SCHEDULE SB ATTACHMENTS

Schedule SB, Part V
Statement of Actuarial Assumptions/Methods

1. Assumptions and methods for contribution purposes

Economic Assumptions

Interest rate:

- Applicable month: September segment rates based on bond yields through August 2024
- Yield curve basis: Segment rates

Interest rates:	Reflecting Corridors	Not Reflecting Corridors
• First segment rate	5.07%	5.07%
• Second segment rate	5.31%	5.33%
• Third segment rate	5.50%	5.36%
• Effective interest rate	5.35%	5.32%

Plan-related expenses: $5,000. This amount was determined as expected plan-related expenses to be paid during the valuation year.

Exchange rates: Benefit liabilities for funding purposes are converted from euros to U.S. dollars using a 5-year average of the exchange rate on each valuation since January 1, 2019.

Valuation Date	Exchange Rate
1/1/2025	0.963624 EUR per $1
1/1/2024	0.905187 EUR per $1
1/1/2023	0.934361 EUR per $1
1/1/2022	0.879576 EUR per $1
1/1/2021	0.823015 EUR per $1

As permitted by law, rates reflecting stabilization are used to determine the funding target, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates and may be inconsistent with other economic assumptions used in the valuation.

SCHEDULE SB ATTACHMENTS

Demographic Assumptions	
Mortality	Separate rates for non-annuitants and annuitants based on Pri-2012 “Employees” and “Healthy Annuitants” (participants and beneficiaries combined) tables, respectively, without collar or amount adjustments and then projected forward with a generational projection as specified in the regulations under §1.430(h)(3)-1 using the IRS adjusted Scale MP-2021 (i.e., MP-2021 with no mortality improvement for 2020-2023 and future mortality improvement capped at 0.78% for years after 2024).
Benefit commencement date	Deferred vested participants are assumed to be paid at age 65, and those participants currently in payment status are valued based on their current payment election. Surviving spouse benefits commence at the later of the death of the participant or the date the participant would have attained age 55.
Form of payment	100% of participants are assumed to elect a life annuity
Percent married	85% males; 85% females
Spouse age	Wives four years younger than husbands
At-risk assumptions	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.
Timing of benefit payments	Annuity payments are payable monthly. The plan trust reimburses the company annually at the end of the year.

Methods	
Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

SCHEDULE SB ATTACHMENTS

Decrement timing	The assumptions used are collectively called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements, the age is generally the participant's rounded age at the middle of the year.
Actuarial value of assets for determining minimum required contributions	Average of the fair market value of assets on the valuation date and the preceding valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year). The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Funding policy	The Company's funding policy is to contribute an amount equal to the minimum required contribution. The Company considers each year whether to contribute additional amounts.

Benefits not Valued

All benefits described in the Plan Provisions section of this report were valued. WTW has reviewed the plan provisions with Delta Air Lines, Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor furnished participant data as of January 1, 2025. Information on assets, contributions, and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data was not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected
