INDEPENDENT AUDITOR'S REPORT

The Plan Administrator of the
Americold National Service Related Pension Plan

Opinion

We have audited the financial statements of the Americold National Service Related Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits - liquidation basis as of December 31, 2025 and 2024, and the related statements of changes in net assets available for benefits - liquidation basis for the years ended December 31, 2025 and 2024, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2025 and 2024, and the changes in its net assets available for benefits for the years ended December 31, 2025 and 2024, in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter - Plan Termination and Liquidation Basis of Accounting

As further discussed in Note 1 to the financial statements, the Board of Directors of the Plan approved a plan of liquidation in December 2024, and management determined liquidation is imminent. As a result, the Plan uses the liquidation basis of accounting in preparing the financial statements. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- exercise professional judgment and maintain professional skepticism throughout the audit.
- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedules Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental Schedule H, Line 4i - Schedule of Assets (Held at End of Year) as of December 31, 2025, and Schedule H, Line 4j - Schedule of Reportable Transactions for the year ended December 31, 2025, are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules are fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Note 1 - Description of plan:

The following description of the Americold National Service Related Pension Plan (the Plan) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a noncontributory defined benefit pension plan covering collective bargaining employees of Americold Logistics, LLC (Americold, Plan Administrator, or the Company), except members of collective bargaining units that elect not to participate in the Plan. Eligibility is frozen for all employees. Benefit accruals are frozen for former participants of Montezuma, effective December 31, 2004, for former participants of Gloucester Fresh Fish, effective December 31, 2014, and for former participants employed at Allentown location who are members of the UAAAW of America, effective December 31, 2017. No additional benefits shall accrue after such dates. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Plan termination and liquidation

In December 2024, the Company resolved to terminate the Plan as of June 30, 2025 and is taking steps to liquidate all assets. The Plan was amended to allow eligible participants who elect to take distributions to take benefits as single lump sums during a window from July 15, 2024 to August 31, 2024. Participants eligible for the window had to satisfy all of the following requirements: 1) the participant terminated employment on or before May 1, 2024 with a vested accrued benefit, 2) the participant did not have an annuity starting prior to September 1, 2024, and 3) the participant's benefit was not subject to potential division pursuant to a pending qualified domestic relations order. A total of $2,094,140 was distributed in 2024, directly to participants, during the lump sum window.

The Plan was amended in June 2025 to terminate the Plan.

Pension benefits

Employees are eligible for monthly pension benefit payments beginning at the normal retirement age of 65. Benefits are calculated according to a benefit formula based upon total years and months of credited service multiplied by a monthly benefit factor. Forty years is the maximum credited service permitted.

Note 1 - Description of plan - continued:

The normal pension for an employee with no eligible spouse is payable for the employee's lifetime only. The normal pension for an employee with an eligible spouse is payable at an actuarially reduced amount for the employee's lifetime and, thereafter, at one-half of such amount for the eligible spouse's lifetime.

An employee may elect to modify the form of distribution of the normal pension benefit, with spousal consent as applicable, by exercising one of several options, including a lifetime annuity, a ten-year certain and continuous annuity, or a lump-sum payout. Reduced benefits are payable upon early retirement after attaining age 55 with a minimum of 5 years of continuous service.

Employees who terminate employment and have completed at least five years of continuous service are eligible to receive a deferred vested pension. The deferred vested pension benefit is calculated in the same manner as a normal retirement benefit and commences on the normal retirement date. Employees who terminate prior to rendering 5 years of service forfeit all benefits unless terminated for reason of death, total and permanent disability, or retirement at age 65.

Death benefits

If a participant dies before receiving the first benefit payment, a death benefit equal to the participant's qualified survivor annuity will be payable to the beneficiary at the date of death. The beneficiary may start benefits later at an actuarially equivalent amount. If an unmarried participant dies while receiving benefit payments, benefits cease. If a married participant dies while receiving benefit payments, the eligible spouse receives benefits in accordance with the benefit election made.

Disability benefits

An employee who is at least 45 years of age, has a minimum of 15 years of service, and becomes fully disabled receives monthly disability payments that are equal to normal retirement benefits, subject to a minimum of $50 per month.

Contributions

Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make cash contributions to the Plan in amounts as determined by the Plan's independent actuary sufficient to meet the Plan's minimum funding requirements. The Plan met the minimum funding requirements for the years ended December 31, 2025 and 2024.

Note 1 - Description of plan - continued:

Vesting

Employees who terminate after completion of five years of service, after attainment of age 65, or due to death or disability (while an employee of the Company), are fully vested and eligible to receive retirement income at the normal retirement date (or upon death or total and permanent disability as described above).

Reclassifications

Certain reclassifications have been made to the December 31, 2024 financial statements to conform with the December 31, 2025 presentation.

