Independent Auditor's Report

To the Plan Administrator and Benefits Committee of the
Global Tote US Pension Plan for Union Employees

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of Global Tote US Pension Plan for Union Employees (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 ("ERISA"), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2025 and 2024, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of Global Tote US Pension Plan for Union Employees' financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's ("DOL") Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has a obtained certification from a qualified institution as of December 31, 2025 and 2024, and for the years then ended, stating that the certified investment information, as described in Note 5 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section:

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

- The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America ("GAAS"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Global Tote US Pension Plan for Union Employees and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Managements election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Global Tote US Pension Plan for Union Employees' ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error,

as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- exercise professional judgment and maintain professional skepticism throughout the audit.
- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Global Tote US Pension Plan for Union Employees' internal control. Accordingly, no such opinion is expressed.
- evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Global Tote US Pension Plan for Union Employees' ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter – Supplemental Schedules Required by ERISA

The supplemental schedules of Schedule H, Line 4i – Schedule of Assets (Held at End of Year), and Schedule H, Line 4j – Schedule of Reportable Transactions as of or for the year ended December 31, 2025, are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the DOL's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audit of the financial statements and certain additional procedures,

including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion:

- The form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

- The information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Global Tote US Pension Plan for Union Employees

Notes to Financial Statements

For the Years Ended December 31, 2025 and 2024

1. Description of Plan

The following description of the Global Tote US Pension Plan for Union Employees (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a noncontributory defined benefit plan established effective August 1, 1973, as restated January 1, 2019. The Plan covers all employees, excluding leased employees, non-union field employees, and employees covered under a separate labor contract, of Global Tote US, LLC (the "Company") who become eligible on the first day of the month that follows the date the employee becomes a full time member of the collective bargaining unit represented by the International Brotherhood of Electrical Workers Local #3, Service Employee International Union, Local 244, Local 2 BGPWU (formerly Local 323), and Local 2 BGPWD/Branch 528. Benefits are calculated based upon a specified rate, contingent upon the year in which the participant retires, multiplied by the participant's credited years of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The Benefits Committee is responsible for the operation and administration of the Plan as well as monitoring investment offerings and performance.

Funding Policy

The Plan's funding policy is for the Company to contribute an amount which will meet or exceed the annual ERISA minimum funding requirement. The minimum funding requirements of ERISA were met in 2025 and 2024. The Plan recorded Company contributions of $150,000 in 2025 and $271,070 in 2024.

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA.

Pension Benefits

Plan participants are entitled to their plan benefits after terminating employment with vested rights. Participants become vested in the Plan upon attainment of the normal retirement age (65), although the Plan does allow for early retirement at the age of 55 with 15 years of service.

Upon becoming vested, participants are entitled to receive the value of their accumulated benefits as a contingent pensioner option, or as a ten-year certain and life income option, payable monthly. For each employee electing a ten-year certain and life income option, benefits are paid during the participant's lifetime but not less than a period of ten years. For participants who become eligible for retirement benefits, Empower purchases an annuity equal to the future benefits expected to be paid to the participants. Upon purchase of this annuity, Empower assumes

1. Description of Plan (Continued)

all future obligations for payment of the retirement benefits. For participants who become disabled, Empower will deduct monthly benefit payments directly from the Deposit Administration Fund until normal retirement date. If a vested married participant who had at least one (1) hour of service after August 22, 1984 dies, monthly benefits are paid to the surviving spouse equal to 50% of the reduce amount the employee would have been eligible for, assuming that retirement date was the date of death. Active employees who are permanently and totally disabled may be eligible to receive a disability income benefit. If a disable participant qualifies, the amount of disability income to be received is the pension benefit accrued to the date of disability.

Upon termination of employment, pension payments are normally paid in the form of a monthly annuity payable for their lifetime or, if married, in the form of a qualified joint or survivor annuity.

