Report of Independent Auditors

The Plan Administrator of
Pension Plan for the Employees of Heat and Control, Inc.

Report on the Audit of the Financial Statements

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of Pension Plan for the Employees of Heat and Control, Inc., an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2025 and 2024, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Pension Plan for the Employees of Heat and Control, Inc.'s financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2025 and 2024 and for the years then ended, stating that the certified investment information, as described in Note 6 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section:

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (GAAP).

- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Baker Tilly Advisory Group, LP and Baker Tilly US, LLP, trading as Baker Tilly, are members of the global network of Baker Tilly International Ltd., the members of which are separate and independent legal entities. Baker Tilly US, LLP is a licensed CPA firm that provides assurance services to its clients. Baker Tilly Advisory Group, LP and its subsidiary entities provide tax and consulting services to their clients and are not licensed CPA firms.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Pension Plan for the Employees of Heat and Control, Inc., and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Pension Plan for the Employees of Heat and Control, Inc.'s ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- exercise professional judgment and maintain professional skepticism throughout the audit.
- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Pension Plan for the Employees of Heat and Control, Inc.'s internal control. Accordingly, no such opinion is expressed.

- evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Pension Plan for the Employees of Heat and Control, Inc.'s ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certifications, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of GAAP.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with GAAP.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Other Matter

Supplemental Schedule Required by ERISA

The supplemental schedule of Schedule H, Line 4(i) – Schedule of Assets (Held at End of Year) as of December 31, 2025 is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedule, other than that agreed to or derived from the certified investment information, has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedule that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedule, we evaluated whether the supplemental schedule, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion:

- the form and content of the supplemental schedule, other than the information in the supplemental schedule that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

- the information in the supplemental schedule related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Note 1 – The Plan and Its Significant Accounting Policies

General – The following description of Pension Plan for the Employees of Heat and Control, Inc. (the Plan) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

The Plan is a noncontributory defined benefit pension plan that was established on October 1, 1973, by Heat and Control, Inc. (the Company), to provide benefits to eligible employees. Prior to the freezing of the Plan, the Plan covered all employees who are members of the Company, with the exception of employees covered under collective bargaining agreements and employees of the Galesburg location, when they met eligibility requirements of completion of one year of service with the Company. Participation commenced on the first day of the Plan year after one year of service was attained.

The Plan is currently designed to be qualified under the applicable requirements of the Internal Revenue Code (the Code), and the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Plan was frozen effective January 1, 2009. Employees hired and rehired on or after this date are prevented from plan participation. Effective December 31, 2009, future benefit accruals under the Plan for any existing participant were ceased and all accrued benefits under the Plan were frozen. Further, no years of credited service are earned by Plan participants after December 31, 2009. Benefits accrued under the Plan through December 31, 2009, will not be reduced, diminished, or eliminated, and shall remain payable in accordance with the Plan.

Pension benefits – Benefits are provided for normal, early, or late retirement. A change in the formula calculating retirement benefits was made effective June 5, 1996. Normal retirement is the later of attaining age 65 or the fifth anniversary of employment with the Company. Benefits are calculated based on 0.8% of the participant's average annual compensation multiplied by the years of credited service as defined in the Plan document.

Early retirement requires attaining age 55 or more and five or more years of service. Related benefits commence on the normal retirement date and are based on accrued benefits as of the date of early retirement. Accrued benefits at the date of early retirement are calculated as a monthly benefit under the Plan at the normal retirement date, multiplied by the fraction of years of credited service that would have been completed had the employee worked until the normal retirement date. Participants may also elect to begin receiving benefits as of the first day of any month following early retirement. In such case, monthly benefits will be reduced to reflect the early distribution.

Late retirement benefits are increased actuarially for late payment and are determined in the same manner as prescribed by the normal retirement benefits, which are based on average annual earnings as of either the severance date or age 65, whichever earnings are higher. Benefits must start at the date an employee reaches the age of IRS minimum required distribution, whether or not an employee has retired. For married participants who do not elect otherwise, retirement income will be paid on the basis of a joint and survivor annuity, as stipulated by ERISA, and will be the amount determined under the benefit formula stated in the Plan multiplied by the appropriate factor. If a participant is unmarried, retirement income will be the amount determined under the Plan's benefit formula. The Plan allows for the automatic distribution of participant vested benefits that do not exceed $7,000.

Death benefits – The Plan makes no provision for payment of benefits if a participant dies either before vesting or if single. If a married participant dies with a vested benefit but before early retirement date, then the spouse will receive a life annuity benefit equal to 50% of the pension benefit that would have been received under the qualified joint and survivor annuity if the participant had retired the day before death.