Note 2 - Summary of significant accounting policies:

Basis of accounting

The financial statements of the Plan are prepared using the liquidation basis of accounting in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). In December 2024, the Board of Directors resolved to liquidate the Plan as of June 30, 2025, and management determined that liquidation of the Plan's assets was imminent. As a result, the Plan's financial statements have been prepared on the liquidation basis of accounting, in accordance with U.S. GAAP. This basis is appropriate when, among other things, liquidation of an entity is probable and net realizable value of assets is reasonably determinable. Under the liquidation basis of accounting, assets are stated at their estimated net realized cash value and liabilities are stated at their anticipated settlement amount.

Investment valuation and income recognition

The Plan's investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's investment committee determines the Plan's valuation policies utilizing information provided by the investment advisors and Principal Trust Company (Trustee, Principal).

Purchases and sales of investments are recorded on a trade-date basis. Interest income is accrued when earned. Dividend income is recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Note 2 - Summary of significant accounting policies - continued:

Payment of benefits

Benefit payments to participants are recorded upon distribution.

Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires the Plan Administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

Risks and uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate risk, market risk and credit risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in risks in the near term would materially affect participants' account balances and the amounts reported in the accompanying statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Recent legislative developments

The SECURE 2.0 Act of 2022 was signed into law on December 29, 2022. This legislation includes a vast array of provisional changes to retirement plans, becoming effective in 2023 and beyond. Plan management adopted mandatory provisions effective for the years ended December 31, 2025 and 2024. Plan management continues to evaluate the impact of the optional provisions of SECURE 2.0 and is awaiting additional regulatory guidance from the Internal Revenue Service (IRS) and Department of Labor. The application of SECURE 2.0 Act did not have a material effect on the Plan's financial statements for the plan years ended December 31, 2025 and 2024.

Note 2 - Summary of significant accounting policies - continued:

Administrative expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the Plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses, including Pension Benefit Guaranty Corporation (PBGC) premiums and other expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as administrative expenses in the accompanying statements of changes in net assets available for benefits. In addition, certain investment related expenses are included in net appreciation (depreciation) in fair value of investments presented in the accompanying statements of changes in net assets available for benefits.

Other additions, on the accompanying statements of changes in net assets available for benefits, represent a refund of PBGC premiums. During 2023, the Plan paid $450,304 in PBGC premiums, and in 2024, received a refund of $354,380 from the PBGC.

Subsequent events

The Plan has evaluated subsequent events through October 14, 2026, which is the date these financial statements were available to be issued. Plan assets of $17,928,308 were disbursed in March 2026 for the purchase of an annuity contract to cover the liability for payments to participants. Additionally, $966,639 was returned to the PBGC on behalf of missing participants and $4,194,537 was disbursed to participants as lump sum payouts or rollovers. Any remaining Plan assets will be used to cover final costs of liquidation.

All subsequent events, if any, requiring recognition as of December 31, 2025, have been incorporated into these financial statements.

Note 3 - Fair value measurements:

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB Accounting Standards Codification No. 820 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Note 3 - Fair value measurements - continued:

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets and liabilities measured at fair value. There have been no significant changes in the methodologies used at December 31, 2025 and 2024.

- Mutual funds are valued at the net asset value of shares held by the Plan at year-end by obtaining quoted prices on nationally recognized securities exchanges.
- Units of participation in pooled separate accounts invested in properties are public investment vehicles valued using the net asset value (NAV) provided by the administrator of the fund. The NAV is based on the value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding. Units of participation in pooled separate accounts invested in mutual funds and common stock, are valued based on the NAV of the underlying investments held in the pooled separate accounts at year-end. In each case, NAV is used as a practical expedient to estimate fair value.

The methodologies described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methodologies are appropriate and consistent with other market

participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2025 and 2024:

	Assets at Fair Value as of December 31, 2025			
	Level 1	Level 2	Level 3	Total

Total assets in the fair value hierarchy	$ 24,233,967	$ -	$ -	24,233,967
Investments measured at net asset value:*

Total investments at fair value				$ 24,688,742

	Assets at Fair Value as of December 31, 2024			
	Level 1	Level 2	Level 3	Total
Mutual funds	$ 22,052,032	$ -	$ -	$ 22,052,032
Total assets in the fair value hierarchy	$ 22,052,032	$ -	$ -	22,052,032
Investments measured at net asset value:*				
Pooled separate accounts				2,347,866
Total investments at fair value				$ 24,399,898

*In accordance with Subtopic 820-10, certain investments that were measured at net asset value per share (or its equivalent) have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the line items presented in the statements of net assets available for benefits.