2. Summary of Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Deposit Administration Fund

The Plan Invests in a fully-benefit responsive guaranteed investment contract through Empower. A Deposit Administration Fund (the “Fund”) has been established and is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The Fund is included in the financial statements at contract value, as reported to the Plan by Empower. Contract value represents contributions made under contract value. Unrealized gains (losses) from the guaranteed investment contract are not included in the statement of changes in net assets available for benefits as the contract is recorded at contract value for purposes of the statements of net assets available for benefits.

The Fund’s value is established by applying the stated contractual interest rate against the daily balances. Upon contract liquidation, a market value adjustment may apply based on the economic value at such time, after taking into consideration any Empower guarantees, expenses, taxes or other charges incurred in liquidating the account. Contract provisions may vary and will govern with respect to the value of actual transfers.

2. Summary of Accounting Policies (Continued)

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Payment of Benefits

Benefits payments to participants are recorded at the time the annuity contracts are purchased.

Administrative Expenses

Certain administrative costs of maintaining the Plan are paid out of the net assets available for benefits, unless otherwise paid by the Company. Expenses that are paid directly by the Company are excluded from these financial statements.

Subsequent Events

Subsequent events were evaluated through October 15, 2026, the date the financial statements were available to be issued. No events have been identified requiring recognition or disclosure in the financial statements.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during each year of credited service. The accumulated plan benefits for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances, such as retirement, death, and termination of employment, are included, to the extent they are attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect

3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, withdrawal or retirement) between the valuation date and the expected date of payment.

The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2025. Had the valuation been performed as of December 31, there would be no material differences.

The actuarial present value of accumulated plan benefits as of the beginning of the plan year is as follows:

Actuarial Present Value of Accumulated Plan Benefits		
Vested Benefits		
Participants currently receiving payments	$	98,642
Other participants		7,722,117
Total Vested Benefits		7,820,759
Nonvested benefits		22,087
Total Actuarial Present Value of Accumulated Plan Benefits	$	7,842,846

The change in the actuarial present value of the accumulated plan benefits for the year ended January 1, 2025 consist of the following:

Actuarial present value of accumulated plan benefits at beginning of year	$	7,672,963
Increase (Decrease) During the Year Attributable to:		
Benefits accumulated		71,901
Increase for interest		283,958
Benefits paid		(185,976)
Net Decrease		169,883
Actuarial Present Value of Accumulated Plan Benefits at End of Year	$	7,842,846

The significant actuarial assumptions used in the valuation were:

Assumption	**January 1, 2025**
Discount rate	3.75%
Mortality	Pri-2012 Total Dataset (Employee/Retiree) with Scale MP-2021
Retirement age	65
Actuarial cost method	Unit Credit

3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Guaranteed Investment Contract

The Plan has a guaranteed investment contract with Empower. Empower maintains the contributions in a general account. The accounts are credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. Empower is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan.

There are no reserves against contract value for credit risk of Empower or otherwise. The crediting interest rate is based on a formula agreed upon with Empower, but may not be less than 1 percent. The interest rate credited to participants reflects the amortization or realized and unrealized gains and losses in the underlying investment contracts over the duration of the entire portfolio and may not reflect the actual returns achieved in the portfolio. From time to time, the crediting rate may be significantly greater or less than current market interest rates. Such interest rates are reviewed on a semi-annual basis for resetting.

The average yield earned by the Plan for the guaranteed investment contract was 3.25% for the year ended December 31, 2025. The average yield of the Fund and the average yield credited to the participants are one and the same, since there is no ownership right to the assets in the general account, which support the obligations of the fixed account options. The average yield is calculated by the December crediting rate by the contract value to determine the one-day annualized earnings.

Generally, there are not any events that could limit the ability of the Plan to execute transactions at contract value within 90 days. The guaranteed investment contract does not permit Empower to terminate the agreement prior to the scheduled maturity date.

5. Information Certified by Trustee

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA for 2025 and 2024. Accordingly, Empower Annuity Insurance Company of America, the Trustee of the Plan, has certified to the completeness and accuracy of all investments reported in the accompanying Statements of Net Assets Available for Benefits as of December 31, 2025 and 2024, and the supplemental Schedule H, Line 4i – Schedule of Assets (Held at End of Year) as of December 31, 2025, and the related investment activity reported in the Statements of Changes in Net Assets Available for Benefits for the years ended December 31, 2025 and 2024 and the information reported in the supplemental Schedule H, Line 4j – Schedule of Reportable Transactions for the year ended December 31, 2025.