Administration – The Company has appointed an Administrative Committee (the Committee) to manage the operation and administration of the Plan. The Company has contracted with John Hancock Trust Company LLC (John Hancock) to act as the trustee and custodian, and an affiliate of John Hancock as a third-party administrator to process and maintain the records of participant data. All expenses incurred for administering the Plan are paid by the Plan unless Company elects to pay them.

Investment valuation and income recognition – The investments are reported at fair value. The Plan's trustee and custodian, John Hancock, certifies the fair market value of all investments. If available, quoted market prices are used to value investments.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 2 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought or sold as well as held during the year.

Vesting – The Plan provides that benefits vest to participants based on years of service. Participants are fully vested in the Plan upon completion of seven years of service.

Basis of accounting – The financial statements of the Plan are prepared on the accrual method of accounting in accordance with accounting principles generally accepted in the United States of America (GAAP).

Income taxes – The Internal Revenue Service has determined and informed the Company by a letter dated February 13, 2017, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is designed, and currently being operated, in compliance with the applicable requirements of the IRC and, therefore, believes that the Plan is qualified, and the related trust is tax-exempt.

In accordance with guidance on accounting for uncertainty in income taxes, the plan administrator has evaluated the Plan's tax positions and does not believe the Plan has any uncertain tax positions that require disclosure or adjustment to the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Estimates – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated Plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Risks and uncertainties – The Plan holds investment securities. Investment securities are exposed to various risks, such as interest rate, market fluctuations, and credit risks. Due to the risk associated with certain investment securities, it is at least reasonably possible that changes in market values, interest rates, or other factors in the near term would materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made, and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near-term would-be material to the financial statements.

Subsequent events – The Plan has evaluated subsequent events through October 15, 2026, which is the date the financial statements were available to be issued.

Note 2 – Fair Value Measurements

The fair value measurements standard establishes a framework for measuring fair value. That framework provides a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under the standard are described below:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 – Inputs to the valuation methodology include:

- Quoted market prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability; and
- Inputs that are derived principally from, or corroborated by, observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There were no changes in the methodologies used at December 31, 2025 and 2024.

Guaranteed investment contract: The guaranteed investment contract is valued at discontinuance value, which represents the present value of the contract using the difference between the contractual interest rate and a new market interest rate with a comparable duration to determine the estimated amount that would have been available had the contract terminated at the valuation date.

Mutual funds: Mutual funds are valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Common/collective trust: Units held in a common/collective trust (CCT) are valued using the NAV practical expedient of the CCT as reported by the CCT managers. The NAV practical expedient is based on the fair value of the underlying assets owned by the CCT, minus its liabilities, and then divided by the number of units outstanding. This NAV practical expedient would not be used if it is determined to be probable that the Plan will sell the investment for an amount different from the reported net asset value. The CCT has a daily redemption frequency and daily redemption notice period.

Interest-bearing cash: Interest-bearing cash is valued at cost plus accrued interest.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2025 and 2024:

	2025			
	Level 1	Level 2	Level 3	Total

Note 3 – Related-Party and Party-in-Interest Transactions

Certain Plan investments are managed by an affiliate of John Hancock, the trustee, and therefore, these transactions qualify as party-in-interest.

An owner of more than 50% of the Company is a current participant in the Plan.

Note 4 – Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits represent the estimated future periodic payments, including lump-sum distributions, under the Plan's provisions that are attributable to services rendered by employees through the valuation date. Accumulated plan benefits include benefits expected to be paid to: a) retired or terminated employees or their beneficiaries, b) beneficiaries of employees who have died, and c) present employees or their beneficiaries. Benefits under the Plan are based on years of service and benefit credit rates. The accumulated plan benefits for active employees are based on the pre-freeze years of service and benefit credit rates on the date at which the benefit information is presented (valuation date). Benefits payable under all circumstances (retirement, death, deceased, and termination of employment) are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated Plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of December 31, 2024, were as follows:

Rate of return	6.25% (increased from 5.00% at the prior valuation date)
Mortality assumption	Pri-2012 Total Dataset Mortality Table (Scale MP-2021)
Salary increases	None
Retirement age	Age 65, or attained age if greater

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2025. Had the valuations been performed as of December 31, there would be no material differences.

Actuarial present value of accumulated plan benefits	
Vested benefits	
Participants currently receiving benefits	$ 11,750,245
Participants entitled to deferred benefits	4,591,429
Other participants	9,095,616
Total vested benefits	25,437,290
Nonvested benefits	-
Total actuarial present value of accumulated plan benefits	$ 25,437,290
Actuarial present value of plan benefits, beginning of year	$ 28,841,492
Increase (decrease) during the year	
Decrease in the discount period	1,408,453
Benefits paid	(1,361,462)
Assumption changes	(3,158,767)
Additional benefits earned, including experience gain and losses	(292,426)
Actuarial present value of accumulated plan benefits, end of year	$ 25,437,290

Note 5 – Funding Policy

Contribution amounts are determined by a qualified actuary to meet the minimum funding standards established for plans subject to ERISA. Additionally, from time to time, the Company may contribute amounts above the minimum required contribution. Contributions by participants are not permitted by the Plan. The Company was not required to, and did not, make contributions for the years ended December 31, 2025 and 2024. The Plan had prefunding balances of approximately $3,528,000 and $3,130,000 at January 1, 2025 and 2024, respectively. Subject to applicable statutory requirements and elections by the Company, the prefunding balance may be used to offset future minimum required contributions.