Note 3 - Fair value measurements - continued:

The following tables summarize investments measured at fair value based on NAV per share as of December 31, 2025 and 2024:

December 31, 2025	Fair Value	Unfunded Commitments	Redemption	Redemption Notice Period
Pooled Separate Account	$ 454,775	None	Daily	1 day

December 31, 2024	Fair Value	Unfunded Commitments	Redemption	Redemption Notice Period
Pooled Separate Accounts	$ 2,347,866	None	Daily	1 day

Note 4 - Related-party transactions:

Certain investments of the Plan are managed by Principal. Transactions with this entity qualify as exempt party-in-interest transactions. Fees incurred by the Plan for the investment management services provided by Principal were $156,865 and $174,829 for the years ended December 31, 2025 and 2024, respectively.

Note 5 - Actuarial present value of accumulated plan benefits:

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances, retirement, death, disability, and termination of employment, are included to the extent they are deemed attributable to employee service rendered to the valuation date. The effect of Plan amendments on accumulated plan benefits is recognized in the year in which such amendments become effective.

Note 5 - Actuarial present value of accumulated plan benefits - continued:

The actuarial present value of accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits as of December 31, 2024 is:

Vested benefits:	
Participants and/or beneficiaries currently receiving benefits	$ 13,407,795
Inactive participants	6,828,375
Active participants	3,538,424
Total vested benefits	23,774,594
Nonvested benefits	62,177
Total actuarial present value of accumulated plan benefits	$ 23,836,771

Changes in the actuarial present value of accumulated plan benefits for the 12 months ended December 31, 2024, are as follows:

Actuarial present value of accumulated plan benefits at January 1, 2024	$ 25,994,922
Increase (decrease) during the year attributable to:	
Increase for interest due to decrease in discount period	1,275,648
Benefits accumulated and plan experience	3,904
Benefits paid	(3,437,703)
Net decrease	(2,158,151)
Actuarial present value of accumulated plan benefits at December 31, 2024	$ 23,836,771

Note 5 - Actuarial present value of accumulated plan benefits - continued:

The significant actuarial assumptions used in the valuation as of January 1, 2025, and 2024, are as follows:

- Life expectancy of the participants: At January 1, 2025 and January 1, 2024, the Pri-2012 Blue Collar Mortality with Scale MP-2021.

- Retirement age: At January 1, 2025 and 2024, the assumed retirement age for active participants is based on the following schedule of probability:

Age	Probability of Retirement
62	50%
63-64	20%
65	100%

The assumed retirement age for inactive participants is based on the following schedule of probability:

Age	Probability of Retirement
55-59	10%
60-63	15%
64-69	25%
70	100%

- Discount rate: The assumed discount rate is 5.25% at January 1, 2025 and 2024, respectively.

The foregoing actuarial assumptions are based on the presumption that the Plan would continue. The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2025 and 2024. Had the valuations been performed as of December 31, there would be no material difference.

Note 6 - Plan termination:

The Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In June 2025, the Company executed an amendment to terminate the Plan as of June 30, 2025.

Under the Single-Employer Pension Plan Amendments Act of 1986, the Plan can be terminated only in a standard termination or a distress termination (i.e., a termination prompted by a severe financial hardship leading to bankruptcy). Under standard termination, the Plan may terminate only if the Plan assets are sufficient to provide all "benefit commitments," which include all vested benefits under the Plan, including certain contingent benefits for which employees have not yet satisfied all the required conditions.

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its regulations, generally to provide the following benefits in the order indicated:

- Annuity benefits that former employees or their beneficiaries have been receiving for at least three years or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding plan termination.

- Other vested benefits guaranteed by the PBGC, a U.S. government agency, up to the applicable limitations (discussed below).

- All other vested benefits.

- All other nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal retirement age benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations.

Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. The ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or Plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Note 6 - Plan termination - continued:

As of the termination date, each participant having an accrued benefit under the Plan which has not been forfeited became fully vested in the accrued benefit.

Note 7 - Funding policy:

The funding policy of the Company is to make annual contributions in an amount which will meet or exceed the annual ERISA minimum funding requirements based on calculations performed by the Plan's actuary and reflecting both the cost of benefits earned for the current year and amortization of the cost of past benefits, if any. During 2025 and 2024, the Company made no contributions, respectively. The minimum funding requirements of ERISA were satisfied for the Plan years ended December 31, 2025 and 2024.

Note 8 - Tax status:

The Plan has received a determination letter from the Internal Revenue Service (IRS) dated May 31, 2012, stating that the form of the Plan is qualified under Section 401(a) of the Internal Revenue Code (IRC); and therefore, the related trust is tax-exempt. The Plan was subsequently amended. Once qualified, the Plan is required to operate in conformity with the IRC to maintain its qualification. The Plan Administrator believes the Plan is being operated in compliance with the applicable requirements of the IRC and, therefore, believes that the Plan, as amended, is qualified and the related trust is tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

U.S. GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Note 9 - Plan amendments:

Effective January 1, 2024, the Plan document was amended to increase the small benefit cash out limit from $5,000 to $7,000.