6. Related–Party and Party In Interest Transactions

The Plan's investments are administered under a contract with Empower Annuity Insurance Company of America, the Trustee of the Plan. Contributions are held and managed by Empower Annuity Insurance Company of America, who invests cash received, interest and dividend income and makes distributions to participants. These transactions are party in interest transactions under ERISA.

As described in Note 2, the Plan paid certain expenses related to plan operations and investment activity to various service providers. Additionally, certain administrative functions of the Plan are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan. These transactions are party in interest transactions under ERISA.

7. Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Benefits attributable to employee contributions, taking into account those paid out before termination.
2. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
3. Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) up to the applicable limitations.
4. All other vested benefits (that is, vested benefits not insured by the PBGC).
5. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors pensions. However, the PBGC does not guarantee all benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2025 that ceiling is $7,432 per month. That ceiling applied to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

7. Plan Termination (Continued)

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plans net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

8. Tax Status

The IRS has determined and informed the Company by a letter dated June 15, 2021, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (“IRC”). Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is designed, and is currently being operated, in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the taxing authorities. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2025, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods pending or in progress.

9. Risks and Uncertainties

Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee compensation and demographics all of which are subject to change. Due to the uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates assumptions in the near term would be material to the financial statements.

The Plan invests all of its assets in a guaranteed investment contract. the guaranteed investment contract is exposed to various risks such as interest rate, market, and credit risks. Market risks include global events which could impact the value of the guaranteed investment contract, such as a pandemic or international conflict. Due to the level of risk associated with the guaranteed investment contract, it is at least reasonably possible that changes in the contract value of the guaranteed investment contracts will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

10. Reconciliation of Financial Statements to Form 5500

The following is a reconciliation of net assets available for benefits per the financial statements at December 31, 2025 and 2024, to Form 5500:

	2025	2024
Net assets available for benefits per the financial statements	$ 6,058,693	$ 6,269,825
Less: Company contribution receivable	(50,000)	(100,000)
Total	$ 6,008,693	$ 6,169,825

The following reconciles the increase in net assets per the financial statements for the years ended December 31, 2025 and 2024, to Form 5500:

	2025	2024
(Decrease)/increase in net assets available for benefits per the financial statements	$ (211,132)	$ 191,903
Plus: Prior year Company contribution receivable	100,000	375,000
Less: Current year Company contribution receivable	(50,000)	(100,000)
(Decrease)/Increase in net assets available for benefits per Form 5500	$ (161,132)	$ 466,903

Actuarial methods

Under the actuarial methods described below, if all current assumptions remain constant and are realized, funding at least the minimum required contribution each year will eventually accumulate sufficient plan assets to cover the funding target. Future widening of the interest rate stabilization corridor may extend the time period for the plan to become fully funded.

Cost method

Costs have been computed in accordance with the unit credit actuarial cost method and reflect the actuarial assumptions described under "Actuarial assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Accrued vs. vested benefits

Accrued benefits are the benefits accumulated according to the service, compensation, and benefits outlined in the plan provisions. Vested benefits are the same except that they exclude the following, if applicable:

- Benefits for non-vested participants
- Death benefits over the value of the plan's qualified pre-retirement survivor annuity (QPSA)
- Disability benefits over the value of the standard termination or retirement benefits for participants who are not disabled as of the measurement date
- Benefits over the value of the standard termination benefits for participants who have not attained eligibility for early retirement and supplemental benefits as of the measurement date

Target normal cost

The target normal cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding target and funding shortfall

The funding target is the present value of benefits accrued as of the beginning of the plan year and the funding shortfall is the excess of the funding target over the actuarial value of assets (reduced by the credit balance). The initial funding shortfall is amortized over 15 years.