Note 6 – Certified Investment Information

The following information related to investments was obtained by management and agreed to or derived from information certified as complete and accurate by John Hancock, a qualified institution:

- Investments reflected on the accompanying statements of net assets available for benefits as of December 31, 2025 and 2024.
- Net appreciation in fair value of investments, other income, and dividends and interest, reflected on the accompanying statements of changes in net assets available for benefits for the years ended December 31, 2025 and 2024.
- Investments reflected on the schedule of assets (held at end of year) as of December 31, 2025.

Note 7 – Plan Termination or Modification

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Benefits attributable to employee contributions, taking into account those paid out before termination, if any.
2. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
3. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations.
4. All other vested benefits (that is, vested benefits not insured by the PBGC).
5. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

Note 8 – Reconciliation of Financial Statements to Form 5500

The Form 5500 has certain items that differ from amounts shown on the accompanying financial statements. These differences relate to classification only and have no effect upon net assets available for benefits for either period.

Actuarial cost method

Funding target and target normal cost

An actuarial cost method allocates the expected cost of a pension plan on a year-by-year basis. The primary objective is to accumulate enough assets prior to each participant's retirement to provide the promised pension benefits.

The Pension Protection Act of 2006 (PPA) requires plan sponsors to use the Traditional Unit Credit actuarial cost method in which the estimated accrued benefit is based on service and, if applicable, earnings as of the valuation date. The funding target is equal to the actuarial present value of all accrued benefits as of the valuation date. The target normal cost is the actuarial present value, as of the valuation date, of the expected increases in projected accrued benefits attributable to service expected to be completed during the plan year (i.e., if applicable, one year's salary growth is reflected in the determination of target normal cost).

For tax deduction purposes, the funding target may reflect the value of future pay increases on accrued benefits, if applicable.

PPA discounting method

The plan sponsor must choose between full yield curve spot rates or a segmented yield curve of 24-month average corporate bond rates. If the segmented yield curve is selected, the plan sponsor can use either the rates as of the month of the valuation or as of a lookback month, up to 4 months prior to the valuation date. If the full yield curve is selected, the rates as of the month of valuation must be used.

For purposes of this valuation, the following discounting method was used and is assumed to be approved by the plan sponsor:

September 2024 segment rates, adjusted so each segment rate is no less than the applicable minimum percentage* of the corresponding 25-year average segment rate for the calendar year that contains the first day of the plan year and no more than the applicable maximum percentage of that 25-year average segment rate. The 25-year average cannot be less than 5.0% prior to application of the corridor.**

Asset valuation method

Plan assets for purposes of this actuarial valuation are valued under the asset averaging method, including, if applicable, discounted receivable contributions. The value is equal to the average of the fair market value of assets on the valuation date and the adjusted fair market value (including expected earnings) for the two earlier annual determination dates. Expected earnings are calculated using a rate no greater than the third segment rate of the segmented yield-curve in effect at the beginning of each valuation year. The resulting average value must be fall between 90 and 110 percent of the fair market value of assets on the valuation date.

---

* Minimum is 95% through 2030, decreasing 5% per year beginning in 2031 until 70% is reached in 2035

** Maximum is 105% through 2030 and increasing 5% per year beginning in 2031 until 130% is reached in 2035

Rationale for significant assumptions

Economic assumptions

- **Expected return on plan assets:** The assumption was selected by the client. We believe the assumption is reasonable as it falls within a reasonable range of expected returns for the plan's asset allocation based on capital market assumptions.

Demographic Assumptions

- **Termination:** We believe that this assumption is representative of anticipated future experience. Historically, this assumption has not produced significant gains or losses for the plan. In addition, based on discussions with the plan sponsor, significant changes in termination patterns are not expected.

- **Retirement:** We believe that this assumption is representative of anticipated future experience. Historically, this assumption has not produced significant gains or losses for the plan. In addition, based on discussions with the plan sponsor, significant changes in retirement patterns are not expected.

Miscellaneous assumptions

- **Expenses:** None assumed since no expenses are paid from the trust.

- **Form of Payment:** All optional forms are actuarially equivalent, and the assumption is based on the normal form of payment.

- **Spouse's Age and Percent Married:** The employer does not have enough credible data to analyze spousal demographics. These assumptions are based on the actuary's experience with similar plans.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
