Schedule SB, Part V
Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis

- Applicable month: January
- Interest rate basis: 3-Segment Rates from the Valuation Date

Interest rates	**Reflecting Stabilization**	**Not Reflecting Stabilization**
• First segment rate	5.00%	5.00%
• Second segment rate	5.27%	5.27%
• Third segment rate	5.50%	5.40%
• Effective interest rate	5.23%	5.23%

Expected rate of return for 2025: 5.73%

Plan-related expenses: Plan-related expenses are calculated by adjusting the actual prior year expenses with inflation. For 2025, the plan-related expenses are assumed to be $4,000 (last year's expenses was assumed to be $2,000).

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Demographic Assumptions

Inclusion date: The valuation date coincident with or next following the date on which the employee becomes a participant.

New or rehired employees: It was assumed there will be no new or rehired employees.

Mortality: Separate rates for non-annuitants and annuitants based on Pri-2012 "Employees" and "Healthy Annuitants" (participants and beneficiaries combined) tables, respectively, without collar or amount adjustments and then projected forward with a generational projection as

	specified in the regulations under §1.430(h)(3)-1 using IRS adjusted Scale MP-2021 (i.e., MP-2021 with no mortality improvement for 2020-2023 and future mortality improvement capped at 0.78% for years after 2024).
Termination	Not Applicable
Disability	Not Applicable
Retirement	Not Applicable
Benefit commencement dates	
• Deferred vested benefit	Not Applicable
• Disability benefit	Not Applicable
• Retirement benefit	Not Applicable
Form of payment	Not Applicable
Percent married	Not Applicable
Spouse age	Not Applicable
Covered pay	Not Applicable
Timing of benefit payment	Annuity payments are payable monthly at the beginning of the month.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Decrement timing	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are

	assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued based on discussions with Colgate-Palmolive Company regarding the likelihood that these benefits will be paid. WTW has reviewed the plan provisions with Colgate-Palmolive Company and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor, through its third party administrator WTW, furnished participant data as of January 1, 2025. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

In consultation with the plan sponsor, the following assumptions were made for missing or apparently inconsistent data elements:

- For participants reported in the current data with missing demographic information (Birth Date/Gender), we will use their prior demographic information to value these participants

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Schedule SB, Part V
Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis

- Applicable month: January
- Interest rate basis: 3-Segment Rates from the Valuation Date

Interest rates	**Reflecting Stabilization**	**Not Reflecting Stabilization**
• First segment rate	5.00%	5.00%
• Second segment rate	5.27%	5.27%
• Third segment rate	5.50%	5.40%
• Effective interest rate	5.23%	5.23%

Expected rate of return for 2025: 5.73%

Plan-related expenses: Plan-related expenses are calculated by adjusting the actual prior year expenses with inflation. For 2025, the plan-related expenses are assumed to be $4,000 (last year's expenses was assumed to be $2,000).

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Demographic Assumptions

Inclusion date: The valuation date coincident with or next following the date on which the employee becomes a participant.

New or rehired employees: It was assumed there will be no new or rehired employees.

Mortality: Separate rates for non-annuitants and annuitants based on Pri-2012 "Employees" and "Healthy Annuitants" (participants and beneficiaries combined) tables, respectively, without collar or amount adjustments and then projected forward with a generational projection as

	specified in the regulations under §1.430(h)(3)-1 using IRS adjusted Scale MP-2021 (i.e., MP-2021 with no mortality improvement for 2020-2023 and future mortality improvement capped at 0.78% for years after 2024).

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Decrement timing	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are

	assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued based on discussions with Colgate-Palmolive Company regarding the likelihood that these benefits will be paid. WTW has reviewed the plan provisions with Colgate-Palmolive Company and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor, through its third party administrator WTW, furnished participant data as of January 1, 2025. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

In consultation with the plan sponsor, the following assumptions were made for missing or apparently inconsistent data elements:

- For participants reported in the current data with missing demographic information (Birth Date/Gender), we will use their prior demographic information to value these participants

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.