Assumptions prescribed by law

Mortality

Before benefit payment period

IRS Prescribed Mortality - Generational Non-annuitant, male and female.

During benefit payment period

IRS Prescribed Mortality - Generational Annuitant, male and female.

Assumptions selected by actuary

Inflation

2.40% increase per year.

Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.

Asset return

5.50% for the current plan year.

The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.

Expected expense

The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets, with an updated estimate of PBGC premiums. This is the best estimate available of upcoming year's expenses.

Retirement

Active participants

Age	Probability of retirement
62	50%
63-64	20%
65	100%

Inactive participants

Age	Probability of retirement
55-59	10%
60-63	15%
64-69	25%
70	100%

This assumption is based on the results of recent experience analysis and anticipated future experience.

Disability

1987 Commissioner's Group Disability Table, six month elimination period, male and female.

We rely on a publicly published table due to the limited size of the plan. The 1987 CGDT was recommended by the Society of Actuaries for pension valuation purposes.

Marriage

90% married; husbands are 3 years older than wives.

This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.

Withdrawal	2003 Society of Actuaries Small Plan Age Table, multiplied by 0.85. We rely on a publicly published table due to the limited size of the plan. The SOA Small Plan Age Table is the most recent withdrawal experience table published by the Society of Actuaries. A multiplier of 0.85 is applied to this table to reflect the results of the most recent experience analysis and anticipated future experience.
Form of benefit	Participants are assumed to receive their benefits on the normal form at the assumed retirement age. This assumption is based on the results of recent experience analysis and anticipated future experience.
Methods prescribed by law	
Liability measure	Funding target is the present value of the benefits accrued on the valuation date. Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.
Methods selected by plan sponsor	
Asset method	The asset valuation method is prescribed by law for plans that elect to use a value other than market value. For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years. The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value. When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.
Yield curve rates	Full yield curve. Use the rates through the month of December 2024
PBGC premium basis	Variable rate premiums are calculated using census, market value of assets and interest rates in effect on the current valuation date. Interest rates are the 24-month average rates used for annual cost but without the interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 01/01/2020 plan year and this method must be used for five years before a change can be made.

Methods elected by actuary	
Retirees	Assets and liabilities for current and future retirees are included.
Vested benefits	A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date. The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

Assumptions and methods elected by actuary - plan accounting (ASC 960)	
Mortality	Based on Pri-2012 Blue collar base rate mortality table projected generationally using MP-2021.
Mortality base rates	Before benefit payment period Employee amount-weighted, male and female During benefit payment period Retirees and disabled retirees – Retiree amount-weighted, male and female Contingent survivors – Contingent survivor amount-weighted, male and female after the original participant's death. Participants in pay status who cannot be identified as survivors use the same table as retirees. The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Blue collar base rate table was selected based on information provided by the plan sponsor. Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.
Mortality improvement	MP-2021 is the most recent improvement scale published by the SOA in October 2021. In selecting this assumption, we considered the other parameters available in the MIM-2021-v4 application tool issued by the SOA in October 2023 and consider the selections in MP-2021 reasonable. Based on the sponsor's input, plan experience does not show a need for long-term excess death or Covid death load adjustments.

Interest rate used to value liabilities	5.25% The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.
Treatment of administrative expenses	No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses. Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer. Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Lines 6, 18, 31, 32 - Explanation of Short Plan Year
Americold National Service Related Pension Plan
EIN 22-3631006 Plan No. 006

The plan year beginning 01/01/2025 reflects a short plan year ending on the termination date of 06/30/2025. The asset distribution date is 03/03/2026.

The annual cost is prorated for the period from 01/01/2025 to 06/30/2025. This short period is based on the plan termination date of 06/30/2025 and reflects the final IRS minimum contribution regulations. Quarterly contribution requirements have been adjusted to reflect the short period.

Schedule SB, Line 22 - Description Of Weighted Average Retirement Age
Americold National Service Related Pension Plan
EIN 22-3631006 Plan No. 006

The weighted average retirement age is weighted by the expected percentage of active participants retiring at each age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.

Schedule SB, Line 24 – Change in Actuarial Assumptions
Americold National Service Related Pension Plan
EIN 22-3631006 Plan No. 006

Certain non-prescribed assumptions have been changed since last year. These assumptions were changed to better reflect the anticipated experience of your plan. See the attachment, Part V – Statement of Actuarial Assumptions/Methods, for the rationale for each assumption.

The assumed asset return for the current year has decreased from 5.75% to 5.50%. This rate is used in the calculation of the actuarial value of plan assets.