In subsequent years, the funding shortfall less the present value of prior year amortization installments is amortized over 15 years, and added to any prior year amortization installments.

Segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is listed on the following page:

Plan year	Corridor
Through 2030	95% - 105%
2031	90% - 110%
2032	85% - 115%
2033	80% - 120%
2034	75% - 125%
2035 and later	70% - 130%

In the event the 25-year average of either the first, second, or third segment rate falls below 5%, the 25-year average of such rate will be deemed to be 5%.

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

Sponsor elections

Discount rate: Segment rates, with a 4-month lookback
Mortality table: Prescribed IRS small plan combined static mortality table

At-risk determination

The at-risk funding target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the at-risk funding target and at-risk target normal cost when a plan is at-risk in at least two years during the preceding four years. The load increases the at-risk funding target by 4% of the not at-risk funding target plus $700 per participant, and increases the at-risk target normal cost by 4% of the not at-risk target normal cost.

The funding target and target normal cost are calculated by multiplying the not at-risk values by 100% minus the phase-in percentage, plus the at-risk values multiplied by the phase-in percentage.

Credit balance

The credit balance consists of the carryover balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the prefunding balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the minimum required contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The actuarial value of assets is reduced by the credit balance to determine certain funded percentages and to determine the funding shortfall.

Asset valuation method

The actuarial value of assets is equal to the fair market value of assets.

The actuarial value of assets for determining the maximum tax deductible contribution reflects interest rate stabilization rates for discounting contributions and limiting expected earnings.

Actuarial assumptions

Funding assumptions:

The discount rate and mortality assumptions are prescribed assumptions set by law. All other assumptions are non-prescribed assumptions set by the actuary which reflect estimates of future experience, are appropriate for the purpose of the measurement, consider relevant plan characteristics, and contain no significant bias unless otherwise noted. Relevant historical information, such as credible plan experience and experience from representative populations, was considered in the selection of the non-prescribed assumptions with a significant effect on the measurement. Factors that may affect future experience and the views of experts were also considered.

The termination assumption was updated in 2021 to reflect the most recent study performed by the Society of Actuaries (SOA).

The retirement age assumption was reviewed in 2021 as is consistent with recent experience and with the plan provisions.

The investment return is based on the plan's asset allocation and reflects a weighted average of expected returns by asset class.

ASC 960 assumptions:

All assumptions are set by the plan sponsor and they align with the Funding Assumptions except for the mortality assumption. The discount rate for ASC 960 aligns with the Investment Return assumption used in the ERISA Funding measurement.

The mortality assumption reflects experience from representative populations, based on the Pri-2012 Private Retirement Plans Mortality Table Report issued by the Society of Actuaries (SOA) in October 2019 and the Mortality Improvement Scale MP-2021 Report issued by the SOA in October 2021.

Below are the actuarial assumptions as of January 1, 2025:

Discount rate	**With interest rate stabilization**	**Without interest rate stabilization**	**ASC 960**
Effective rate	5.41%	5.34%	3.75%
First segment – first 5 years	5.07%	5.07%	N/A
Second segment – next 15 years	5.31%	5.33%	N/A
Third segment – after 20 years	5.50%	5.36%	N/A

Mortality	
Funding	The IRS 2025 small plan combined static mortality table
Accounting	Pri-2012 total dataset (employee/retiree) with scale MP-2021
Termination	2003 SOA pension plan turnover study, select and ultimate
Disability	N/A
Retirement age	Age 65. Participants at or beyond this age are assumed to retire immediately.
Investment return	3.75% per annum, compounded annually.
Estimated expenses	$5,000 plus PBGC premium, rounded to the nearest $5,000. For 2025, the estimated expense assumption is $45,000.
Survivor's benefit	It is assumed that husbands are 3 years older than wives and that 90% of the male participants and 60% of the female participants who are or will become eligible for coverage under the survivor's benefit will be survived by an eligible survivor.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Shortfall amortization

The prior year amortization values and the development of the amortization for the current plan year are shown below.

