value of benefits accumulated as of the valuation date. The present value is calculated by projecting future payments of the accrued benefit, adjusting for probability of receipt according to demographic assumptions, and discounting the payments back to the valuation date using the segment interest rates. Payments expected within five years of the valuation date are discounted using the first segment rate, payments expected at least five but within 20 years of the valuation date are discounted using the second segment rate, and payments expected at least 20 years from the valuation date are discounted using the third segment rate. The calculation of the Target Normal Cost is identical, except that the future payment stream is based on the benefit expected to accrue during the plan year.
Funding Actuarial Value of Assets Method	The Actuarial Value of Assets is determined by averaging three market values: the market value as of the current year valuation date and the two market values at each of the prior two years' valuation dates. The two prior year market values are adjusted for any benefit payments, expenses, contributions, and expected returns that occurred between their respective valuation dates and the current year valuation date. The Actuarial Value of Assets is adjusted to be no greater than 110% and no less than 90% of the market value of assets as of the current year valuation date. Accrued contributions are discounted back to the valuation date at the prior year's effective interest rate.
Changes in methods since the prior valuation	None.