Prior year amortization amounts

Plan year	Installment	Years remaining	Present value
2024	$3,723	14	$38,125
2023	10,473	13	101,902
2022	8,826	12	81,133
2021	60,498	11	521,881
Total	$83,520		$743,041

Current year amortization

1.	Exemption from current year amortization	No
2.	Funding shortfall to be amortized	$767,615
3.	Present value of prior year amortization installments	743,041
4.	Current year amortization base [2 – 3]	24,574
5.	Current year amortization installment	$2,291

Net shortfall amortization installment

6.	Current year amortization installment	$2,291
7.	Sum of prior year amortization installments	$83,520
8.	Net shortfall amortization installment [6 + 7, not less than $0]	$85,811

Plan provisions

Service	All years of service with the employer from date of employment to early retirement, termination of employment, or retirement date; based on 1000 hours equals one year of service.
Credited service	All years of service with the employer from date of employment to retirement, termination of employment, or date of death. Service in excess of 30 years for non-plant Employees is excluded.
Normal form of annuity	Life annuity.
Normal retirement Date	The first day of the month coinciding with or next following the participant's 65th birthday.
Participation eligibility	Employee is not covered under a separate labor contract. Employee is a member of a collective bargaining unit represented by the International Brotherhood of Electrical Workers.
Benefit formula	Effective June 1, 1995, the benefit formula for plant employees is $168 times credited service. Effective June 1, 1999 the benefit formula is $180 times credited service. Effective June 1, 2003, the benefit formula is $204 times credited service. Effective October 21, 1996, the benefit formula for field employees is $156 times credited service. Effective October 21, 2000, the benefit formula for field employees is $168 times credited service. Maximum 30 years of credited service. Effective October 21, 2004, the benefit formula for field employees is $204 times credited service. If a field employee retires on and after October 21, 2001, he will receive a benefit based on the $204 benefit level. If he terminates prior to October 21, 2004 and before normal retirement date, the benefit remains at $168 level. Maximum of 30 years of credited service. Effective October 21, 2008, the benefit formula for field employees is $240 times credited service. If a field employee retires on and after October 21, 2008, he will receive a benefit based on the $240 benefit level. Maximum of 30 years of credited service.

Income payable	Amount described in sections (a) or (b) below, whichever applies: (a) If participant has a spouse as of his retirement date and does not elect otherwise, retirement income shall be paid on the basis of joint & survivor form, as stipulated by ERISA, and will be the accrued benefit multiplied by the appropriate factor. (b) If participant either has no spouse as of his retirement date or elects to receive his income under the normal form, retirement income will be the amount determined under the benefit formula.
Early eligibility	Ten years early with fifteen years of service
Early benefit amount	Normal retirement benefit accrued to early retirement, reduced 7.2% for the first five years which the annuity commencement date precedes normal retirement date, and further reduced 3.6% per year for the next five years that annuity commencement date precedes the normal retirement date.
Vesting schedule	Five years of service equals 100% vesting. Normal retirement date equals 100% vesting.
Vested benefit	Benefit accrued to date of termination adjusted by the appropriate vesting percentage.
Preretirement spouse benefit	
A. *Eligibility*	Eligible for early retirement, married one full year prior to death
Benefit formula	50% of the pension benefit accrued to date of death reduced by appropriate early retirement and joint-and-survivor factors.
B. *Eligibility*	Eligible for vesting but not eligible for early retirement, married one full year prior to death.
Benefit formula	50% of the vested pension benefit accrued to date of death, payment deferred to no earlier than the early retirement date of the deceased participant and reduced by the appropriate early retirement and joint-and-survivor factors.
Disability benefit	
A. *Eligibility*	Active employee.
Benefit formula	Benefit accrued to date of disability.

Actuarial methods

Under the actuarial methods described below, if all current assumptions remain constant and are realized, funding at least the minimum required contribution each year will eventually accumulate sufficient plan assets to cover the funding target. Future widening of the interest rate stabilization corridor may extend the time period for the plan to become fully funded.

Cost method

Costs have been computed in accordance with the unit credit actuarial cost method and reflect the actuarial assumptions described under "Actuarial assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Accrued vs. vested benefits

Accrued benefits are the benefits accumulated according to the service, compensation, and benefits outlined in the plan provisions. Vested benefits are the same except that they exclude the following, if applicable:

- Benefits for non-vested participants
- Death benefits over the value of the plan's qualified pre-retirement survivor annuity (QPSA)
- Disability benefits over the value of the standard termination or retirement benefits for participants who are not disabled as of the measurement date
- Benefits over the value of the standard termination benefits for participants who have not attained eligibility for early retirement and supplemental benefits as of the measurement date

Target normal cost

The target normal cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding target and funding shortfall

The funding target is the present value of benefits accrued as of the beginning of the plan year and the funding shortfall is the excess of the funding target over the actuarial value of assets (reduced by the credit balance). The initial funding shortfall is amortized over 15 years.

In subsequent years, the funding shortfall less the present value of prior year amortization installments is amortized over 15 years, and added to any prior year amortization installments.

Segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is listed on the following page:

Plan year	Corridor
Through 2030	95% - 105%
2031	90% - 110%
2032	85% - 115%
2033	80% - 120%
2034	75% - 125%
2035 and later	70% - 130%

In the event the 25-year average of either the first, second, or third segment rate falls below 5%, the 25-year average of such rate will be deemed to be 5%.

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

Sponsor elections

Discount rate: Segment rates, with a 4-month lookback
Mortality table: Prescribed IRS small plan combined static mortality table

At-risk determination

The at-risk funding target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the at-risk funding target and at-risk target normal cost when a plan is at-risk in at least two years during the preceding four years. The load increases the at-risk funding target by 4% of the not at-risk funding target plus $700 per participant, and increases the at-risk target normal cost by 4% of the not at-risk target normal cost.

The funding target and target normal cost are calculated by multiplying the not at-risk values by 100% minus the phase-in percentage, plus the at-risk values multiplied by the phase-in percentage.

Credit balance

The credit balance consists of the carryover balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the prefunding balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the minimum required contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The actuarial value of assets is reduced by the credit balance to determine certain funded percentages and to determine the funding shortfall.

Asset valuation method

The actuarial value of assets is equal to the fair market value of assets.

The actuarial value of assets for determining the maximum tax deductible contribution reflects interest rate stabilization rates for discounting contributions and limiting expected earnings.

Actuarial assumptions

Funding assumptions:

The discount rate and mortality assumptions are prescribed assumptions set by law. All other assumptions are non-prescribed assumptions set by the actuary which reflect estimates of future experience, are appropriate for the purpose of the measurement, consider relevant plan characteristics, and contain no significant bias unless otherwise noted. Relevant historical information, such as credible plan experience and experience from representative populations, was considered in the selection of the non-prescribed assumptions with a significant effect on the measurement. Factors that may affect future experience and the views of experts were also considered.

The termination assumption was updated in 2021 to reflect the most recent study performed by the Society of Actuaries (SOA).

The retirement age assumption was reviewed in 2021 as is consistent with recent experience and with the plan provisions.

The investment return is based on the plan's asset allocation and reflects a weighted average of expected returns by asset class.

ASC 960 assumptions:

All assumptions are set by the plan sponsor and they align with the Funding Assumptions except for the mortality assumption. The discount rate for ASC 960 aligns with the Investment Return assumption used in the ERISA Funding measurement.

The mortality assumption reflects experience from representative populations, based on the Pri-2012 Private Retirement Plans Mortality Table Report issued by the Society of Actuaries (SOA) in October 2019 and the Mortality Improvement Scale MP-2021 Report issued by the SOA in October 2021.

Below are the actuarial assumptions as of January 1, 2025:

Discount rate	**With interest rate stabilization**	**Without interest rate stabilization**	**ASC 960**
Effective rate	5.41%	5.34%	3.75%
First segment – first 5 years	5.07%	5.07%	N/A
Second segment – next 15 years	5.31%	5.33%	N/A
Third segment – after 20 years	5.50%	5.36%	N/A
